HOUSING TRUST FUND CORPORATION

Environmental Compliance Checklist

Office of Community Renewal (OCR) state funded programs including:
Buffalo Main Streets Initiative (BMSI), Community Controlled Affordable Housing (CCAH), OCR Managed Downtown Revitalization Initiative (DRI) and New York Forward (NYF), Land Bank Initiative (LBI) New York Main Street (NYMS).

Local Program Administrator (LPA): Village of Amityville

Funding Program:	DRI	**Project Municipality:**	Village of Amityville
SHARS ID:	20230017	**Project County:**	Suffolk County
Review Type:	Site Specific	**Project Address (if site specific):**	250-258 Broadway

Identify other HCR funding sources planned for project below:

Compliance Area	Attachments Included	Compliance Procedures
A. Historic/Cultural Resources: Section 14.09 of the Parks, Recreation and Historic Preservation Law.	☒	The SHPO No Adverse Impact determination is attached. The determination is based upon the scope of work submitted on 05/23/2025.
B. Flood Plains: 6 NYCRR Part 502, Floodplain Management Criteria for State Projects.	☒	The target area does not include any buildings or sites within a SFHA. A copy of the FIRM map, with the Panel Number and Effective Date is included.
C. Zoning: C1. Projects must conform to local land use plans and receive all necessary zoning and site plan approvals and permits.	☒	The project will not require zoning modifications, variances or a special use permit for issuance of a building permit. See attached documentation.
C2. Projects that result in a change in the building use must be identified.	☒	The existing use of the building is commercial; the proposed use of the building is commercial.
D. Coastal Zones: 19 NYCRR Part 600, Coastal Zone Management	☒	The project site is not located within the coastal zone as documented in the attached coastal zone boundary map.
E. Site Contamination- *Hazardous Materials:* Projects funded under the Program must be free of hazardous materials which could affect the health and safety of occupants or conflict with the intended utilization of the property.	☒	An environmental professional has certified that the project site is free of hazardous materials, contamination, toxic chemicals and gases, and radioactive substances. Documentation is attached.
F. Lead Based Paint: All activities impacting dwelling units or child occupied facilities must be free from the hazards posed by lead-based paint. ***Refer to the Program Policy for Lead-Based Paint.***	☒	The project involves exterior renovations or interior commercial renovations only. Window openings into residential or child-occupied facility floors will not be impacted as part of the project scope of work.
G. Asbestos Containing Materials NYS Department of Labor at 12 NYCRR Part 56	☒	An Asbestos survey was conducted, and it was determined that ACM will not be disturbed as documented in the attached.

H. Radon EPA map of Radon Zones; EPA Radon Mitigation Standards	☒	The target area or project site is located in a zone with low potential for radon according to the EPA Map of Radon Zones. Radon testing is not required.
I. Wetlands: 6 NYCRR Part 663, Freshwater Wetlands Permit Requirements and, Section 404 of the Clean Water Act	☐	The project does not involve new construction or ground disturbance.
J. Endangered Species: 6 NYCRR Part 182, Endangered and Threatened Species	☐	The project does not involve new construction, ground disturbance, or tree cutting.
K. Agricultural Districts: Agriculture and Markets Law Article 25-AA, Sections 303 and 304, Agricultural Districts	☐	The program does not involve any activities with potential to convert farmland to nonagricultural use and does not require an Agricultural Data Statement
L. Smart Growth: 2019 and later NYMS contracts must complete the Smart Growth Criteria Form and confirm outcome.	☐	No aspect of the project to be funded by any funding source, including NYSHCR/HTFC: (i) involve the acquisition, new construction of, or expansion or reconstruction of infrastructure such as roads, sewers, water lines or sidewalks; and, (ii) such infrastructure is open and accessible to the public; and, (iii) such infrastructure is not owned and used solely by the project.

Individual site-specific checklists may require more detailed supporting documentation and review in circumstances such as:

- substantial improvement in a flood zone;
- projects in, or adjacent to, Agricultural Districts;
- work on a building determined by SHPO to have historic or cultural significance;
- ground disturbance, new construction, or tree cutting;
- zoning changes;
- a change in actual building use (whether or not this change is locally regulated);
- acquisition, new construction of, or expansion or reconstruction of infrastructure;
- if the work constitutes a SEQR Unlisted action.

Certification

I am authorized to execute contract materials for the program award to the Local Program Administrator (LPA) named above. I have read this Checklist and by signing this document agree with the statements made herein and agree that: (1) site specific checklists will be prepared and submitted to the OCR for each project site and additional documentation will be provided as necessary for the circumstances listed above; (2) project activities will be conducted in conformance with the described compliance procedures; (3) an environmental determination letter or approval from OCR will be received before taking any physical action on a site or incurring costs related to a specific activity; (4) costs incurred for activities completed prior to the SEQR determination and submission of the site-specific checklist will not be eligible for reimbursement; and (5) if any circumstances of project activities change, altering compliance language and/or required procedures herein, a new Checklist or Smart Growth Criteria Form will be provided.

25PR04815

Dear David Tepper:

Thank you for requesting the comments of the Office of Parks, Recreation and Historic Preservation (OPRHP). We have reviewed the project in accordance with the New York State Historic Preservation Act of 1980 (Section 14.09 of the New York Parks, Recreation and Historic Preservation Law). These comments are those of the OPRHP and relate only to Historic/Cultural resources. They do not include potential environmental impacts to New York State Parkland that may be involved in or near your project.

Based upon this review, it is the opinion of OPRHP that no properties, including archaeological and/or historic resources, listed in or eligible for the New York State and National Registers of Historic Places will be impacted by this project.

If further correspondence is required regarding this project, please be sure to refer to the OPRHP Project Review (PR) number noted above. If you have any questions, please contact Jeffry Iovannone at the following email address:

Jeffry.Iovannone@parks.ny.gov

Sincerely,

R. Daniel Mackay

Deputy Commissioner for Historic Preservation
Division for Historic Preservation

RELIANCE LETTER

January 9, 2025 – *Report Revised on June 3, 2025*

IMEG
177 Crossways Park Drive
Woodbury, NY 11797
Attention: David Tepper

RE: Phase I Environmental Site Assessment Report, dated January 9, 2025
JLC Project No. 24-7877 | Prepared by Jennifer Carey

- Consultant: JLC Environmental Consultants, Inc.
- Property Name:
- Site Address: 250-256 Broadway, Amityville, NY 11701

To Whom it May Concern:

This is to certify that I, Jennifer Carey (Environmental Professional), have reviewed the existing documentation and provided site observations of the property and building located at 250-256 Broadway, Amityville, NY 11701 for the purpose of identifying and assessing any environmental conditions which would impact the safe occupancy of the Site and the research of historical data pertaining to the land use and possible hazardous pre-existing conditions.

The Site observations and document research contained in the Environmental Site Assessment (Phase I) Report dated January 9, 2025, was performed by Jennifer Carey in conformance with the scope and limitations of ASTM Standard Practice E1527-21.

Environmental Professional certifies that (1) to the best of her knowledge, Environmental Professional is independent of and not a representative, nor an employee or affiliate of seller, borrower, operating company, or any person in which seller has an ownership interest; and (2) the Environmental Professional has not been unduly influenced by any person with regard to the preparation of the Environmental Investigation or the contents thereof.

Based upon the information obtained, as reflected in this report, this assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or historical recognized environmental conditions in connection with the subject property. No further assessment is recommended.

Sincerely,
JLC Environmental Consultants, Inc.

Jennifer Carey
Environmental Investigator

Certification:

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.
Based upon the information obtained, as reflected in this report, this assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or historical recognized environmental conditions in connection with the subject property. No further assessment is recommended.

Jennifer Carey - Environmental Investigator

2.0 EXECUTIVE SUMMARY

A Phase I Environmental Site Assessment (ESA) of the Subject Property was requested by IMEG for the property located at 250-256 Broadway, Amityville, NY. The purpose of a Phase I ESA is to identify *recognized environmental conditions* in connection with the subject property. As defined by ASTM E1527-21, "The term *recognized environmental conditions* means the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property:* (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*."

Based upon the information obtained, as reflected in this report, this assessment has preliminarily revealed no evidence of *recognized environmental conditions, controlled recognized environmental conditions,* or *historical recognized environmental conditions* in connection with the subject property. JLC did find evidence of a *recognized environmental condition and an historical recognized environmental condition on the adjacent property directly to the west of the subject property* an (OK Petroleum Terminal). Based on the scope of work that prompted the requirement for a Phase 1 ESA, the east facade restoration of the subject property, no further assessment is recommended.

2.1 Subject Property Description

The subject property site is located on Broadway (Route 110) between Sterling Place and Mill Street in the village of Amityville within the Town of Babylon, Suffolk County, NY. It is a 2 story mixed-use structure with retail business establishments found on the ground floor and residential apartments found on the 2nd floor.

This report documents JLC Environmental Consultants, Inc. (**JLC**) findings from its Phase I Environmental Site Assessment ESA) of the property located at 250-256 Broadway, Amityville New York, 11701 (the "Subject Property"). The Subject Property is located in the retail business district and is comprised of an irregular-shaped parcel of land totaling .238 acres (approximately 10,300 square feet), with a two-story building. There are paved parking lots located at the southern side of the property and a parking lot and an additional storage lot located on the Western side of the property. The area was developed since at least the 1890 and the zoning for this property is currently considered to be "Retail Business District".

Review of Topographic and Sanborn maps indicates that the Subject Property was developed with some type of building structure since at least 1897. The Subject Property has been occupied by a variety of commercial tenants over the decades since this site was originally developed. Typical occupants of the space over time include business such as: general store, hardware store, harness shop, undertaker and auto repair shop along with various other businesses throughout the years.

The current use of the subject property is retail businesses located on the first floor and residential apartment units on the second floor. The tenants that occupy the three (3) retail establishments on the first floor are: 1) Broadway Convenience Store; 2) Off Track Betting (OTB); and 3) Broadway Liquor & Wine. There were no other structures or improvements present at the time of the site visits.

There is a two-story brick structure found on the subject property. There were no other structures or improvements present at the time of the site visits.

2.2 Data Gaps

Data gaps are defined as a lack of, or inability to, obtain information required by ASTM E1527-21 despite good faith effort. According to 40 CFR Part 312, Innocent Landowners, Standards for Conducting All Appropriate Inquires, the following components of the "all appropriate inquiries" must be conducted or updated within 180 days of and prior to the date of acquisition of the subject property:

(1) Data collected for Interviews with past and present owners, operators, and occupants;
(2) Searches for recorded environmental cleanup liens;
(3) Reviews of federal, tribal, state, and local government records;
(4) Visual inspections of the facility and of adjoining properties, and
(5) The declaration by the environmental professional.

Significant data gaps that affected the ability of the environmental professional to identify *recognized environmental conditions* were not identified however, the following data gaps were noted:

JLC was given no access to the interior of the building found at the property location for visual inspection, no Key Site Manager was identified or interviewed for this report, Additionally, the User Questionnaire sent to gather information about the property was not completed and returned by the property owner(s) and there were no previously completed Phase I Environmental Site Assessments were made available to JLC during the preparation of this report.

Any 'data gaps" noted herein has not negatively affected the ability of the environmental professional to identify *recognized environmental conditions.* Deviations or deletions from the scope of work defined by ASTM E1527-21 were not intentionally made. JLC has concluded that the failure of the User to provide additional requested information at the time of this report does not present a significant Data Gap and therefore, can declare that JLC has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Deviations or deletions from the scope of work defined by ASTM E1527-21 were not intentionally made.

JLC's inability to obtain access to the interior of the building located at 250-256 Broadway reduced the amount of site reconnaissance activities that were performed which are required by ASTM procedures. JLC was able to reconnoiter the exterior of the building and the surrounding properties and enter two (2) of the retail businesses (Broadway Convenience and Broadway Wine Liquor) but access to the interior of the building was limited. JLC was unable to conduct a complete interior inspection, unable to interview a key site manager or any regulatory officials involved with this project and a completed User Questionnaire was not provided to us at the time this report was prepared.

2.3 Environmental Report Summary

JLC has performed a Phase I ESA of the commercial building, located at 250-256 Broadway, Amityville, NY, in general conformance with the scope and limitations of ASTM Practice E1527-21. Exceptions to, or deletions from, this practice are described in Section 3.0 of this report.

Based upon the information obtained, as reflected in this report, this assessment has preliminarily revealed no evidence of *recognized environmental conditions, controlled recognized environmental conditions,* or *historical recognized environmental conditions* in connection with the subject property. JLC did find evidence of a *recognized environmental condition and an historical recognized environmental condition on the adjacent property directly to the west of the subject property* an (OK Petroleum Terminal). Based on the scope of work that prompted the requirement for a Phase 1 ESA, the east facade restoration of the subject property, no further assessment is recommended.

3.0 INTRODUCTION

JLC performed a site review in the form of a Phase I Environmental Site Assessment (ESA) to assist the property owner with identify *recognized environmental conditions* in connection with the subject property. As defined by ASTM E1527-21, "The term *recognized environmental conditions* means the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property:* (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*.

3.1 Purpose

The purpose of a Phase I Environmental Site Assessment (ESA) is to identify *recognized environmental conditions* in connection with the subject property. As defined by ASTM E1527-21, "The term *recognized environmental conditions* means the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property:* (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*."

The Phase I Environmental Site Assessment (ESA) review on this property was conducted to comply with the requirements of the New York State Downtown Revitalization Initiative (DRI). This initiative awarded a grant to the village of Amityville, New York to implement a Commercial Store Front Revitalization Fund to provide grants to renovate building exteriors within the DRI designated area. This ESA was prepared to help the Village of Amityville identify any environmental factors encountered at the project site and to ensure compliance with applicable regulations.

The term *controlled recognized environmental condition* as defined by ASTM is a "*recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*)."

The term *historical recognized environmental condition* as defined by ASTM is "a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

The term suspect *recognized environmental condition* as used throughout this report is cited from ASTM E1527-21. JLC uses this term for conditions that have a potential to be a *de minimis condition*, a *recognized environmental condition*, a *controlled recognized environmental condition*, or a *historical recognized environmental condition* for the subject property and requires further discussion as presented within the text of this report. Section 7.0 summarizes each of the known or suspect *recognized environmental conditions* associated with the subject property. In Section 7.0, JLC presents its opinion of the potential impact a known or suspect *recognized environmental condition* has on the subject property and whether or not the suspect *recognized environmental condition* is currently a *de minimis condition*, a *recognized environmental condition*, a *controlled recognized environmental condition*, or a *historical recognized environmental condition*, based on site-specific characteristics.

ASTM E1527-21 states that an ESA "meeting or exceeding" this practice and completed less than 180 days prior to the date of acquisition of the *property* or (for transactions not involving an acquisition) the date of the intended transaction, is presumed to be valid if the report is being relied on by the User for whom the assessment was originally prepared. The components of the practice to be completed within 180 days include: interviews, searches for recorded environmental cleanup liens, the regulatory review, site visit and the declaration by the environmental professional responsible for the assessment. The ASTM E1527-13 practice also states that within this 180 day period, if the assessment will be used by a different user than the user for whom the assessment was originally prepared, the subsequent user must also satisfy the User's Responsibilities.

3.2 Scope of Work

The Phase I ESA conducted at the subject property was in general accordance with ASTM Standard E 1527-21 and included the following:

- A site reconnaissance and visual survey of properties proximate to the subject property,
- Review of records and interviews with regulatory officials and representatives regarding current and former operations at the subject property,
- A review of historical resources, such as: property records, topographic maps, fire insurance maps, city directories, and aerial photographs,
- Review of previous environmental site assessments, if made available,
- Review of State and Federal environmental database information, and
- Evaluation of information and preparation of the report provided herein.

Typically, a Phase I ESA does not include sampling or testing of air, soil, groundwater, surface water, or building materials. Testing for asbestos containing materials (ACM) and Lead Based Paint (LBP) activities were carried out at the subject property under a separate work order. ACM and LBP inspections were completed and reports were submitted to IMEG. These reports are not a part of this ESA as noted in Section 9.0.

3.3 Significant Assumptions

Information obtained from the Client, the Client's representative (when available), individuals interviewed (when available), and prior environmental reports (if provided) were considered to be accurate unless JLC's reasonable inquiries clearly revealed otherwise. Conditions observed were considered to be representative of areas that were not observed unless otherwise indicated.

The primary direction of groundwater flow was assumed to be dictated by topography, unless otherwise indicated by measurement of potentiometric surface or other quantifiable data. Additionally, the groundwater flow direction was assumed to control the distribution of impact, if present.

3.4 Limitations and Exceptions

The findings and opinions presented are relative to the dates the work was conducted and should not be relied on to represent conditions at later dates. The opinions included herein are based on information obtained during the assessment and JLC's experience. If additional information becomes available that may impact JLC's environmental assessment findings, JLC requests the opportunity to review the information, reassess the potential concerns, and modify JLC's opinions, if warranted.

This assessment included visual observations to identify obvious features or conditions indicative of *recognized environmental conditions*.

Although this assessment has attempted to identify *recognized environmental conditions*, JLC cannot eliminate all uncertainty as to *recognized environmental conditions* in connection with the subject property nor represent or warrant that the subject property contains no hazardous substances or petroleum products or other latent conditions beyond those identified through the scope of work identified herein. Other features, conditions, and constituents may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information.

Although this assessment has attempted to identify *business environmental risks*, potential *business environmental risks* may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, (5) deliberate concealment of detrimental information, and/or (6) the subjective nature of materiality to the User with respect to *business environmental risks*.

JLC's professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants undertaking similar studies and practicing in this locality during the same timeframe. No other warranty, expressed or implied, is intended or made with respect to this report or JLC's services.

This assessment was not exhaustive and Users of this report should consider the scope and limitations related to these services when developing opinions as to risks associated with the subject property.

This report presents an assessment of the subject property as defined by information provided by the Client and Client's representative. JLC's findings, opinions, conclusions, and recommendations are based on the locations and boundaries of the subject property as evident in the field and on information provided by the Client.

The discussion in Section 2.1 defines the subject property as understood by JLC and any unique conditions related thereto. The limitations or exceptions to ASTM Standard E1527-21 noted during the course of the Phase I ESA were: 1) No physical access to building interior spaces; 2) no Key Site Manager available to interview; 3) no User Questionnaire was completed by current owner.

3.5 Deviations

JLC's inability to obtain access to the interior of the building located at 250-256 Broadway reduced the amount of site reconnaissance activities that were performed which are required by ASTM procedures. JLC was able to reconnoiter the exterior of the building and the surrounding properties and enter two (2) of the retail businesses (Broadway Convenience and Broadway Liquor & Wine) but access to the interior of the building was limited. JLC was unable to conduct a complete interior inspection, unable to interview a key site manager or any regulatory officials involved with this project and a completed User Questionnaire was not provided to us at the time this report was prepared.

3.6 Special Terms and Conditions

The work was conducted in general conformance with JLC's proposal 24-7877 dated June 6, 2024, and the terms and conditions established therein. The User is defined as the party seeking to use ASTM E1527-21 to complete an ESA of the property. The User of this Phase I ESA is JLC's Client, IMEG Corp.

3.7 Reliance

This report represents JLC's services as of the date hereof. As JLC's final document, it may not be altered after final issuance. This assessment and report were prepared on behalf of and for the exclusive use of IMEG solely for its use and reliance and is subject to the terms and conditions agreed upon between JLC and IMEG. The Client and JLC were solely involved in shaping the scope of services. Accordingly, reliance on this report by any other party may involve assumptions leading to an unintended interpretation of findings and opinions. As such, reliance by other parties on the contents of this document is not granted, and any such reliance shall be at the sole risk of the User. With the consent of JLC and the Client and for a fee, JLC may offer reliance to third parties or contract with other parties to develop findings and opinions related to such party's specific risk management objectives. Except as otherwise agreed in writing, any and all third party reliance upon this Phase I ESA shall be subject to the terms in JLC's standard Terms and Conditions (available upon request) constitutes JLC's aggregate liability to any and all relying third parties for any and all claims.

4.0 USER-PROVIDED INFORMATION

ASTM E1527-21 requires that the environmental professional request from the User of the Phase I ESA, the Client, certain information concerning the subject property that will help identify the possibility of *recognized environmental conditions* in connection with the subject property or to request from the User the names of other individuals who can provide this information.

ASTM E1527-21 assigns to the Client or its representative the responsibility to provide the environmental professional with information pertaining to environmental liens or AULs (including institutional controls, physical or engineered controls, land use restrictions, restrictive covenants, easements, etc.) applicable to the subject property, whether recorded or not. ASTM E1527-21 states that the User can engage a title company or title professional as an addition to the scope of work to be performed by the environmental professional. ASTM E1527-21 and the supporting regulation state that the search for environmental liens/AULs by the User may be a significant component in the Environmental Protection Agency's (EPA's) determination of whether a property owner has satisfied the requirements for landowner liability protection against the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) liability.

Depending on available information and specific site conditions, JLC may conclude that the failure of the User to provide environmental lien/AUL search documentation does not present a significant Data Gap and therefore, can declare that JLC has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. However, failure of the User to provide the information or to engage the environmental consultant or others to obtain and consider that information may separately weaken a defense to CERCLA liability.

If the Client or its representative is aware of specialized knowledge or experience that is material to the identification of *recognized environmental conditions*, or if it has actual knowledge that the purchase price of the subject property is significantly less than the purchase price of comparable properties, ASTM E1527-21 assigns to the Client the obligation to communicate that information to the environmental professional prior to the subject property reconnaissance. ASTM E1527-21 requires that an explanation of a significant decrease in purchase price be provided in writing.

ASTM E1527-21 assigns to the Client or its representative the responsibility to inform the environmental professional of the reason it wants the Phase I ESA performed and to provide commonly known, reasonably available information about the subject property that is material to *recognized environmental conditions*. Absent information to the contrary, the purpose for assessment is assumed to be in preparation for a *commercial real estate transaction*.

As part of JLC's engagement to conduct this work, information was requested from Client or its representative as to its awareness of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the subject property; or (3) any notices from governmental entities regarding possible violations of environmental laws or possible liabilities relating to hazardous substances or petroleum products.

4.1 Activity/Use Limitations

Using selected sources of reasonably ascertainable public information, JLC reviewed the current and historical uses of the subject property. The Phase I ESA historical review extends back until 1890, no uses prior to that date are known. Sources of historical use information relating to the subject property and its adjoining properties were acquired and reviewed according to the reasonable availability of the information, the time limits provided for data acquisition and review, as permitted, by the project schedule and cost, and JLC's judgment of the likely value of the information for indicating environmental conditions. Historical sources reviewed by JLC are listed in Section 7.4 and typically include local city directories, aerial photographs, and a topographic map. If available through the database provider, the historical sources reviewed also included Fire Insurance Maps.

No information regarding environmental liens, AULs, or governmental notification relating to past or recurrent violations of environmental laws with respect to the subject property was reported to JLC or indicated by the Client or its representatives. JLC was not provided with a copy of any Title Insurance Documentation.

Regulatory Status Review

JLC reviewed a report of select regulatory databases published for the local area to identify facilities potentially constituting a suspect recognized environmental condition in regard to the subject property. JLC reviewed the databases to identify

recorded facilities located on, or in proximity to, the subject property using the ASTM E1527-21 standard environmental record sources and recommended approximate minimum search distances.

JLC attempted to obtain additional information regarding listed facilities that, in our professional judgment, may constitute recognized environmental conditions in connection with the subject property.

Subject Property Physical Setting
JLC obtained and reviewed reasonably ascertainable published subject property information to characterize the physical setting of the subject property. If reasonably ascertainable, JLC reviewed the current USGS 7.5 Minute Topographic Map showing the area on which the subject property is located. JLC reviewed one or more physical setting sources at the discretion of the environmental professional to obtain information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of the subject property. Discretionary physical setting sources may have been sought if (1) conditions had been identified in which hazardous substances or petroleum products in any form including vapor, are likely to be present on-site or to migrate to the subject property from off-site sources and (2) more information is generally obtained, pursuant to local good commercial or customary practice.

Report
JLC has prepared this report, which includes the findings concerning known or suspect recognized environmental conditions and an opinion as to the potential impact those conditions would have on the subject property. This report concludes whether or not the assessment revealed recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental conditions, de minimis conditions, and business environmental risks, and provides recommendations, if appropriate. The ASTM E1527-21 standard is incorporated by reference; JLC can assist the Client with obtaining a copy of this standard on request.

4.2 Specialized Knowledge

IMEG and the property owner did not report any specialized knowledge of this subject property to our representatives. JLC representatives involved with this project also have no specialized knowledge of the subject property outside of the research which was conducted and reported as part of this report. There was no Key Site Manager available to interview for additional specialized knowledge about this site.

4.3 Valuation Reduction for Environmental Issues

No information indicating that the purchase price of the subject property was significantly less than the purchase price of comparable properties was reported to JLC by the Client or its representative

4.4 Owner, Subject Property Manager, and Occupant Information

The Suffolk County Geographic Information System (GIS) database published by the Department of Information Technology of the County of Suffolk was used to find ownership information for the subject property. According to the database, the current owner of the subject property is Reyansh Realty USA, Inc. but no address or telephone number for the business entity could be located in a search for additional ownership information. It is occupied by three (3) retail tenants, - 1) Broadway Convenience Store; 2) Off Track Betting (OTB); and 3) Broadway Liquor & Wine. There are also a number or residential apartments on the 2nd Floor of the subject property. During the site visit to the property, JLC was able to gather limited additional information about the property from visual inspection. There was no key site manager available to interview.

4.5 Reason For Performing Phase I ESA

JLC understands this assessment was required by the client prior to being provided funding for a village revitalization project overseen by the State of New York, which includes the subject property. JLC understands that the purpose of this assessment was to complete an evaluation that meets the applicable standard of "all appropriate inquiry into the previous ownership and uses of the subject property consistent with good commercial or customary practice" with the objective of assembling documentation that may help to support one of the threshold criteria for satisfying one or more defenses to CERCLA liability (LLPs) and to assist the Client in understanding potential environmental conditions that could materially impact the operation of the business associated with the subject property (business environmental risk).

5.0 SUBJECT PROPERTY DESCRIPTION

The subject property, 250-256 Broadway, Amityville, NY consists of a irregular rectangular shaped parcel of land approximately 10,300 square feet in size (.238 acre lot) with a two story mixed use building with parking areas to the South and West of the building. Amityville is located within the Town of Babylon, County of Suffolk, New York, and is a suburban village area characterized by retail establishments of various businesses. The current structure located at the site is a two (2) story brick building with three (3) retail tenants on the ground floor: 1) Broadway Convenience Deli; 2) Off Track Betting (OTB); and 3) Broadway Liquor & Wine. There are several residential apartments on the second floor of the building. The subject property is in fair condition (some wear, deterioration was noted while being generally structurally sound and performing its intended purpose).

5.1 Location and Legal Description

The subject property is located at 250-256 Broadway (Route 110) between Sterling Place and Mill Street in the village of Amityville within the Town of Babylon, Suffolk County. NY 11701. It is a 2 story mixed-use structure with retail business establishments on the ground floor and residential apartments on the 2nd floor. According to the research conducted on this property it is found 21 feet above sea level. The area is zoned as B-1 Retail Business District.

5.2 Subject Property and Surrounding Area Description

To assess the subject property and surrounding area, JLC conducted a site visit and also obtained and reviewed reasonably ascertainable published subject property information to characterize the physical setting of the subject property. JLC reviewed the current *USGS 7.5 Minute Topographic Map* showing the area on which the subject property is located. JLC reviewed one or more physical setting sources at the discretion of the environmental professional to obtain information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of the subject property. Discretionary physical setting sources may have been sought if (1) conditions had been identified in which hazardous substances or petroleum products in any form including vapor, are likely to be present on-site or to migrate to the subject property from off-site sources and (2) more information is generally obtained, pursuant to local good commercial or customary practice.

During the site reconnaissance, JLC Environmental observed the subject property and it's use and the land use on properties in the immediate vicinity of the subject property. The subject property is a two (2) story mixed use building on a rectangular parcel of land located in the village of Amityville, NY. It is surrounded by other buildings with other establishments, residential tenants, and parking lots in the area of the village zoned the as B-1 Retail Business District (RBD). It is bordered by additional B-1 RBD zoned areas to the North, South, and East. Directly West of the subject property is an area zoned as B-2 General Business District (GBD). Across Broadway to the Northeast is an area zoned as industrial. Southwest of the subject property is also zoned B-1 RBD. The areas to the Northeast and Northwest of the subject property are zoned as Industrial.

Observed current uses of adjoining properties are discussed according to their respective geographic relationship to the subject property in section 5.5:

5.3 Current Use of Subject Property

The current use of the subject property is retail businesses located on the first floor and residential apartment units on the second floor. The tenants that occupy the three (3) retail establishments on the first floor are: 1) Broadway Convenience; 2) Off Track Betting (OTB); and 3) Broadway Liquor & Wine.

5.4 Description of Structures and Other Improvements

There is a two-story brick structure found on the subject property. There were no other structures or improvements present at the time of the site visits.

5.5 Adjoining Property Information

During the site reconnaissance, JLC Environmental observed the following land use on properties in the immediate vicinity of the subject property:

The subject property is a two (2) story mixed use building on a rectangular parcel of land located in the village of Amityville, NY. It is surrounded by other commercial buildings with commercial and retail tenants, and parking lots. It is in the area of the village zoned the as B-1 Retail Business District (RBD). It is surrounded by more of the B-1 RBD to the North, South, and East, and bordered to the West by B-2 General Business District. To the Northeast, Northwest, and Southwest are areas zoned as industrial. Southeast of the subject property is some B-1 RBD, followed by B-Residences.

Observed current uses of adjoining properties are discussed as follows according to their respective geographic relationship to the subject property. Beginning to the North of the Subject Property are the adjoining properties are described below and in the table in section 5.5:

North
The subject property is bordered to the North by Firestone; an auto repair shop.

South
Across the road (Sterling Pl.) to the South is a laundromat and attached parking lot. Further South is an elevated railway for the Long Island Railroad (LIRR).

East
Across the road (Broadway) to the East is a Walgreens Store with a large parking lot.

West
To the West of the subject property is a parking lot for the nearby businesses and a small building further to the west noted as Lindy's Taxi. Directly West of Lindy's is a parcel of land noted as "OK Oil Terminal" which is an active business concern that supplies petroleum products to large oil delivery trucks.

Northeast
Northeast of the Subject Property across Broadway is the parking lot associated with to the Walgreens Store

Southeast
Southeast of the Subject Property is a fenced off storage yard under the elevated railway for the LIRR.

Northwest
To the Northwest of the Subject Property is a continuation of the parking lot for the surrounding businesses on the street.

Southwest
Southwest of the Subject Property is a large building that is currently being used as a self service storage rental facility.

Adjoining Property Information			
Direction From Subject Property	**Occupant**	**Use**	**Comments**
North	Firestone Tire and Auto Repair Facility	Commercial	1 story brick building
South	Laundromat	Commercial	1 story brick and stucco building. The Laundromat is across the street (Sterling Place) from the Subject Property. Further South is an elevated railway for the Long Island Railroad that runs latitudinally.

Direction From Subject Property	Occupant	Use	Comments
East	Walgreens	Retail	Tall 1 story brick building occupied by a Walgreens Store is found across the street (Broadway) from the Subject Property.
West	OK Petroleum Oil Terminal	Industrial	Observed a large oil tank on the property. An oil tanker truck also came at time of site reconnaissance.
Northeast	Walgreens	Retail	To the Northeast of the subject property is the parking lot for the Walgreens that is directly East.
Southeast	LIRR		There is a fenced off, secured area beneath the elevated railway that is reserved for the Long Island Railroad. It is noted as "LIRR ENGINEERING DEPT. STRUCTURES AMITYVILLE YARD".
Northwest	First Choice Auto Body & Auto Sales Inc	Commercial	The area Northwest of the Subject Property is an attached parking lot for Firestone and First Choice Auto Body & Auto Sales Inc, which are both found to the North of the Subject Property.
Southwest	Extra Space Storage	Commercial	Large, 3 story brick building used as self storage facility.

6.0 SITE RECONNAISSANCE

The subject property reconnaissance consisted of field observations of the subject property and adjoining land areas by JLC personnel experienced in environmental site assessments. JLC observed and documented current uses of the subject property and indicators of hazardous substances, petroleum products, storage tanks, odors, pools of liquid, drums, containers, polychlorinated biphenyls (PCBs), heating and cooling systems, stains, corrosion, drains and sumps, pits, ponds, lagoons, stressed vegetation, wastes, wells, and septic systems.

The reconnaissance was performed on foot within areas that were reasonably accessible and at JLC's discretion by automobile along publicly accessible roads. Site reconnaissance was performed systematically to characterize on-site conditions and assess the site's location with respect to surrounding property uses and natural surface features. In addition, JLC conducted a reconnaissance of the surrounding roads and readily accessible adjacent properties to identify obvious potential environmental conditions on neighboring properties. Photographs taken as part of the site reconnaissance are provided in Appendix A.

Reasonable attempts were made to interview key people familiar with the property to obtain information on present and previous ON-SITE-site activities potentially resulting in the environmental degradation of the site or adjoining properties. No person familiar with the property could be interviewed to obtain further information. The subject property reconnaissance occurred October 4, 2024 and November 23, 2024. On October 2, 2024, the weather at the time of the site visit was sunny with an approximate temperature of 64°F. On November 23, 2024 the weather was partly sunny with an approximate temperature of 47°F.

Reasonable attempts were also made to interview people familiar with the property to obtain information on present and previous OFF-SITE activities potentially resulting in the environmental degradation of the site or adjoining properties. The subject property reconnaissance consisted of field observations of the adjoining land areas. JLC personnel observed and documented any indicators of hazardous substances, petroleum products, storage tanks, odors, pools of liquid, drums, containers, polychlorinated biphenyls (PCBs), heating and cooling systems, stains, corrosion, drains and sumps, pits, ponds, lagoons, stressed vegetation, wastes, wells, and septic systems if noted.

6.1 Methodology and Limiting Conditions

JLC personnel visually and physically observed areas of the subject property and created photographic documentation of field site conditions. The periphery of the subject property was visually and physically observed as well. The subject property was viewed from adjacent public thoroughfares. The retail interiors of the structure used by the public were visually assessed but JLC was unable to observe any other areas of the structure including 2nd floor residences and any maintenance areas due to lack of access.

6.2 General Subject Property Setting

The subject property setting consists of a rectangular shaped parcel of land totaling approximately 10,400 Square Feet (0.238 acres) on the West side of Broadway (AKA Route 110) in the village of Amityville, Town of Babylon, New York in Suffolk County. This is a suburban village characterized by commercial mixed used businesses surrounded by residential development and an historically designated area to the South of the subject property. The EDR report indicated the subject property is 20 feet above sea level in an area zoned as Retail Business District.

6.3 Site Visit Findings

During the site visits to the subject property, typical exterior building conditions were observed. Limited interior access was available during the site visits conducted on October 4, 2024 and November 23, 2024. The building was found to be in good condition.

Other		

6.3.1 Hazardous Substances

JLC Environmental personnel found no evidence of any hazardous substances present on site during the reconnaissance of the Subject Property.

6.3.2 Petroleum Products

JLC personnel found no evidence of the presence of petroleum products during the inspection of the subject property.

6.3.3 Underground Storage Tanks (USTs)

JLC Environmental personnel found no evidence of any USTs present on site during the reconnaissance of the Subject Property.

6.3.4 Aboveground Storage Tanks (ASTs)

JLC Environmental personnel found no evidence of any ASTs present on site during the reconnaissance of the Subject Property.

6.3.5 Strong, Pungent, or Noxious Odors

JLC Environmental personnel found no evidence of any strong, pungent or noxious odors present on site during the reconnaissance of the Subject Property.

6.3.6 Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products

JLC personnel found no evidence of any standing surface water, pools or sumps containing liquids likely to be Hazardous Substances or Petroleum products present on site during the reconnaissance of the Subject Property.

6.3.7 Drums, Totes, and Intermediate Bulk Containers

JLC personnel found no evidence of the presence of drums, totes or intermediate bulk containers during the inspection of the subject property.

6.3.8 Hazardous Substance and Petroleum Product Containers Not in Connection With Identified Uses

JLC personnel found no evidence of any hazardous substances or petroleum product containers not in connection with identified uses present on site during the reconnaissance of the Subject Property. The building interior was inaccessible at the time of inspection, therefore the presence of these items within the buildings interior not inspected could not be determined at this time. When access to the building is provided, these items, should they be present, should be reported to JLC immediately and this report can be updated to reflect the new information available.

6.3.9 Unidentified Substance Containers

JLC Environmental personnel found no evidence of any drums, totes and intermediate bulk containers on site during the reconnaissance of the Subject Property.

6.3.10 PCB-Containing Items

JLC Environmental personnel found no evidence of any PCB containing items on site during the reconnaissance of the Subject Property.

6.3.11 Stains or Corrosion on Floors, Walls, or Ceilings

JLC Environmental personnel found no evidence of any stains or corrosion on floors, walls or ceilings on site during the reconnaissance of the Subject Property.

6.3.12 Drains and Sumps

JLC Environmental personnel found no evidence of any drains or sumps on site during the reconnaissance of the Subject Property.

6.3.13 Pits, Ponds, or Lagoons

JLC Environmental personnel found no evidence of any pits, ponds or lagoons on site during the reconnaissance of the Subject Property.

6.3.14 Solid Waste

Solid waste disposal services for the subject property are assumed to be provided by a private solid waste hauler associated with the subject property typical of other businesses in the vicinity. At the date of publication of this report, that information was not provided.

6.3.15 Stained Soil or Pavement

JLC found no evidence of the presence of stained soil or pavement during the inspection of the subject property.

6.3.16 Stressed Vegetation

There were no observations of stressed vegetation at the subject property at the time of the initial site visit and inspection.

6.3.17 Wells

JLC found no evidence of the presence of wells during the inspection of the subject property.

7.0 RECORDS REVIEW

The records review consists of government environmental records and historical use records.

7.1 Standard Environmental Record Resources

The Review of records for the work performed followed general conformance with the ASTM E1527-21 document *Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process.* The Phase I ESA consisted of a historical review of the subject property and area use, regulatory database review, assessment of the physical setting, subject property and area reconnaissance, and a report of JLC's findings, opinions, conclusions, and recommendations. The table indicates surrounding properties that were noted to have had past environmental findings in the record review process.

Map Findings Summary								
Database	**Subject Property**	**Search Distance (Miles)**	**< 1/8**	**1/8 - 1/4**	**1/4 - 1/2**	**1/2 - 1**	**> 1**	**Total Plotted**

TANKS		0.25	3	0	NR	NR	NR	3

7.2 Additional Environmental Record Resources

Reasonable attempts were made to obtain information based on present and previous on-site activities potentially resulting in the environmental degradation of the site or adjoining properties. In addition to the records obtained via Lightbox/EDR, The Village of Amityville Buildings Department was contacted to obtain the zoning map for the Village of Amityville. The Suffolk County Geographic Information System (GIS) database was also accessed to gather additional information about the subject property and surrounding environs.

7.3 Physical Setting

Physical characteristics refer to the tangible and observable features of a property that can influence its value and marketability.

7.3.1 Topography

The information on the topographic and radius maps provided in the historical site data indicates that there is a downward slope to the south of the property and that the sites surrounding the property are at an elevation that is higher than or equal to the subject property. The site sits at an approximate elevation of 21 feet above mean sea level based on the site map. Observation of the subject property topography corresponded with information presented on the topographic map.

7.3.2 Surface Water Bodies

JLC screened the subject property for the presence of surface water bodies and/or suspect wetlands during the site reconnaissance and by viewing the U.S. Department of the Interior, Fish and Wildlife Service, National Wetlands Inventory viewer online, and the most recently available topographic map. A wetland delineation was beyond the scope of this assessment. Review of the Wetland Inventory Map and topographic map indicates the subject property is approximately .25 miles from a Public Freshwater Pond (PubAx) and Riverine Habits (R2UBH and R4SBC) to the west and a Freshwater pond (PusAx)approximately .25 miles to the west of the subject property.

The subject property itself is not in an area mapped as a potential wetlands area and there are no mapped bodies of water present on the subject property that are indicative of possible wetlands. JLC notes that the Wetlands Inventory Map is prepared through the analysis of aerial photography and not by actual ground reconnaissance. It is normally used as a screening method to assess if potential wetlands areas exist in a given area. During JLC's site reconnaissance, suspect wetlands areas were not observed or reported at the subject property. JLC notes that the Environmental Professional who performed the site reconnaissance is not a specialist trained in wetlands delineation. No further assessment is recommended.

7.3.3 Geology and Hydrology

JLC consulted the report entitled "*Geology of the "20-Foot" Clay and Gardiners Clay in Southern Nassau and Southwester Suffolk Counties, Long Island, NY*" by Thomas P. Doriski and Franceska Wilde-Katz of the U.S. Geological Survey (USGS), Water-Resources Investigations Report 82-4056 dated 1983. Long Island, and specifically Southern Nassau County and adjacent Southwestern Suffolk County, are on Long Island's outwash plain. This plain extends about 10 miles Southward from the Ronkonkoma and Harbor Hill terminal moraines to the South shore. The South shore is characterized by swamps and lagoons bordering Great South Bay, which is in turn contained by the South-shore barrier islands. Long Island is underlain by a thick sequence of unconsolidated Cretaceous and Pleistocene sediments extending from land surface to crystalline bedrock. These sediments contain the ground-water reservoir, the only source of freshwater for Nassau and Suffolk Counties. Along the South shore, the upper part of this sequence contains the two confining layers that were studied in detail in the "20-foot" Clay and Gardiners Clay report. The report notes that geology of the South shore of Long Island is composed of stratified layers of sand, clay/clayey sand, silt and gravel. The water table in the general vicinity of the Subject Property is close to the surface but varies depending on the amount of outside fill that may have been used in original construction.

7.4 Historical Use

7.4.1 Historical Summary

Information Missing - enter data or select from Default Language.

7.4.2 City Directories

Based on information provided in the city directory report going back to 1971, the subject property was occupied by the following business establishments:

2020 - Broadway Convenience / (2 individuals are listed) / B & B / Al's Cycle Center
2017 - Broadway Convenience, Firestone Complete Auto Care / (2 individuals are listed) / Amityville Construction Co, B & B, Honesty Insurance / Al's Cycle Center
2014 - Broadway Convenience / (1 individual is listed) / Honesty Insurance / Al's Cycle Center
2010 - Broadway Convenience / (1 individual is listed) / Honesty Insurance / Al's Cycle Center
2005 - **N/A** / Deborah's Collectables & Disaster Relief (4 individuals are also listed) / Honesty Insurance / Al's Cycle Center

2000 - Chen's Universal Corporation, Paul's Amity Stationers (1 individual is also listed) / (4 individuals are listed) / Honesty Insurance / Al's Cycle Center
1995 - Chen's Universal Corporation, Paul's Amity Stationers / **N/A** / Honesty Insurance / Al's Cycle Center
1992 - Amity Commercial Stationery, Paul's Amity Stationers / (2 individuals are listed) / **N/A** / Al's Cycle Center
1987 - Amity Commercial Stationery, Paul's Amity Stationers / (2 individuals are listed) / **N/A** / Al's Cycle Center
1982 - Paul's Amity Stationers / (3 individuals are listed) / Less Beauty Salon / Al's Cycle Center
1976 - Paul's Amity Stationers / (1 individual is listed) / Less Beauty Salon / **N/A**
1971 - Amity Stationery / (1 individual is listed) / Less Beauty Salon / EMC Corp

** Any instances labeled "**N/A**" could not be found in the directory*

7.4.3 Aerial Photos

Aerial photos can provide visual evidence of what was present on and around the property at a given time. Aerial photos through time can show both large scale regional changes and with the right photo scale and clarity, small scale changes on the property or on surrounding properties. Aerial photo were reviewed by the assessor and are included here for the record.

7.4.4 Sanborn/Historical Maps

The Sanborn map collection consists of a uniform series of large-scale maps that date as far back in time as 1867. These historical maps depict the commercial, industrial, and residential sections of some twelve thousand cities and towns in the United States, Canada, and Mexico. Sanborn Maps were created by the Sanborn Map Fire Insurance Company for fire insurance purposes but eventually fell out of use in the 1960s. The license for the maps was acquired by land data company Environmental Data Resources (EDR). EDR was later acquired by real estate services company LightBox in 2019. The maps continue to used in ESAs to provide very detailed information about a property. They provide needed information such as building outlines, size and shape, construction materials, height, building use, windows and doors, street and sidewalk widths, property boundaries and house numbers. See attached Sanborn maps for the subject property for further information.

7.4.5 Historical Topographic Maps

To assess the physical setting of the subject property, JLC obtained and reviewed reasonably ascertainable published subject property information to characterize the physical setting of the subject property. JLC reviewed the current *USGS 7.5 Minute Topographic Map* showing the area on which the subject property is located. JLC reviewed one or more physical setting sources at the discretion of the environmental professional to obtain information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of the subject property. Discretionary physical setting sources may have been sought if (1) conditions had been identified in which hazardous substances or petroleum products in any form including vapor, are likely to be present on-site or to migrate to the subject property from off-site sources and (2) more information is generally obtained, pursuant to local good commercial or customary practice. The topographical maps documentation data provided by EDR in regards to the subject property can be found in the accompanying Historical Topographical Maps table.

2016	Amityville		
2019	Amityville		

7.4.6 Previous Environmental Reports

JLC was not provided any previous environmental reports for the subject property.

7.5 Environmental Liens and Activity/Use Limitations

No information regarding environmental liens, Activity Use Limitation (AULs), or governmental notification relating to past or recurrent violations of environmental laws with respect to the subject property was reported to JLC by Client or its representative. JLC was not provided with a copy of the 2020 Preliminary Commitment for Title Insurance Document. No environmental liens or AULs were indicated.

7.6 Vapor Encroachment Evaluation

The goal of conducting a vapor encroachment study (VES) is to identify a vapor encroachment condition (VEC) which is defined as the presence, or likely presence of chemicals of concern (COC) vapors in the sub-surface of the subject property. The results of the ESA Phase I historical review did not indicate any vapor encroachment evaluation that may have been undertaken at the subject property previously. Review of the environmental records associated with this subject property do not indicate the need for a vapor encroachment evaluation be undertaken at the current time.

8.0 INTERVIEWS

JLC researched the current ownership information for the subject property prior to completion of the report. The records indicate that Reyansh Realty USA, Inc. owns the property. JLC was unable to find any contact information about the owner to interview them about the property. As of the completion date of this Phase I, no Key Site Manager interview was conducted. As noted in section 2.2, no User Questionnaire was submitted by our client or the Owner to help the environmental professionals identify recognized environmental conditions at the subject property and to fulfill the Environmental Protection Agency's requirements for "All Appropriate Inquires" into the subject property.

9.0 NON-SCOPE CONSIDERATIONS

Two non-scope items were requested to be provided to our client which are not part of this Phase I ESA. A report for Asbestos Containing Materials (ACM) and Lead Based Paint (LPB) were provided to the client under separate cover.

Asbestos-Containing Building Materials

An ACM inspection was conducted on the exterior facade based on the beautification scope of work planned for the subject property. The interior of the structure was not inspected due to lack of access and that the interior was not part of the scope of work. The ACM report was conducted under a separate work order and submitted to the client but is not part of the ESA report.

Lead-Based Paint

A Lead Based Paint (LBP) inspection and LBP Risk Assessment was conducted on the exterior facade and surrounding exterior based on the beautification scope of work planned for the subject property. The interior of the structure was not inspected due to lack of access and as well as the fact that the interior was not part of the scope of work. The LBP report was conducted under a separate work order and submitted to the client but is not part of the ESA report

10.0 FINDINGS AND OPINIONS

Based upon the information obtained, as reflected in this report, this assessment has preliminarily revealed no evidence of *recognized environmental conditions, controlled recognized environmental conditions,* or *historical recognized environmental conditions* in connection with the subject property. JLC did find evidence of a *recognized environmental condition and an historical recognized environmental condition on the adjacent property directly to the west of the subject property* an (OK Petroleum Terminal). Based on the scope of work that prompted the requirement for a Phase 1 ESA, the east facade restoration of the subject property, no further assessment is recommended.

11.0 CONCLUSIONS

JLC has performed a Phase I ESA of the Commercial Building, located at 250-256 Broadway, Amityville, NY, in general conformance with the scope and limitations of ASTM Practice E1527-21. Exceptions to, or deletions from, this practice are described in Section 3.0 of this report.

Based upon the information obtained, as reflected in this report, this assessment has preliminarily revealed no evidence of *recognized environmental conditions, controlled recognized environmental conditions,* or *historical recognized environmental conditions* in connection with the subject property. JLC did find evidence of a *recognized environmental condition and an historical recognized environmental condition on the adjacent property directly to the west of the subject property* an (OK Petroleum Terminal). Based on the scope of work that prompted the requirement for a Phase 1 ESA, the east facade restoration of the subject property, no further assessment is recommended.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by JLC Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel information and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and present
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

party of the second part,
WITNESSETH, that the party of the first part, in consideration of TEN DOLLARS ($10.00) and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, lying and being in the
SEE SCHEDULE "A" ATTACHED HERETO AND MADE A PART HEREOF

This conveyance is made with the unanimous written consent of the shareholders of Encee Corporation.

BEING AND INTENDED TO BE AS FOLLOWS:
Parcel 1: The premises herein described are and are intended to be the same as those described (or conveyed to Encee Corporation) in deed dated 12/30/1957, recorded 5/5/1958 in Liber 4456, Page 70.

Parcel 2: The premises herein described are and are intended to be the same as those described (or conveyed to Ernest V. Caramanico and Anita Caramanico, his wife) in deed dated 12/27/1979, recorded 2/1/1980 in Liber 8773, Page 5.

Parcel 3: The premises herein described are and are intended to be the same as those described (or conveyed to Ernest D. Caramanico) in deed dated 4/8/1985, recorded 4/30/1985 in Liber 9780, Page 344.

Parcel 4: The premises herein described are and are intended to be the same as those described (or conveyed to Ernest V. Caramanico and Anita Caramanico, his wife) in deed dated 3/22/1988, recorded 3/31/1988 in Liber 10573, Page 364.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof,
TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises,
TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose. The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

party of the second part,
WITNESSETH, that the party of the first part, in consideration of TEN DOLLARS ($10.00) and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, lying and being in the
SEE SCHEDULE "A" ATTACHED HERETO AND MADE A PART HEREOF

This conveyance is made with the unanimous written consent of the shareholders of Encee Corporation.

BEING AND INTENDED TO BE AS FOLLOWS:
Parcel 1: The premises herein described are and are intended to be the same as those described (or conveyed to Encee Corporation) in deed dated 12/30/1957, recorded 5/5/1958 in Liber 4456, Page 70.

Parcel 2: The premises herein described are and are intended to be the same as those described (or conveyed to Ernest V. Caramanico and Anita Caramanico, his wife) in deed dated 12/27/1979, recorded 2/1/1980 in Liber 8773, Page 5.

Parcel 3: The premises herein described are and are intended to be the same as those described (or conveyed to Ernest D. Caramanico) in deed dated 4/8/1985, recorded 4/30/1985 in Liber 9780, Page 344.

Parcel 4: The premises herein described are and are intended to be the same as those described (or conveyed to Ernest V. Caramanico and Anita Caramanico, his wife) in deed dated 3/22/1988, recorded 3/31/1988 in Liber 10573, Page 364.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof,
TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises,
TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose. The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

IN THE PRESENCE OF:

Bruce Kennedy

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal Delisted NPL sites

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 09/25/2024 has revealed that there is 1 Delisted NPL site within approximately 1 mile of the target property.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 09/25/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/25/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/01/2024 has revealed that there is 1

NY SHWS site within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 07/30/2024 has revealed that there are 13 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 28 NY UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 07/30/2024 has revealed that there are 13 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 16 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/01/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 7 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D000
Waste Description:	Not Defined
Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

ROCKWORTH TRANSMISSIONS DBA COUNTRYLINE (Continued) **1000994416**

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

DEC Memo:	10/5/2021 1045hrs: DEC inspectors observed spill at fill ports. DEC inspectors initiated unannounced inspection of the PBS facility; Inspection #82433. Facility Manager claimed human error in spill at fill port. Spill contained on concrete in the truck transfer containment. Speedi-dry was being transported to the facility from another facility to start clean-up. DWT: 15ft. BK 10/5/2021 1145hrs: Observed speedi-dry being applied to spill and clean-up initiated. BK 10/25/2021 1127hrs: BK onsite. Spill has been cleaned up. BK 12/20/2021 1531hrs: Less than one bag of speedy-dry was used and doubled bagged and disposed of in garbage, according to the facility operator. BK ***04/25/2022 1240hrs: Spill cleaned up by facility. Less than 1 bag of speedy-dry used to clean up surface spill at fill port. No further action required. BK
Remarks:	Unannounced inspection observed spill at facility

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Tiger Fuels is excavating contaminated soils and will call for DEC inspection. 9/21/06 TJD onsite 0830-0915 Site inspection. Tiger fuels excavated contaminated soils in vicinity of reported equipment failure. Open excavation - soils scraped to varying depth ranging from 6 to 24 inches bgs. Excavation dimension approximately 12x15ft. Remaining soils appeared free of residual petoleum impacts based upon visual and olfactory screening. Awaiting closure documentation. 9/4/07 TJD File review. Bluewater contacted directly for copy of disposal documentation. Manifest and weight ticket in file. No further action required.
Remarks:	DEC received an anonomous report of spill @terminal. Upon investigation and interview with Wayne @Tiger Fuels an unreported surface spill was discovered at rear of property in south west corner. Tiger Fuel representative states a hose blew causing

ALCUS TERMINAL (Continued) **S106968558**

discharge.

DEC Memo:	Tiger Fuels is excavating contaminated soils and will call for DEC inspection. 9/21/06 TJD onsite 0830-0915 Site inspection. Tiger fuels excavated contaminated soils in vicinity of reported equipment failure. Open excavation - soils scraped to varying depth ranging from 6 to 24 inches bgs. Excavation dimension approximately 12x15ft. Remaining soils appeared free of residual petoleum impacts based upon visual and olfactory screening. Awaiting closure documentation. 9/4/07 TJD File review. Bluewater contacted directly for copy of disposal documentation. Manifest and weight ticket in file. No further action required.
Remarks:	DEC received an anonomous report of spill @terminal. Upon investigation and interview with Wayne @Tiger Fuels an unreported surface spill was discovered at rear of property in south west corner. Tiger Fuel representative states a hose blew causing discharge.

DEC Memo:	NO CALLS 12/27/07 TJD Site inspection. Citizen complaint regarding contaminated soils. Yard was inspected and found to be free of visible petroleum contamination. Construction is dirt/stone. Contacted owner Jim Alcus he states no spills have occurred at his facility since previous DEC contact he recently performed some regrading and pothole repair but states no petroleum contaminated soils were generated from work. Housekeeping has improved since previous DEC Inspection. Mr. Alcus was reminded of DEC spill reporting requirements. No evidence of a spill was found during inspection. 2/1/08 TJD File review. No further action required.
Remarks:	CALLER NOTICES NEIGHBORING FUEL COMPANY DIGGING UP CONTAMINATED DIRT AND LOADING IT INTO A DUMP TRUCK. CALLER DOES NOT WANT TO BE CONTACTED - THERE IS AN ONGOING FEUD BETWEEN RIVAL OIL COMPANIES

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	9/17/08 - 2 of 5 wells with detectable levels of BTEX (2 and 72 ppb). All others ND. Soil samples also were either ND or showed trace levels of contamination. NFA. - CE
Remarks:	Per caller, MEG was retained in August 2008 to determine extent of the soil and groundwater contamination at the subject site. On August 2008, MEG installed five (5) 1 inch diameter wells to 16 feet below grade with a direct push unit. Groundwater contaminants exceeded the NYSDEC TAGN and Ambient Water Quality Guidance Values in three (3) of the five (5) wells. Caller wants to notify NYSDEC of the impacted subsurface conditions. (WG)

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D011
Waste Description: Silver

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis)

ACTION ANODIZING, PLATING, & POLISHING CORP. (Continued) **1000259304**

On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F019
Waste Description: Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.

FINDS:
Registry ID: 110070339318

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.
Registry ID: 110009323687

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.
Registry ID: 110000808145

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

ACTION ANODIZING, PLATING, & POLISHING CORP. (Continued) **1000259304**

types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

ACTION ANODIZING PLATING&POLISHING CORP. (Continued) **S118950609**

Record Upd: 04/16/2008
Updated By: JBSWARTO
Site Description: "Action Anodizing, Plating and Polishing Corp. (AAPP) has continuously operated at this site since 1968. AAPP's anodizing process included cleaning, sealing, and at times, dyeing of aluminum parts and cadmium plating. Prior to 1982, high concentrations of heavy metals including cadmium at 1900 ppm, chromium at 790 ppm, iron at 910 ppm and lead at 43 ppm were discharged to at least six underground pools. Wastewater samples from leaching pools demonstrated concentrations of heavy metals exceeding acceptable limits set as groundwater standards. Data is not available for estimating the amount of wastewater that was discharged. One public wellfield is within one mile of the site. Soil samples from the site contained 680 ppm and 640 ppm of chromium and cadmium, respectively. These concentrations exceeded soil cleanup guidelines. In 1981 the Suffolk County Department of Health Services (SCDHS) ordered AAPP to clean out and backfill the leaching system. The site was added to the National Priorities List (NPL) and a Remedial Investigation (RI) was performed. The results of the RI indicate that the actions taken in 1981 by the SCDHS were sufficient and that no further action was required. A No Further Action ROD which called for a one-year monitoring program was signed on June 19, 1992. Two rounds of groundwater sampling showed no presence of contaminants above acceptable standards. The site was deleted from the NPL on September 29, 1995. The site was delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State in April 2008."
Env Problem: "Two rounds of groundwater sampling showed no presence of contaminants above acceptable standards. The site was deleted from the NPL on September 29, 1995. The leaching system has been cleaned out and backfilled. It has been determined that the site does not pose a significant threat."
Health Problem: "Contaminated soils have been remediated, and routine monitoring of the public water supply wells show compliance with drinking water standards, thereby indicating that site does not currently pose a public health threat."

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

Date of Government Version: 06/08/2023
Date Data Arrived at EDR: 10/31/2023

Data Release Frequency: Semi-Annually

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Target Property Map:	14115936 AMITYVILLE, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

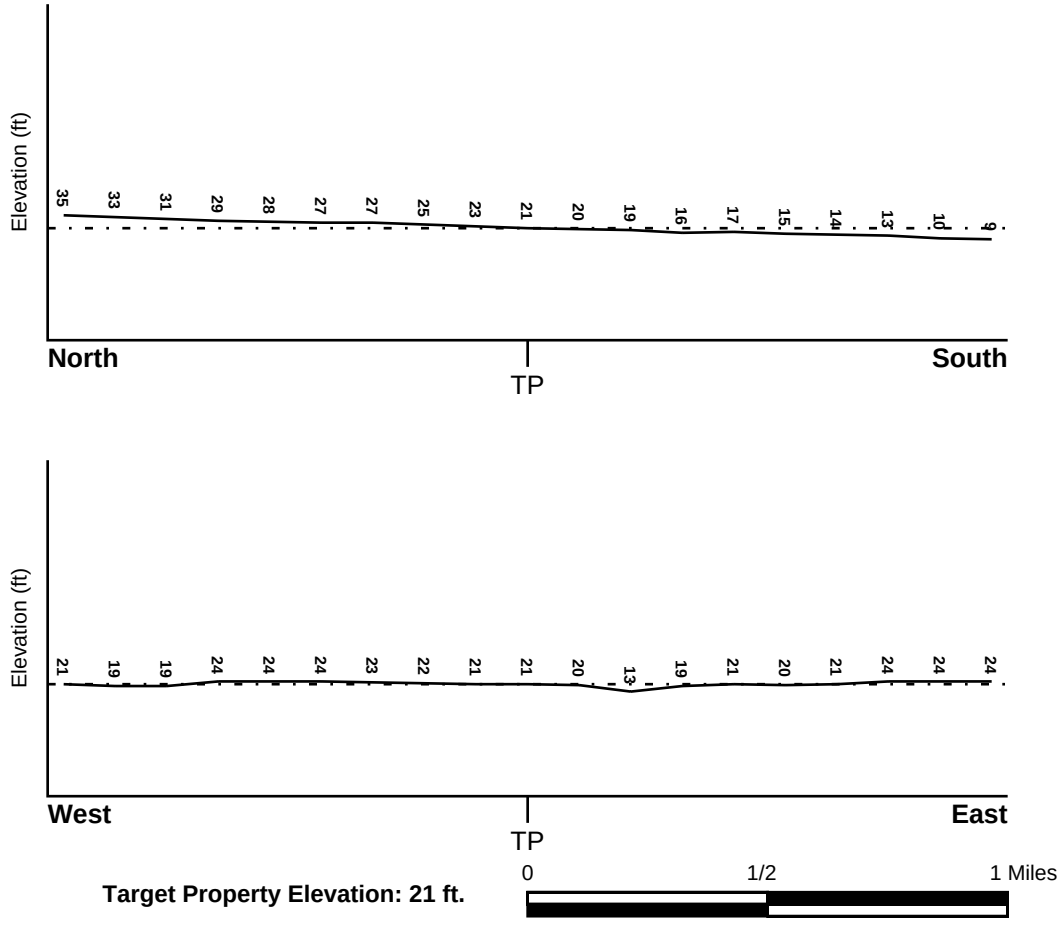
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

AMITYVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile North
Site Name:	Action Anodizing, Plating, And
Site EPA ID Number:	NYD072366453
Groundwater Flow Direction:	S ON A REGIONAL BASIS.
Measured Depth to Water:	approximately 10 feet to 15 feet in both the surficial and lower aquifers.
Hydraulic Connection:	A very low downward gradient from the surficial to the lower aquifer has been identified, along with a very low upward gradient from the lower aquifer to the surficial aquifer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Haven

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
2	11 inches	18 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
3	18 inches	27 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
4	27 inches	59 inches	stratified gravelly sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5

Soil Map ID: 3

Soil Component Name: Fill land

Soil Surface Texture: loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Organization ID:	USGS-NY	Organization Name:	USGS New York Water Science Center
Monitor Location:	S 1239. 1	Type:	Well
Description:	Not Reported	HUC:	02030202
Drainage Area:	Not Reported	Drainage Area Units:	Not Reported
Contrib Drainage Area:	Not Reported	Contrib Drainage Area Unts:	Not Reported
Aquifer:	Northern Atlantic Coastal Plain aquifer system		
Formation Type:	Glacial Aquifer, Upper	Aquifer Type:	Not Reported
Construction Date:	Not Reported	Well Depth:	42
Well Depth Units:	ft	Well Hole Depth:	Not Reported
Well Hole Depth Units:	Not Reported		

Ground water levels,Number of Measurements:	237	Level reading date:	1986-01-02
Feet below surface:	Not Reported	Feet to sea level:	12.61
Note:	Not Reported

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 9 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
GRECO & GANLY SERVIC 250 BROADWAY AMITYVILLE, NY 11701	EDR Hist Auto	N/A

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal Delisted NPL sites

Delisted NPL: A review of the Delisted NPL list, as provided by EDR, and dated 09/25/2024 has revealed that there is 1 Delisted NPL site within approximately 1 mile of the target property.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

BROADWAY CONVENIENCE-FIRESTONE
250-256 BROADWAY
AMITYVILLE, NY 11701

TARGET PROPERTY COORDINATES

Latitude (North):	40.681069 - 40° 40' 51.85''
Longitude (West):	73.417106 - 73° 25' 1.58''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	633769.6
UTM Y (Meters):	4504347.0
Elevation:	21 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14115936 AMITYVILLE, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

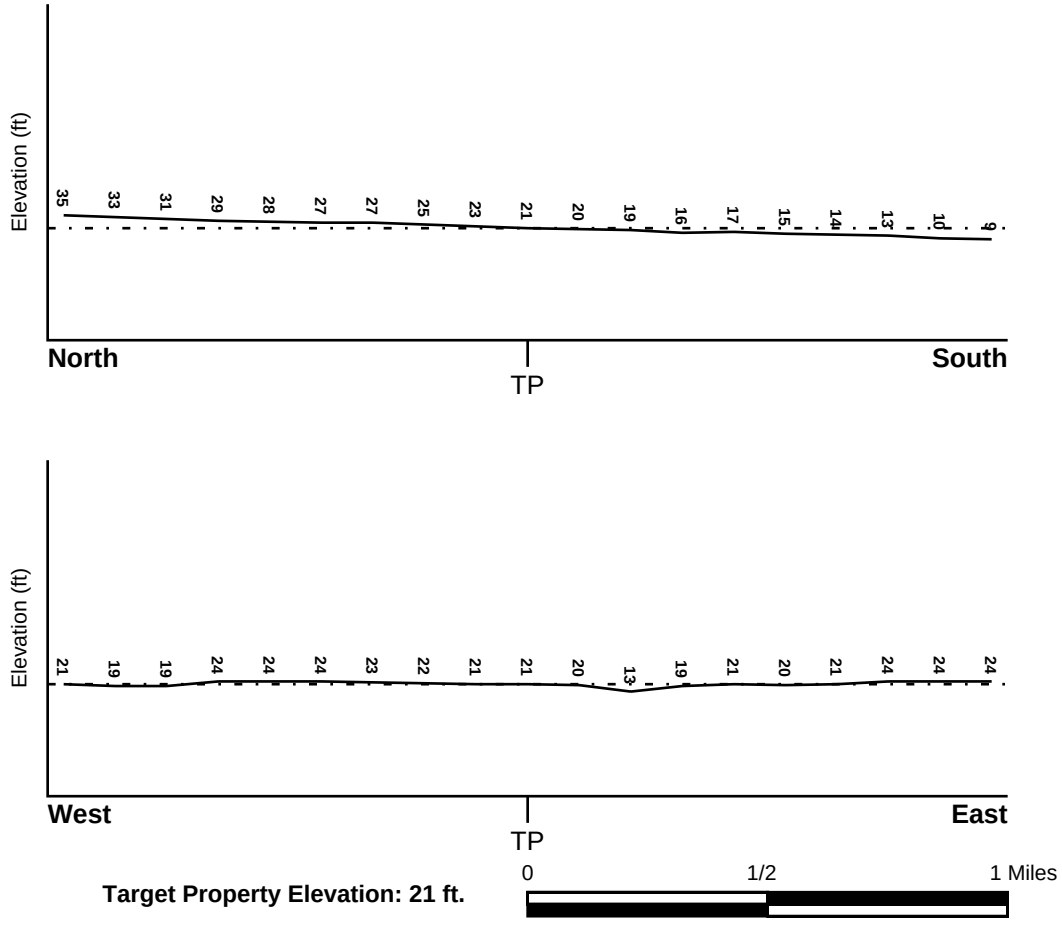
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
AMITYVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile North
Site Name:	Action Anodizing, Plating, And
Site EPA ID Number:	NYD072366453
Groundwater Flow Direction:	S ON A REGIONAL BASIS.
Measured Depth to Water:	approximately 10 feet to 15 feet in both the surficial and lower aquifers.
Hydraulic Connection:	A very low downward gradient from the surficial to the lower aquifer has been identified, along with a very low upward gradient from the lower aquifer to the surficial aquifer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Haven

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
2	11 inches	18 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
3	18 inches	27 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
4	27 inches	59 inches	stratified gravelly sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5

Soil Map ID: 3

Soil Component Name: Fill land

Soil Surface Texture: loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

RELIANCE LETTER

May 30, 2025

IMEG
177 Crossways Park Drive
Woodbury, NY 11797
Attention: David Tepper

RE: Phase I Environmental Site Assessment Report, dated May 30, 2025
JLC Project No. 24-7877 | Prepared by Jennifer Carey

- Consultant: JLC Environmental Consultants, Inc.
- Property Name: Amityville Firestone
- Site Address: 258 Broadway, Amityville, NY 11701

To Whom it May Concern:

This is to certify that I, Jennifer Carey (Environmental Professional), have reviewed the existing documentation and provided site observations of the property and building located at 258 Broadway, Amityville, NY 11701 for the purpose of identifying and assessing any environmental conditions which would impact the safe occupancy of the Site and the research of historical data pertaining to the land use and possible hazardous pre-existing conditions.

The Site observations and document research contained in the Environmental Site Assessment (Phase I) Report dated May 30, 2025, was performed by Jennifer Carey in conformance with the scope and limitations of ASTM Standard Practice E1527-21.

Environmental Professional certifies that (1) to the best of her knowledge, Environmental Professional is independent of and not a representative, nor an employee or affiliate of seller, borrower, operating company, or any person in which seller has an ownership interest; and (2) the Environmental Professional has not been unduly influenced by any person with regard to the preparation of the Environmental Investigation or the contents thereof.

Based upon the information obtained, as reflected in this report, this assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or historical recognized environmental conditions in connection with the subject property. No further assessment is recommended.

Sincerely,
JLC Environmental Consultants, Inc.

Jennifer Carey
Environmental Investigator

Certification:

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.
Based upon the information obtained, as reflected in this report, this assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or historical recognized environmental conditions in connection with the subject property. No further assessment is recommended.

This report has not been signed.

2.0 EXECUTIVE SUMMARY

IMEG engaged JLC Environmental Consultants, Inc. (JLC) to perform a Phase I Environmental Site Assessment and additional services for the mixed use property located at 258 Broadway, in the village of Amityville, Town of Babylon, Suffolk County, New York (the "subject property"). The purpose of a Phase I ESA is to identify *recognized environmental conditions* in connection with the subject property. As defined by ASTM E1527-21, "The term *recognized environmental conditions* means the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property:* (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*."

The subject property is a rectangular-shaped parcel of land totaling .238 acres. The land was developed with a two-story high brick mixed use building consisting of approximately 4,000 square feet and has a commercial business on the ground floor and residential apartments on the 2nd floor. The building in its current form was reportedly developed in 1992. The subject property was located in an area characterized by commercial businesses with residential and historic districts nearby. Uses prior to the current development are noted in Section 7.4.

Based on the information obtained to date, JLC's conclusions and recommendations are as follows:

- The results of JLC's review of regulatory agency information about the subject property and the area reconnaissance performed indicates an *historical recognized environmental condition* associated with subject property. When reviewing the surrounding land use JLC also found a *recognized environmental condition and historical recognized environmental condition* associated with property directly to the west of the subject property (OK Petroleum Terminal).

- JLC conducted additional services in accordance with the proposed scope of work, including the assessment of those enumerated in Section 9.0.

The findings and opinions presented herein are relative to the dates the work was conducted and should not be relied on to represent conditions at later dates. The opinions included herein are based on information obtained during the assessment and JLC's experience. If additional information becomes available that may impact JLC's environmental assessment findings, JLC requests the opportunity to review the information, reassess the potential concerns, and modify JLC's opinions, if warranted.

2.1 Subject Property Description

The subject property site is located on Broadway (New York State Route 110) between Sterling Place and Mill Street in the village of Amityville within the Town of Babylon, Suffolk County, NY. The subject property is located in the retail business district and is comprised of an irregular-shaped parcel of land totaling .238 acres (approximately 10,300 square feet). The subject property consists of a two-story brick structure with a foot print of approximately 4,000 SF brick structure and one (1) additional small, one-story brick building (formerly Lindy's Taxi) with a storage shed attached to the rear. This smaller structure is currently a vacant residential apartment. Paved parking areas comprise the remaining area of the parcel.

The zoning for this property is currently "B-1 Retail Business District". A review of topographic and Sanborn maps indicates that the Subject Property was developed with some type of building structure since at least 1897. Since that time, historical records indicate the subject property has been occupied by a variety of commercial and residential tenants. It was originally developed, typical occupants of the space include business such as: general store, hardware store, harness shop, undertaker and auto repair shop along with various other businesses throughout the years.

The current use of the subject property is mixed use. The ground floor of the building is a commercial establishment known as Amityville Firestone, a full-service auto repair and tire shop business. There are three (3) residential apartment units located on on the second floor. The additional structure on the property is a one story, approximately 500 square foot vacant apartment unit.

2.2 Data Gaps

Data gaps are defined as a lack of or inability to obtain information required by ASTM E1527-21 despite good faith efforts. Significant data gaps that affected the ability of the environmental professional to identify *recognized environmental conditions* were not identified. Deviations or deletions from the scope of work defined by ASTM E1527-21 were not intentionally made. JLC's professional services have been performed using the degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants undertaking similar studies and practicing in this locality during the same timeframe. No other warranty, expressed or implied, is intended or made with respect to this report or JLC's services. This assessment was not exhaustive and Users of this report should consider the scope and limitations related to these services when developing opinions as to risks associated with the subject property.

This report presents an assessment of the subject property as defined by information provided by the Client and Client's representative. JLC's findings, opinions, conclusions, and recommendations are based on the locations and boundaries of the subject property as evident in the field and on information provided by the Client. The data gaps noted during the course of the Phase I ESA were: 1) no Key Site Manager available to interview; 2) no User Questionnaire was completed by current owner. A User Questionnaire is important as it can sometimes provide crucial information for the assessment.

This assessment included visual observations to identify obvious features or conditions indicative of *recognized environmental conditions*. Although this assessment has attempted to identify *recognized environmental conditions*, JLC cannot eliminate all uncertainty as to *recognized environmental conditions* in connection with the subject property nor represent or warrant that the subject property contains no hazardous substances or petroleum products or other latent conditions beyond those identified through the scope of work identified herein. Other features, conditions, and constituents may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information.

Although this assessment has attempted to identify *business environmental risks*, potential *business environmental risks* may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, (5) deliberate concealment of detrimental information, and/or (6) the subjective nature of materiality to the User with respect to *business environmental risks*.

2.3 Environmental Report Summary

JLC has performed a Phase I ESA of the commercial building, located at 258 Broadway, Amityville, NY, in general conformance with the scope and limitations of ASTM Practice E1527-21. Exceptions to, or deletions from, this practice are described in Section 3.0 of this report. Based upon the information obtained, as reflected in this report, this assessment has revealed evidence of an historical recognized environmental conditions in connection with the subject property and a recognized environmental condition and historical recognized environmental condition was found in the adjacent property to the west of the subject property (OK Petroleum Terminal)

3.0 INTRODUCTION

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify *recognized environmental conditions* in connection with the subject property. As defined by ASTM E1527-21, "The term *recognized environmental conditions* means the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property:* (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*."

The term *controlled recognized environmental condition* as defined by ASTM is a "*recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*)."

The term *historical recognized environmental condition* as defined by ASTM is "a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

The term suspect *recognized environmental condition* as used throughout this report is cited from ASTM E1527-21. JLC uses this term for conditions that have a potential to be a *de minimis condition*, a *recognized environmental condition*, a *controlled recognized environmental condition*, or a *historical recognized environmental condition* for the subject property and requires further discussion as presented within the text of this report.

ASTM E1527-21 states that an ESA "meeting or exceeding" this practice and completed less than 180 days prior to the date of acquisition of the *property* or (for transactions not involving an acquisition) the date of the intended transaction, is presumed to be valid if the report is being relied on by the User for whom the assessment was originally prepared. The components of the practice to be completed within 180 days include: interviews, searches for recorded environmental cleanup liens, the regulatory review, site visit and the declaration by the environmental professional responsible for the assessment. The ASTM E1527-21 practice also states that within this 180 day period, if the assessment will be used by a different user than the user for whom the assessment was originally prepared, the subsequent user must also satisfy the User's Responsibilities.

3.1 Purpose

The purpose of a Phase I Environmental Site Assessment (ESA) is to identify *recognized environmental conditions* in connection with the subject property. As defined by ASTM E1527-21, "The term *recognized environmental conditions* means the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property:* (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*."

The Phase I Environmental Site Assessment (ESA) review on this property was conducted to comply with the requirements of the New York State Downtown Revitalization Initiative (DRI). This initiative awarded a grant to the village of Amityville, New York to implement a Commercial Store Front Revitalization Fund to provide grants to renovate building exteriors within the DRI designated area. This ESA was prepared to help the Village of Amityville identify any environmental factors encountered at the project site and to ensure compliance with applicable regulations.

The term *controlled recognized environmental condition* as defined by ASTM is a "*recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*)."

The term *historical recognized environmental condition* as defined by ASTM is "a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

The term suspect *recognized environmental condition* as used throughout this report is cited from ASTM E1527-21. JLC uses this term for conditions that have a potential to be a *de minimis condition*, a *recognized environmental condition*, a *controlled recognized environmental condition*, or a *historical recognized environmental condition* for the subject property and requires further discussion as presented within the text of this report. Section 7.0 summarizes each of the known or suspect *recognized environmental conditions* associated with the subject property. In Section 7.0, JLC presents its opinion of the potential impact a known or suspect *recognized environmental condition* has on the subject property and whether or not the suspect *recognized environmental condition* is currently a *de minimis condition*, a *recognized environmental condition*, a *controlled recognized environmental condition*, or a *historical recognized environmental condition*, based on site-specific characteristics.

ASTM E1527-21 states that an ESA "meeting or exceeding" this practice and completed less than 180 days prior to the date of acquisition of the *property* or (for transactions not involving an acquisition) the date of the intended transaction, is presumed to be valid if the report is being relied on by the User for whom the assessment was originally prepared. The components of the practice to be completed within 180 days include: interviews, searches for recorded environmental cleanup liens, the regulatory review, site visit and the declaration by the environmental professional responsible for the assessment. The ASTM E1527-13 practice also states that within this 180 day period, if the assessment will be used by a different user than the user for whom the assessment was originally prepared, the subsequent user must also satisfy the User's Responsibilities.

3.2 Scope of Work

The Phase I ESA conducted at the subject property was in general accordance with ASTM Standard E 1527-21 and included the following:

- A site reconnaissance and visual survey of properties proximate to the subject property,
- Review of records and (if possible) interviews with regulatory officials and representatives regarding current and former operations at the subject property,
- A review of historical resources, such as: property records, topographic maps, fire insurance maps, city directories, and aerial photographs,
- Review of previous environmental site assessments, if made available,
- Review of State and Federal environmental database information, and
- Evaluation of information and preparation of the report provided herein.

Typically, a Phase I ESA does not include sampling or testing of air, soil, groundwater, surface water, or building materials. Limited testing for asbestos containing materials (ACM) and Lead Based Paint (LBP) activities were carried out at the subject property under a separate work order. ACM and LBP inspections of the store front facades were completed and reports were submitted to IMEG. These reports are not a part of this ESA as noted in Section 9.0.

3.3 Significant Assumptions

Information obtained from the Client, the Client's representative (when available), individuals interviewed (when available), and prior environmental reports (if provided) were considered to be accurate unless JLC's reasonable inquiries clearly revealed otherwise. Conditions observed were considered to be representative of areas that were not observed unless otherwise indicated.

The primary direction of groundwater flow was assumed to be dictated by topography, unless otherwise indicated by measurement of potentiometric surface or other quantifiable data. Additionally, the groundwater flow direction was assumed to control the distribution of impact, if present.

3.4 Limitations and Exceptions

Limitations and exceptions to ASTM Standard E1527-21 noted during the course of the Phase I ESA are discussed below:

The findings and opinions presented are relative to the date(s) the work was conducted and should not be relied on to represent conditions at later dates. The opinions included herein are based on information obtained during the assessment and JLC's experience. If additional information becomes available that may impact JLC's environmental assessment findings, JLC requests the opportunity to review the information, reassess the potential concerns, and modify JLC's opinions, if warranted.

This assessment included visual observations to identify obvious features or conditions indicative of *recognized environmental conditions.*

Although this assessment has attempted to identify *recognized environmental conditions*, CODA cannot eliminate all uncertainty as to *recognized environmental conditions* in connection with the subject property nor represent or warrant that the subject property contains no hazardous substances or petroleum products or other latent conditions beyond those identified through the scope of work identified herein. Other features, conditions, and constituents may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information.

Although this assessment has attempted to identify *business environmental risks*, potential *business environmental risks* may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, (5) deliberate concealment of detrimental information, and/or (6) the subjective nature of materiality to the User with respect to *business environmental risks*.

JLC's professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants undertaking similar studies and practicing in this locality during the same timeframe. No other warranty, expressed or implied, is intended or made with respect to this report or JLC’s services. This assessment was not exhaustive and Users of this report should consider the scope and limitations related to these services when developing opinions as to risks associated with the subject property.

This report presents an assessment of the subject property as defined by information provided by the Client, Client’s representative, or Key Site Manager. CODA’s findings, opinions, conclusions, and recommendations are based on the locations and boundaries of the subject property as evident in the field and on maps or plats provided by the Client, Client’s representative, or Key Site Manager.

The discussion in Section 2.1 defines the subject property as understood by JLC and any unique conditions related thereto.

JLC did not receive a completed "User's Questionnaire" information request at the time of the report completion.

3.5 Deviations

JLC's inability to obtain access to the second floor apartments within the building reduced the amount of site reconnaissance activities required by ASTM that were performed. JLC was able to reconnoiter the exterior of the building and the surrounding properties. JLC was also able to enter the Firestone Tire Shop business on the ground level and was given access to the basement storage area as well. JLC was unable to conduct a complete interior inspection, unable to interview a key site manager or any regulatory officials involved with this project and a completed User Questionnaire was not provided to JLC at the time this report was prepared.

The findings and opinions presented are relative to the dates this work was conducted and should not be relied on to represent conditions at later dates. The opinions included herein are based on information obtained during the assessment and JLC’s experience. If additional information becomes available that may impact JLC’s environmental assessment findings, JLC requests the opportunity to review the information, reassess the potential concerns, and modify JLC’s opinions, if warranted.

This assessment included visual observations to identify obvious features or conditions indicative of *recognized environmental conditions*.

Although this assessment has attempted to identify *recognized environmental conditions*, JLC cannot eliminate all uncertainty as to *recognized environmental conditions* in connection with the subject property nor represent or warrant that the subject property contains no hazardous substances or petroleum products or other latent conditions beyond those identified through the scope of work identified herein. Other features, conditions, and constituents may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information.

Although this assessment has attempted to identify *business environmental risks*, potential *business environmental risks* may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, (5) deliberate concealment of detrimental information, and/or (6) the subjective nature of materiality to the User with respect to *business environmental risks*.

JLC's professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants undertaking similar studies and practicing in this locality during the same timeframe. No other warranty, expressed or implied, is intended or made with respect to this report or JLC's services. This assessment was not exhaustive and Users of this report should consider the scope and limitations related to these services when developing opinions as to risks associated with the subject property.

This report presents an assessment of the subject property as defined by information provided by the Client and Client's representative. JLC's findings, opinions, conclusions, and recommendations are based on the locations and boundaries of the subject property as evident in the field and on information provided by the Client.

3.6 Special Terms and Conditions

The work was conducted in general conformance with JLC's proposal 24-7877 dated June 6, 2024, and the terms and conditions established therein. The User is defined as the party seeking to use ASTM E1527-21 to complete an ESA of the property. The User of this Phase I ESA is JLC's Client, IMEG Corp.

3.7 Reliance

This report represents JLC's services as of the date hereof. As JLC's final document, it may not be altered after final issuance. This assessment and report were prepared on behalf of and for the exclusive use of IMEG solely for its use and reliance and is subject to the terms and conditions agreed upon between JLC and IMEG. The Client and JLC were solely involved in shaping the scope of services. Accordingly, reliance on this report by any other party may involve assumptions leading to an unintended interpretation of findings and opinions. As such, reliance by other parties on the contents of this document is not granted, and any such reliance shall be at the sole risk of the User. With the consent of JLC and the Client and for a fee, JLC may offer reliance to third parties or contract with other parties to develop findings and opinions related to such party's specific risk management objectives. Except as otherwise agreed in writing, any and all third party reliance upon this Phase I ESA shall be subject to the terms in JLC's standard Terms and Conditions (available upon request) constitutes JLC's aggregate liability to any and all relying third parties for any and all claims.

4.0 USER-PROVIDED INFORMATION

ASTM E1527-21 requires that the environmental professional request from the User of the Phase I ESA, the Client, certain information concerning the subject property that will help identify the possibility of *recognized environmental conditions* in connection with the subject property or to request from the User the names of other individuals who can provide this information.

ASTM E1527-21 assigns to the Client or its representative the responsibility to provide the environmental professional with information pertaining to environmental liens or AULs (including institutional controls, physical or engineered controls, land use restrictions, restrictive covenants, easements, etc.) applicable to the subject property, whether recorded or not. ASTM E1527-21 states that the User can engage a title company or title professional as an addition to the scope of work to be performed by the environmental professional. ASTM E1527-21 and the supporting regulation state that the search for environmental liens/AULs by the User may be a significant component in the Environmental Protection Agency's (EPA's) determination of whether a property owner has satisfied the requirements for landowner liability protection against the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) liability.

Depending on available information and specific site conditions, JLC may conclude that the failure of the User to provide environmental lien/AUL search documentation does not present a significant Data Gap and therefore, can declare that JLC has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. However, failure of the User to provide the information or to engage the environmental consultant or others to obtain and consider that information may separately weaken a defense to CERCLA liability.

If the Client or its representative is aware of specialized knowledge or experience that is material to the identification of *recognized environmental conditions*, or if it has actual knowledge that the purchase price of the subject property is significantly less than the purchase price of comparable properties, ASTM E1527-21 assigns to the Client the obligation to communicate that information to the environmental professional prior to the subject property reconnaissance. ASTM E1527-21 requires that an explanation of a significant decrease in purchase price be provided in writing.

ASTM E1527-21 assigns to the Client or its representative the responsibility to inform the environmental professional of the reason it wants the Phase I ESA performed and to provide commonly known, reasonably available information about the subject property that is material to *recognized environmental conditions*. Absent information to the contrary, the purpose for assessment is assumed to be in preparation for a *commercial real estate transaction*.

As part of JLC's engagement to conduct this work, information was requested from Client or its representative as to its awareness of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the subject property; or (3) any notices from governmental entities regarding possible violations of environmental laws or possible liabilities relating to hazardous substances or petroleum products.

4.1 Activity/Use Limitations

Using selected sources of reasonably ascertainable public information, JLC reviewed the current and historical uses of the subject property. The Phase I ESA historical review extends back until 1890 and no uses prior to that date are known. Sources of historical use information relating to the subject property and its adjoining properties were acquired and reviewed according to the reasonable availability of the information, the time limits provided for data acquisition and review, as permitted, by the project schedule and cost, and JLC's judgment of the likely value of the information for indicating environmental conditions. Historical sources reviewed by JLC are listed in Section 7.4 and typically include local city directories, aerial photographs, and a topographic map. If available through the database provider, the historical sources reviewed also included Fire Insurance Maps.

No information regarding environmental liens, AULs, or governmental notification relating to past or recurrent violations of environmental laws with respect to the subject property was reported to JLC or indicated by the Client or its representatives. JLC was not provided with a copy of any Title Insurance Documentation.

4.2 Specialized Knowledge

IMEG and the property owner did not report any specialized knowledge of this subject property to our representatives. JLC representatives involved with this project also have no specialized knowledge of the subject property outside of the research which was conducted and reported as part of this report. There was no Key Site Manager available to interview for additional specialized knowledge about this site.

IMEG did not report any specialized knowledge of this subject property to JLC and JLC has no specialized knowledge of the subject property outside of the research which was conducted and reported as part of this report.

The subject property ownership representatives who were interviewed as part of this Phase I investigation, have not reported any specialized knowledge of this subject property outside of what is contained in this report.

4.3 Valuation Reduction for Environmental Issues

No information indicating that the purchase price of the subject property was significantly less than the purchase price of comparable properties was reported to JLC by the Client or its representative

4.4 Owner, Subject Property Manager, and Occupant Information

The Suffolk County Geographic Information System (GIS) database published by the Department of Information Technology of the County of Suffolk was searched for ownership information for the subject property. According to the database, the current owner of the subject property is Reyansh Realty USA, Inc. but no address or telephone number for the business entity could be located in a search for additional ownership information. The Firestone Tire Store manager, George Worth, provided the name of the current owner of the Firestone Tire Store, Mr. Patel Minesh.

The subject property is occupied by one (1) retail tenant on the ground floor (Firestone Tires) and has a total of four (4) residential apartments on site. During the site visit to the property, JLC was able to gather limited additional information about the property from visual inspection. There was no key site manager available to interview.

4.5 Reason For Performing Phase I ESA

JLC understands this assessment was required by the client prior to being provided funding for a Amityville Village revitalization project overseen by the State of New York, which includes the subject property. JLC understands that the purpose of this assessment was to complete an evaluation that meets the applicable standard of "all appropriate inquiry into the previous ownership and uses of the subject property consistent with good commercial or customary practice" with the objective of assembling documentation that may help to support one of the threshold criteria for satisfying one or more defenses to CERCLA liability (LLPs) and to assist the Client in understanding potential environmental conditions that could materially impact the operation of the business associated with the subject property (business environmental risk).

5.0 SUBJECT PROPERTY DESCRIPTION

The subject property, 258 Broadway, Amityville, NY consists of a irregular rectangular shaped parcel of land approximately 10,300 square feet in size (.238 acre lot) with a two-story mixed use building with parking areas to the South and West of the building. Amityville is located within the Town of Babylon, County of Suffolk, New York, and is a suburban village area characterized by retail establishments of various businesses. The property lot is located in the B-1 Retail Business District.

The current structure located at the site is a two (2) story brick building with one (1) retail tenant on the ground floor, Firestone Tires. There are three (3) residential apartments on the second floor and one additional apartment is found in the former Taxi Stand building located in the southwest corner of the subject property. This former "taxi dispatch office" is currently a one-story residential apartment with an additional storage shed tacked on to the rear of the building. The apartment is currently reported to be vacant by the Tire Shop Manager, George Worth. The structures located at the subject property are currently in fair condition (some wear, deterioration was noted while being generally structurally sound and performing its intended purpose).

The target property was identified in the environmental data search as having a previous petroleum spill however, a subsequent clean up of that spill was evidenced and New York State issued a spill closure number to document this fact (#0101574). The adjacent properties located to the west (25 Sterling Place - Ok Petroleum Terminal) and to the north (262 Broadway - First Choice Auto Body & Auto Sales were also noted as having historical oil spills each of these spills had also been issued a spill closure number as well.

5.1 Location and Legal Description

The subject property is known as 258 Broadway, Amityville New York. and consists of an approximately .238 acre parcel of land. This site is found on the west side of Broadway between Sterling Place and Mill Street in Amityville, a village found within the Town of Babylon, Suffolk County, NY 11701. The subject property was generally flat and was observed as developed with a two story mixed use building, asphalt parking area and a small, one story structure separate from the main building, which is currently a vacant apartment. According to the Lightbox/EDR Radius Map it is found to be 22 feet above sea level. The property is zoned B-1 Retail Business District.

5.2 Subject Property and Surrounding Area Description

To assess the subject property and surrounding area, JLC conducted a site visit and also obtained and reviewed reasonably ascertainable published subject property information to characterize the physical setting of the subject property. JLC reviewed the current *USGS 7.5 Minute Topographic Map* showing the area on which the subject property is located. JLC reviewed one or more physical setting sources at the discretion of the environmental professional to obtain information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of the subject property. Discretionary physical setting sources may have been sought if (1) conditions had been identified in which hazardous substances or petroleum products in any form including vapor, are likely to be present on-site or to migrate to the subject property from off-site sources and (2) more information is generally obtained, pursuant to local good commercial or customary practice.

During the site reconnaissance, JLC Environmental observed the subject property and it's use and the land use on properties in the immediate vicinity of the subject property. The subject property is a two (2) story mixed use building on a rectangular parcel of land located in the village of Amityville, NY. It is surrounded by other buildings with other establishments, residential tenants, and parking lots in the area of the village zoned the as B-1 Retail Business District (RBD). It is bordered by additional B-1 RBD zoned areas to the North, South, and East. Directly West of the subject property is an area zoned as B-2 General Business District (GBD). To the Northeast is a residential B zone and across Broadway to the Northwest is an area zoned B-1 RBD and another as industrial. Southwest of the subject property is also zoned B-1 RBD. Areas to the Northwest of the subject property are zoned as Industrial and B-1 RBD.

Observed current uses of adjoining properties are discussed according to their respective geographic relationship to the subject property in section 5.5:

5.3 Current Use of Subject Property

The current use of the subject property is mixed use. The ground floor of the building is a commercial establishment known as Amityville Firestone, a full-service auto repair and tire shop business. There are three (3) residential apartment units located on on the second floor. The additional structure on the property is a one story, approximately 500 square foot vacant apartment unit.

5.4 Description of Structures and Other Improvements

The subject property consists of a two-story brick structure found on the subject property surrounded to the West and South by paved parking areas. There is another structure found on the property line of the parking lot. It is a small, one-story brick building (formerly Lindy's Taxi office) and was inaccessible at the time of our inspection. JLC was informed by the Firestone Manager George Worth, that this building is a vacant residential apartment.

5.5 Adjoining Property Information

During the site reconnaissance, JLC Environmental observed the following land use on properties in the immediate vicinity of the subject property:

The subject property is a two (2) story mixed use building on a rectangular parcel of land located in the village of Amityville, NY. It is surrounded by other commercial buildings with commercial and retail tenants, and parking lots. It is in the area of the village zoned the as B-1 Retail Business District (RBD). It is surrounded by B-1 RBD to the North, South, and East, and bordered to the West by Residence C district. To the Northeast, Northwest, and Southwest are areas zoned as industrial. Southeast of the subject property is some B-1 RBD, followed by B-Residences.

Observed current uses of adjoining properties are discussed as follows according to their respective geographic relationship to the subject property. Beginning to the North of the Subject Property are the adjoining properties are described below and in the table in section 5.5:

North
The subject property, is bordered to the North by First Choice Auto Body & Auto Sales Inc; an auto repair shop.

South
Immediately to the south of the subject property is 250-256 Broadway, a 2 story mixed used building.

East
East of the property (Across Broadway/110) is an approximately 15K square foot building with a large parking lot. It is currently a Walgreen's Store and Pharmacy

West
To the West of the subject property is the attached parking lot for the building. A small one-story building is found at the southwest perimeter corner of the property. Directly West of the property line is the OK Oil Fuel Terminal, an active fuel oil supply business . Ok Oil Terminal, owned by Ok Petroleum, Distribution Corp., supplies residential fuel oil to large oil trucks for delivery to local homes and businesses.

Northeast
Northeast of the Subject Property across Broadway is the parking lot associated with the Walgreens Store and Pharmacy..

Southeast
Southeast of the Subject Property is a fenced off storage yard under the elevated railway for the Long Island Railroad.

Northwest
To the Northwest of the Subject Property is an unpaved parking area followed by a Residence C zone with multifamily residential buildings.

Southwest
Southwest of the Subject Property (on opposite side of Sterling Place) is a large commercial building currently being used as a self service storage rental facility known as Extra Space Self Storage.

Adjoining Property Information			
Direction From Subject Property	**Occupant**	**Use**	**Comments**
North	First Choice Auto Body & Auto Sales Inc	Commercial	
South	Broadway Liquor & Wine	Retail	This "attached" property has 3 retail tenants, one of them so Broadway Liquor and Wine
East	Walgreens	Retail	
West	Ok Petroleum Distribution Corp.	Commercial/ Industrial	Directly West of the property line is the OK Oil Fuel Terminal, an active fuel oil supply business. Ok Oil supplies residential fuel oil to large oil trucks for delivery..
Northeast	Walgreens		Parking lot for associated Walgreens that is East of the subject property.
Southeast	Long Island Railroad		Fenced off storage yard/parking lot under the elevated railway for the Long Island Railroad.
Northwest	Parking Lot for Adjacent property	Unimproved	Immediately to the north west corner of the subject property is a unpaved parking area for various trailers and trucks. Past this parking area are residential town homes.
Southwest	Extra Space Storage	Commercial	Self storage facility.

6.0 SITE RECONNAISSANCE

The subject property reconnaissance occurred on April 9, 2025. The temperature at the time of the site visit was 43°F with sunny skies. The physical inspection of the property was conducted to look for signs of potential contamination, such as spills, stains or storage tanks. The reconnaissance consisted of field observations of the subject property and adjoining land areas by JLC personnel experienced in environmental site assessments. JLC observed and documented current uses of the subject property and indicators, if any, of hazardous substances, petroleum products, storage tanks, odors, pools of liquid, drums, containers, polychlorinated biphenyls (PCBs), heating and cooling systems, stains, corrosion, drains and sumps, pits, ponds, lagoons, stressed vegetation, wastes, wells, and septic systems.

The reconnaissance was performed on foot within areas that were reasonably accessible and at JLC's discretion by automobile along publicly accessible roads. Site reconnaissance was performed systematically to characterize on-site conditions and assess the site's location with respect to surrounding property uses and natural surface features. In addition, JLC conducted a reconnaissance of the surrounding roads and readily accessible adjacent properties to identify obvious potential environmental conditions on neighboring properties. Photographs taken as part of the site reconnaissance are provided in Appendix A.

Reasonable attempts were made to interview key people familiar with the property to obtain information on present and previous on-site activities potentially resulting in the environmental degradation of the site or adjoining properties. A former owner of the property, Mr. Ernie Caramonico, was at the site on April 9, 2025 and was briefly interviewed by JLC to obtain additional site information. Amityville Tire manager George Worth was also briefly interviewed by telephone on May 6, 2025 to obtain additional site information.

Reasonable attempts were also made to interview other people familiar with the property to obtain information on present and previous off-site activities potentially resulting in the environmental degradation of the site or adjoining properties.

JLC personnel did not observe any indicators of hazardous substances, petroleum products (not in connection with identified uses on-site), storage tanks, odors, pools of liquid, drums, containers, polychlorinated biphenyls (PCBs), heating and cooling systems, stains, corrosion, drains and sumps, pits, ponds, lagoons, stressed vegetation, wastes, wells, or septic systems on site. The adjacent property to the west is the OK Petroleum Terminal, this terminal serves as a large fuel distribution hub for home heating oil and other fuel products..

6.1 Methodology and Limiting Conditions

JLC personnel visually and physically observed areas of the subject property and created photographic documentation of field site conditions. The periphery of the subject property was visually and physically observed as well. The subject property was viewed from adjacent public thoroughfares. The ground floor interior of the structure used by the public and the basement of the property used for storage were visually assessed. JLC was unable to observe any other areas of the structure including 2nd floor residences or the small ancillary building in the parking lot due to lack of access.

6.2 General Subject Property Setting

The subject property setting consists of a rectangular shaped parcel of land totaling approximately 10,400 Square Feet (0.238 acres) on the West side of Broadway (AKA Route 110) in the village of Amityville, Town of Babylon, New York in Suffolk County. This is a suburban village characterized by commercial mixed used businesses surrounded by residential development and an historically designated area to the South of the subject property. The EDR report indicated the subject property is 22 feet above sea level in an area zoned as B-1 Retail Business District.

6.3 Site Visit Findings

During the site visit conducted on April 9, 2025, typical exterior and interior building conditions were observed. Interior access to the ground floor of the commercial space of the main building was available. The apartments located on 2nd floor and the additional building with attached shed also located on the property were inaccessible. Amityville Firestone, an automotive repair shop, operates on the ground floor.. Amityville Firestone utilizes petroleum based products in the regular course of their business. The exterior of the (2) structures on the property (main building and ancillary building and attached storage shed) was found to be in good to fair condition.

Immediately adjacent to the subject property to the west is an OK Petroleum Terminal. OK Petroleum is a family-owned and operated petroleum distribution company and a leading supplier of residential and commercial heating oil in Suffolk County, NY.

6.3.1 Petroleum Products

Amityville Firestone primarily sells tires and provides automotive repairs. The shop currently provides oil changes and JLC did not observe any petroleum products present on site that were not in connection with these identified uses.

6.3.2 Underground Storage Tanks (USTs)

JLC Environmental personnel found no evidence of any USTs present on site during the reconnaissance of the Subject Property.

6.3.3 Aboveground Storage Tanks (ASTs)

JLC Environmental personnel found no evidence of any ASTs present on site during the reconnaissance of the Subject Property.

6.3.4 Strong, Pungent, or Noxious Odors

JLC Environmental personnel found no evidence of any strong, pungent or noxious odors present on site during the reconnaissance of the Subject Property.

6.3.5 Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products

JLC Environmental personnel found no evidence of any standing surface water, pools or sumps containing liquids likely to be hazardous substances or petroleum products present on site during the reconnaissance of the Subject Property.

6.3.6 Drums, Totes, and Intermediate Bulk Containers

JLC Environmental personnel found no evidence of any drums, totes and intermediate bulk containers present on site during the reconnaissance of the Subject Property.

6.3.7 Hazardous Substance and Petroleum Product Containers Not in Connection With Identified Uses

JLC Environmental personnel found no evidence of any hazardous substances or petroleum product containers not in connection with identified uses on-site during the reconnaissance of the Subject Property.

6.3.8 Unidentified Substance Containers

JLC found no evidence of the presence of unidentified substance containers during the site visit of the subject property.

6.3.9 PCB-Containing Items

JLC found no evidence of the presence of PCB containing items during the site visit of the subject property.

6.3.10 Stains or Corrosion on Floors, Walls, or Ceilings

JLC found no evidence of the presence of stains or corrosion on floors, walls or ceilings during the site visit of the subject property.

6.3.11 Drains and Sumps

JLC found no evidence of the presence of unusual drains or sumps during the site visit of the subject property.

6.3.12 Pits, Ponds, or Lagoons

JLC found no evidence of the presence of pits, ponds or lagoons during the site visit of the subject property.

6.3.13 Stained Soil or Pavement

JLC found no evidence of the presence of stained soil or pavement during the site visit of the subject property.

6.3.14 Stressed Vegetation

JLC found no evidence of the presence of stressed vegetation during the site visit of the subject property.

6.3.15 Wells

JLC found no evidence of the presence of wells during the site visit of the subject property.

7.0 RECORDS REVIEW

The records review consists of government environmental records and historical use records. JLC reviewed selected federal and state regulatory lists in an attempt to identify recorded information concerning environmental impacts or conditions or concerns associated with the subject property. JLC reviewed the regulatory lists included in the following table as obtained from Lightbox/ Environmental Data Resources (EDR). Pertinent sections of the database report are found in Appendix D, including a listing of the databases, an explanation of each database, and figures depicting the approximate locations of regulated facilities in the near vicinity of the subject property.

Regulatory listings are limited and include only those facilities or incidents that are known to the regulatory agencies at the time of publication to be contaminated, in the process of evaluation for potential contamination, or to store/generate potentially hazardous substances, waste, or petroleum.

Federal, State, and Local Tribes Lists

7.1 Standard Environmental Record Resources

The subject property was identified as having a petroleum spill and a subsequent clean up of that spill in the environmental data search records. The EDR Radius Map Summary Report lists the spill date as May 10, 2001 and a cleanup/closure date of July 24, 2006. The spill close out is #0101574. For more information on this spill see the executive summary on pages 5 and 9 of the EDR Radius Map report found in Appendix D. .

7.2 Additional Environmental Record Resources

Reasonable attempts were made to obtain information based on present and previous on-site activities potentially resulting in the environmental degradation of the site or adjoining properties. In addition to the records obtained via Lightbox/EDR, The Village of Amityville Buildings Department was contacted to obtain the zoning map for the Village of Amityville. The Suffolk County Geographic Information System (GIS) database was also accessed to gather additional information about the subject property and surrounding environs.

7.3 Physical Setting

Physical characteristics refer to the tangible and observable features of a property that can influence its value and marketability and are reviewed to provide information about the physical setting of the subject property. The source of information regarding physical setting is based on the site visit observations as well as upon the topographic maps, aerial photographs and EDR Radius Map information reviewed.

JLC obtained and reviewed reasonably ascertainable published subject property information to characterize the physical setting of the subject property. If reasonably ascertainable, JLC reviewed the current *USGS 7.5 Minute Topographic Map* showing the area on which the subject property is located. JLC reviewed one or more physical setting sources at the discretion of the environmental professional to obtain information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of the subject property.

7.3.1 Topography

The information on the topographic and radius maps provided in the historical site data indicates that there is a downward slope to the South of the property and that the sites to the East and West of the subject property are equal to the site elevation. Properties to the North are at an elevation that is higher than the subject property. The site sits at an approximate elevation of 22 feet above mean sea level based on the site map. Observation of the subject property topography corresponded with information presented on the topographic map.

7.3.2 Surface Water Bodies

JLC screened the subject property for the presence of surface water bodies and/or suspect wetlands during the site reconnaissance and by viewing the U.S. Department of the Interior, Fish and Wildlife Service, National Wetlands Inventory viewer online, and the most recently available topographic map. A wetland delineation was beyond the scope of this assessment. Review of the Wetland Inventory Map and topographic map indicates the subject property is approximately .25 miles from a Public Freshwater Pond (PubAx) and Riverine Habits (R2UBH and R4SBC) to the west and a Freshwater pond (PusAx)approximately .25 miles to the west of the subject property.

The subject property itself is not in an area mapped as a potential wetlands area and there are no mapped bodies of water present on the subject property that are indicative of possible wetlands. JLC notes that the Wetlands Inventory Map is prepared through the analysis of aerial photography and not by actual ground reconnaissance. It is normally used as a screening method to assess if potential wetlands areas exist in a given area. During JLC's site reconnaissance, suspect wetlands areas were not observed or reported at the subject property. JLC notes that the Environmental Professional who performed the site reconnaissance is not a specialist trained in wetlands delineation. No further assessment is recommended.

7.3.3 Geology and Hydrology

JLC consulted the report entitled "*Geology of the "20-Foot" Clay and Gardiners Clay in Southern Nassau and Southwester Suffolk Counties, Long Island, NY*" by Thomas P. Doriski and Franceska Wilde-Katz of the U.S. Geological Survey (USGS), Water-Resources Investigations Report 82-4056 dated 1983. Long Island, and specifically Southern Nassau County and adjacent Southwestern Suffolk County, are on Long Island's outwash plain. This plain extends about 10 miles Southward from the Ronkonkoma and Harbor Hill terminal moraines to the South shore.

The South shore is characterized by swamps and lagoons bordering Great South Bay, which is in turn contained by the South-shore barrier islands. Long Island is underlain by a thick sequence of unconsolidated Cretaceous and Pleistocene sediments extending from land surface to crystalline bedrock. These sediments contain the ground-water reservoir, the only source of freshwater for Nassau and Suffolk Counties. Along the South shore, the upper part of this sequence contains the two confining layers that were studied in detail in the "20-foot" Clay and Gardiners Clay report. The report notes that geology of the South shore of Long Island is composed of stratified layers of sand, clay/clayey sand, silt and gravel. The water table in the general vicinity of the Subject Property is close to the surface but varies depending on the amount of outside fill that may have been used in original construction.

7.4 Historical Use

Historical sources such as aerial photographs, topographical maps and Sanborn maps are found in appendix C of this report and were reviewed to assess on-site historical activities. Another source of historical information on past site uses was the Lightbox/EDR City Directory Report which accesses a variety of business directory sources. JLC's findings regarding the subject property are noted below:
1897 - 1897 - vacant land
1897 - 1964 - noted with a "D" for Dwelling
1971 - 1992 - noted as a retail store
1992 - present - noted as a various iterations of being a Firestone Tire Store and/or Firestone Dealers Store

7.4.1 Historical Summary

According to records reviewed regarding the subject property, the construction of the current structure housing the current Firestone Tire shop occurred in approximately 1992. The site has been continually occupied by a Firestone entity since that time (see section 7.4.2). Review of the Sanborn Maps and city directories indicate the subject was undeveloped in the early 1890's. After 189, the subject and surrounding properties were historically used for various types of businesses (e.g. black smith, wheel wright, paint store, hotel). There were also brief periods from 1897 until 1992 when the land was used for residential dwellings. These dwellings were later followed by the construction of commercial and mixed-use structures.

Additionally, oil spills associated with the subject property and other adjacent properties have all been issued closure numbers by the New York State Department of Environmental Conservation A spill closure number indicates that the necessary cleanup and removal actions have been completed for a spill incident and not further remedial activities are needed according to the records and data submitted. Based on information obtained by JLC and as presented in the this

report, prior historical surrounding land usage is not considered a suspect *recognized environmental condition* to the subject property.

7.4.2 City Directories

Based on information provided in the city directory report going back to 1971, the subject property was occupied by the following business establishments:

2020 - Amityville Firestone Shop/Ernie Caramanico
2017 - Amityville Firestone/Frontier Activiations
2014 - Firestone Complete Auto Care/Ernie Caramanico
2010 - Firestone of Amityville
2005 - AFDS (Amityville Firestone Dealer Store)/Encee Corp.
2000 - Amityville Chamber of Commerce/Amityville Firestone Dealer Corp/Firestone Dealer Store
1995 - Amityville Chamber of Commerce/Amityville Firestone Dealer Corp/Firestone Dealer Store
1992 - Amity Firestone Dealer Store/Firestone Dealer Store
1987 - prior to 1987 no other occupants were noted in the city directory

7.4.3 Aerial Photos

Aerial photos help provide visual evidence of what was present on and around the subject property at a given time. Aerial photos through time can show both large scale regional and, with the right photo scale and clarity, small scale changes on the property or on surrounding properties. Aerial photo were reviewed and are included here for the record.

7.4.4 Sanborn/Historical Maps

The Sanborn map collection consists of a uniform series of large-scale maps that date as far back in time as 1867. These historical maps depict the commercial, industrial, and residential sections of some twelve thousand cities and towns in the United States, Canada, and Mexico. Sanborn Maps were created by the Sanborn Map Fire Insurance Company for fire insurance purposes but eventually fell out of use in the 1960s. The license for the maps was acquired by land data company Environmental Data Resources (EDR). EDR was later acquired by real estate services company LightBox in 2019. The maps continue to be used to provide very detailed information about a property such as building outlines, size and shape, construction materials, height, building use, windows and doors, street and sidewalk widths, property boundaries and house numbers. See attached Sanborn maps for the subject property for further information.

7.4.5 Historical Topographic Maps

JLC obtained and reviewed reasonably ascertainable published subject property information to characterize the physical setting of the subject property including the topographical maps in the spreadsheet included herein. JLC reviewed one or more physical setting sources at the discretion of the environmental professional to obtain information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of the subject property. Discretionary physical setting sources may have been sought if (1) conditions had been identified in which hazardous substances or petroleum products in any form including vapor, are likely to be present on-site or to migrate to the subject property from off-site sources and (2) more information is generally obtained, pursuant to local good commercial or customary practice.

7.4.6 Previous Environmental Reports

No previous environmental reports were available in the historical records provided to JLC. The target property was identified in the Spills Report records. For more information on this property see page 9 of the attached EDR Radius Map report: Site Database(s) EPA ID OPPOSITE FIRESTONE 258 BROADWAY AMITYVILLE, NY NY Spills N/A Spill Number/Closed Date: 0101574 / 2006-07-24 Site ID: 181574 Spill Date: 2001-05-10

7.4.7 Other Historical Records

The historical data reviewed included a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

7.5 Environmental Liens and Activity/Use Limitations

No information regarding environmental liens, Activity Use Limitation (AULs), or governmental notification relating to past or recurrent violations of environmental laws with respect to the subject property was reported to JLC by Client or its representative. JLC was not provided with a copy of the 2020 Preliminary Commitment for Title Insurance Document. No environmental liens or AULs were indicated in the historical data search results.

7.6 Vapor Encroachment Evaluation

The goal of conducting a vapor encroachment study (VES) is to identify a vapor encroachment condition (VEC) which is defined as the presence, or likely presence of chemicals of concern (COC) vapors in the sub-surface of the subject property. The results of the ESA Phase I historical review indicates the potential for a neighboring property (OK Oil Terminal) potentially releasing vapors of concern, however, the review of historical records did not indicate the need for a vapor encroachment evaluation to be undertaken at the current time.

8.0 INTERVIEWS

JLC researched the current ownership information for the subject property prior to completion of the report. The records indicate that Reyansh Realty USA, Inc. owns the property. JLC was unable to find any contact information about the owner to interview them about the property. According to the current Amityville Firestone Tire Store manager, Mr. George Worth. who was interviewed via telephone after the site visit, the current owner of the property is Patel Minesh. The former owner, Mr. Ernie Caramonico, was present at the time of the 4.9.25 site visit and provided some anecdotal historical information such as how building waste is hauled away (private carting company) and the building's heating system (gas).

As of the completion date of this Phase I, no Key Site Manager interview was conducted. As noted in section 2.2, no User Questionnaire was submitted by our client or the Owner to help the environmental professionals identify recognized environmental conditions at the subject property and to fulfill the Environmental Protection Agency's requirements for "All Appropriate Inquires" into the subject property.

9.0 NON-SCOPE CONSIDERATIONS

Two non-scope items were requested to be provided to our client which are not part of this Phase I ESA: a report for Asbestos Containing Materials (ACM) and a report for Lead Based Paint (LPB) findings were provided to the client under separate cover.

Asbestos-Containing Building Materials

An ACM inspection was conducted on the exterior facade based on the beautification scope of work planned for the subject property. The interior of the structure was not inspected for ACM as it was not part of the scope of work. The ACM report was conducted under a separate work order and submitted to the client but is not part of the ESA report.

Lead-Based Paint

A Lead Based Paint (LBP) inspection and LBP Risk Assessment was conducted on the exterior facade and surrounding exterior based on the beautification scope of work planned for the subject property. The interior of the structure was not inspected because the interior was not part of the scope of work. The LBP report was conducted under a separate work order and submitted to the client but is not part of the ESA report.

10.0 FINDINGS AND OPINIONS

Based on the information obtained by JLC to date, the following summarizes JLC's findings and opinions of the impact on the subject property of known or suspect *recognized environmental conditions* and the environmental professional's rationale for concluding that a condition is currently a *recognized environmental condition*, a *controlled recognized environmental condition, a historical recognized environmental condition*, a *de minimis* condition, or not a *recognized environmental condition*.

• JLC did not identify a recognized environmental conditions or controlled recognized environmental conditions at the subject property site, however an historical recognized environmental conditions, or de minimis environmental condition was found to be associated with the subject property in the form of a past oil spill which was closed out by New York State. The surrounding land use review and visual observation noted that the Ok Petroleum Terminal directly to the West of the property is a recognized environmental condition and also an historical recognized condition due to past oil spills with corresponding close out numbers.

11.0 CONCLUSIONS

JLC has performed a Phase I ESA of the commercial property located at 258 Broadway, Amityville, NY in general conformance with the scope and limitations of ASTM Practice E1527-21. Based upon the information obtained, as reflected in this report, this assessment has revealed no evidence of *recognized environmental conditions* or *controlled recognized environmental conditions* in connection with the subject property. It was noted that there is a *historical recognized environmental condition* in the form of a former closed oil spill. Additionally, the site to the West of the subject property where the OK Petroleum Terminal is located is considered a *recognized environmental condition* in both its current and past operation and known closed out oil spills. No further assessment is recommended.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by JLC Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by JLC Environmental were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 24-7877

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The EDR Property Tax Map Report

Environmental Data Resources Inc

6 Armstrong Road
Shelton, CT 06484
800.352.0050
www.edrnet.com

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

NO COVERAGE

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel information and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and present
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

party of the second part,
WITNESSETH, that the party of the first part, in consideration of TEN DOLLARS ($10.00) and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, lying and being in the
SEE SCHEDULE "A" ATTACHED HERETO AND MADE A PART HEREOF

This conveyance is made with the unanimous written consent of the shareholders of Encee Corporation.

BEING AND INTENDED TO BE AS FOLLOWS:
Parcel 1: The premises herein described are and are intended to be the same as those described (or conveyed to Encee Corporation) in deed dated 12/30/1957, recorded 5/5/1958 in Liber 4456, Page 70.

Parcel 2: The premises herein described are and are intended to be the same as those described (or conveyed to Ernest V. Caramanico and Anita Caramanico, his wife) in deed dated 12/27/1979, recorded 2/1/1980 in Liber 8773, Page 5.

Parcel 3: The premises herein described are and are intended to be the same as those described (or conveyed to Ernest D. Caramanico) in deed dated 4/8/1985, recorded 4/30/1985 in Liber 9780, Page 344.

Parcel 4: The premises herein described are and are intended to be the same as those described (or conveyed to Ernest V. Caramanico and Anita Caramanico, his wife) in deed dated 3/22/1988, recorded 3/31/1988 in Liber 10573, Page 364.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof,
TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises,
TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose. The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal Delisted NPL sites

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the

criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 Delisted NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
USEPA REGION 2 - ACT	***33 DIXON AVE***	***ENE 1/2 - 1 (0.684 mi.)***	***AA108***	***441***
EPA ID:: NYD072366453				
Site ID:: 202634				

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ASTRO ELECTROPLATING	33 DIXON AVE.	NNE 1/8 - 1/4 (0.211 mi.)	Q76	280
Site ID: 0202635				
EPA Id: NYD982273971				

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 5 RCRA-VSQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/04/2024 has revealed that there is 1 NY SHWS site within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/11/2024 has revealed that there are 3 NY SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/03/2024 has revealed that there are 11 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 25 NY UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 11/03/2024 has revealed that there are 17 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 16 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 01/29/2025 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

USEPA REGION 2 - ACT EPA ID:: NYD072366453	***33 DIXON AVE***	***ENE 1/2 - 1 (0.684 mi.)***	***AA108***	***441***

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 7 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Hazardous Waste Summary:
Waste Code: D000

ROCKWORTH TRANSMISSIONS DBA COUNTRYLINE (Continued) **1000994416**

Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was GABIN 02-083 REMOVED 150 YDS CONT SOIL, ENDPOINT SAMPLES ND
Remarks:	WHILE PERFORMING A ROUTINE INSPECTION, THEY FOUND WHAT APPEARED TO BE AN OLD SPILL OF TRANSFORMER FLUID. THEIR RECORDS INDICATE THIS STATION DID NOT USE PCB FLUID. THEY HAVE EXCAVATED 8FT WIDE BY 12FT LONG BY 6FT DEEP, BUT CANNOT DIG DEEPER WITHOUT SHORING (OSHA LAW). THEY HAVE TAKEN SOIL SAMPLES FOR ANALYSES. DEC ADVISED THEM TO LEAVE THE EXCAVATION OPEN AND SECURED PENDING RECEIPT AND REVIEW OF THE DATA.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	9/17/08 - 2 of 5 wells with detectable levels of BTEX (2 and 72 ppb). All others ND. Soil samples also were either ND or showed trace levels of contamination. NFA. - CE
Remarks:	Per caller, MEG was retained in August 2008 to determine extent of the soil and groundwater contamination at the subject site. On August 2008, MEG installed five (5) 1 inch diameter wells to 16 feet below grade with a direct push unit. Groundwater contaminants exceeded the NYSDEC TAGN and Ambient Water Quality Guidance Values in three (3) of the five (5) wells. Caller wants to notify NYSDEC of the impacted subsurface conditions. (WG)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

DEC Memo:	Tiger Fuels is excavating contaminated soils and will call for DEC inspection. 9/21/06 TJD onsite 0830-0915 Site inspection. Tiger fuels excavated contaminated soils in vicinity of reported equipment failure. Open excavation - soils scraped to varying depth ranging from 6 to 24 inches bgs. Excavation dimension approximately 12x15ft. Remaining soils appeared free of residual petoleum impacts based upon visual and olfactory screening. Awaiting closure documentation. 9/4/07 TJD File review. Bluewater contacted directly for copy of disposal documentation. Manifest and weight ticket in file. No further action required.
Remarks:	DEC received an anonomous report of spill @terminal. Upon investigation and interview with Wayne @Tiger Fuels an unreported surface spill was discovered at rear of property in south west corner. Tiger Fuel representative states a hose blew causing discharge.

DEC Memo:	Tiger Fuels is excavating contaminated soils and will call for DEC inspection. 9/21/06 TJD onsite 0830-0915 Site inspection. Tiger fuels excavated contaminated soils in vicinity of reported equipment failure. Open excavation - soils scraped to varying depth ranging from 6 to 24 inches bgs. Excavation dimension approximately 12x15ft. Remaining soils appeared free of residual petoleum impacts based upon visual and olfactory screening. Awaiting closure documentation. 9/4/07 TJD File review. Bluewater contacted directly for copy of disposal documentation. Manifest and weight ticket in file. No further action required.
Remarks:	DEC received an anonomous report of spill @terminal. Upon investigation and interview with Wayne @Tiger Fuels an unreported surface spill was discovered at rear of property in south west corner. Tiger Fuel representative states a hose blew causing discharge.

DEC Memo:	NO CALLS 12/27/07 TJD Site inspection. Citizen complaint regarding contaminated soils. Yard was inspected and found to be free of visible petroleum contamination. Construction is dirt/stone. Contacted owner Jim Alcus he states no spills have occurred at his facility since previous DEC contact he recently performed some regrading and pothole repair but states no petroleum contaminated soils were generated from work. Housekeeping has improved since previous DEC Inspection. Mr. Alcus was reminded of DEC spill reporting requirements. No evidence of a spill was found during inspection. 2/1/08 TJD File review. No further action required.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D000
Waste Description:	Not Defined
Waste Code:	D001

BRUNSWICK HOSPITAL CENTER (Continued) **1000321198**

Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U122
Waste Description: Formaldehyde

Environmental Interest/Information System:
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and

BRUNSWICK HOSPITAL CENTER (Continued) **1000321198**

reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	04/19/2010-11:45-NH spoke SCPD Officer Christie David Gleeson 57 White male employed by the South Oaks hospital, dumped 1-2 gallons of the Fluoroacetic Acid down the drain. Employees near the spill site complained of a sour taste in their mouth.While dumping the material in the drain the washing machine went on causing a misting, then it was all washed away. South West Sewer District was notified by SCPD. 4/20 NEWS REPORTS CALLED THE MATERIAL BLEACH
Remarks:	material was dumped into drain/10 people from hosp have been sent out for medical evaluation

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D011
Waste Description: Silver

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except

USEPA REGION 2 - ACTION ANODIZING & PLATING (Continued) **1000259304**

From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F019
Waste Description: Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.

FINDS:
Registry ID: 110000808145

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110070339318

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

Region: 1
Acres: 1.000
HW Code: 152037
Record Add: 11/18/1999
Record Upd: 04/16/2008
Updated By: JBSWARTO
Site Description: Action Anodizing, Plating and Polishing Corp. (AAPP) has continuously operated at this site since 1968. AAPP's anodizing process included cleaning, sealing, and at times, dyeing of aluminum parts and cadmium plating. Prior to 1982, high concentrations of heavy metals including cadmium at 1900 ppm, chromium at 790 ppm, iron at 910 ppm and lead at 43 ppm were discharged to at least six underground pools. Wastewater samples from leaching pools demonstrated concentrations of heavy metals exceeding acceptable limits set as groundwater standards. Data is not available for estimating the amount of wastewater that was discharged. One public wellfield is within one mile of the site. Soil samples from the site contained 680 ppm and 640 ppm of chromium and cadmium, respectively. These concentrations exceeded soil cleanup guidelines. In 1981 the Suffolk County Department of Health Services (SCDHS) ordered AAPP to clean out and backfill the leaching system. The site was added to the National Priorities List (NPL) and a Remedial Investigation (RI) was performed. The results of the RI indicate that the actions taken in 1981 by the SCDHS were sufficient and that no further action was required. A No Further Action ROD which called for a one-year monitoring program was signed on June 19, 1992. Two rounds of groundwater sampling showed no presence of contaminants above acceptable standards. The site was deleted from the NPL on September 29, 1995. The site was delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State in April 2008.
Env Problem: Two rounds of groundwater sampling showed no presence of contaminants above acceptable standards. The site was deleted from the NPL on September 29, 1995. The leaching system has been cleaned out and backfilled. It has been determined that the site does not pose a significant threat.
Health Problem: Contaminated soils have been remediated, and routine monitoring of the public water supply wells show compliance with drinking water standards, thereby indicating that site does not currently pose a public health threat.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

USGS TOPOGRAPHIC MAP

Target Property Map:	14115936 AMITYVILLE, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

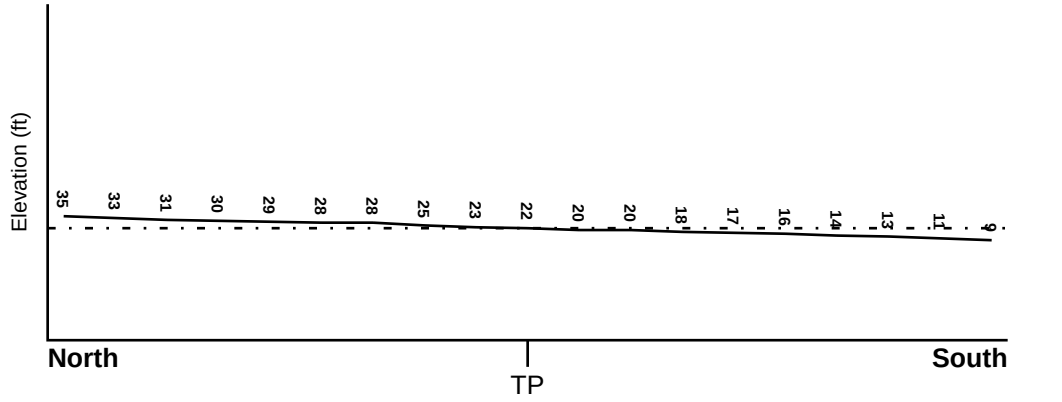
TOPOGRAPHIC INFORMATION

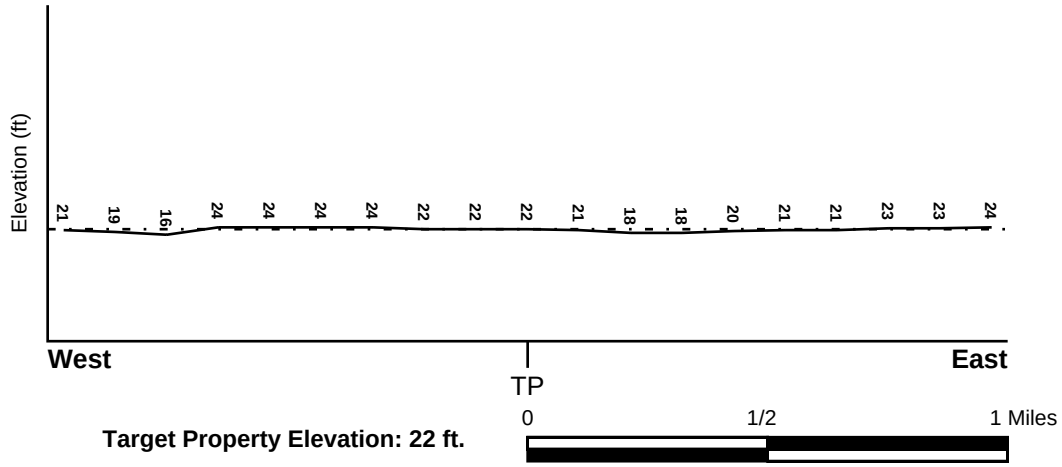
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





0 1/2 1 Miles

Target Property Elevation: 22 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

AMITYVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile NNE
Site Name:	Action Anodizing, Plating, And
Site EPA ID Number:	NYD072366453
Groundwater Flow Direction:	S ON A REGIONAL BASIS.
Measured Depth to Water:	approximately 10 feet to 15 feet in both the surficial and lower aquifers.
Hydraulic Connection:	A very low downward gradient from the surficial to the lower aquifer has been identified, along with a very low upward gradient from the lower aquifer to the surficial aquifer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Haven

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
2	11 inches	18 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
3	18 inches	27 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
4	27 inches	59 inches	stratified gravelly sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5

Soil Map ID: 3

Soil Component Name: Fill land

Soil Surface Texture: loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

258 BROADWAY
AMITYVILLE, NY 11701

COORDINATES

Latitude (North):	40.6813120 - 40° 40' 52.72''
Longitude (West):	73.4176770 - 73° 25' 3.63''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	633720.9
UTM Y (Meters):	4504373.0
Elevation:	22 ft. above sea level

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 9 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
OPPOSITE FIRESTONE 258 BROADWAY AMITYVILLE, NY	NY Spills Spill Number/Closed Date: 0101574 / 2006-07-24 Site ID: 181574 Spill Date: 2001-05-10	N/A

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal Delisted NPL sites

Delisted NPL: A review of the Delisted NPL list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 Delisted NPL site within approximately 1 mile of the target property.

UTM Y (Meters):	4504373.0
Elevation:	22 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14115936 AMITYVILLE, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

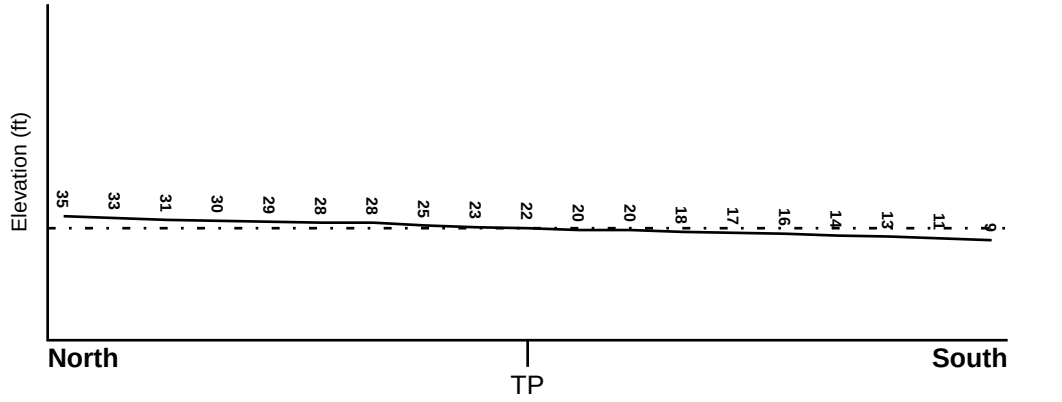
TOPOGRAPHIC INFORMATION

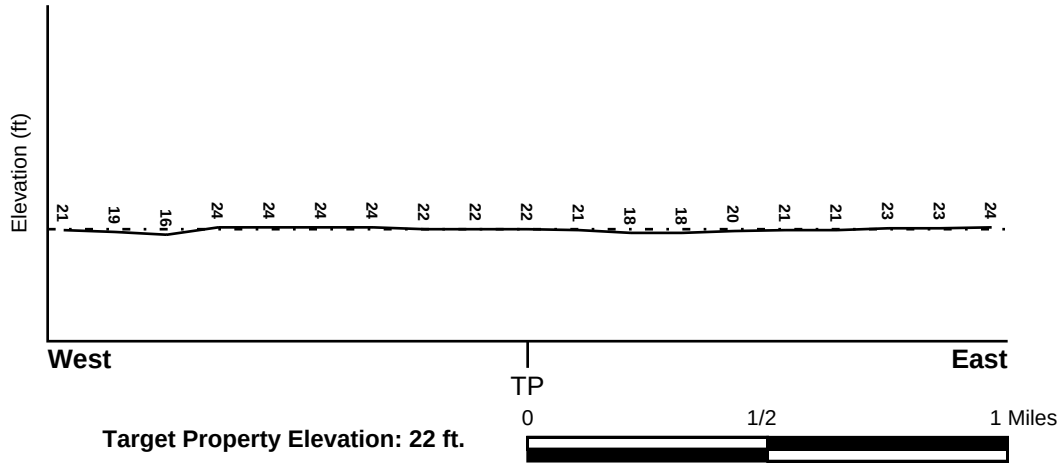
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





0 1/2 1 Miles

Target Property Elevation: 22 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
AMITYVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile NNE
Site Name:	Action Anodizing, Plating, And
Site EPA ID Number:	NYD072366453
Groundwater Flow Direction:	S ON A REGIONAL BASIS.
Measured Depth to Water:	approximately 10 feet to 15 feet in both the surficial and lower aquifers.
Hydraulic Connection:	A very low downward gradient from the surficial to the lower aquifer has been identified, along with a very low upward gradient from the lower aquifer to the surficial aquifer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Haven

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
2	11 inches	18 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
3	18 inches	27 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5
4	27 inches	59 inches	stratified gravelly sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand.	Max: 141 Min: 141	Max: 6 Min: 4.5

Soil Map ID: 3

Soil Component Name: Fill land

Soil Surface Texture: loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

1.0 Executive Summary

1.0.1 Introduction

JLC Environmental Consultants, Inc. (JLC) was retained by **Laura T. Liu** to conduct a risk assessment at **250-256 Broadway, Amityville, NY 11701**. The assessment was performed on **October 4, 2024,** by JLC Risk Assessor **Nissim Uriel (LBP-R-1139-2).** The risk assessment was specific to all painted surfaces and areas of concern located throughout the facility. Please refer to Appendix A Floor Plans for a sketch of the facility. The purpose of the risk assessment is to identify any LBP hazards or potential LBP hazards within the facility; and to provide recommendations based on existing conditions on how to correct any and all hazards identified during the course of the inspection.

A Lead XRF inspection was completed by our lead inspector **Tyreik Page (LBP-I-129087-3)** on **October 4, 2024**. A full inspection was conducted, and the data gathered will be included in this report.

This Risk Assessment was conducted in accordance with Chapter 5 of the HUD's Guidelines for the Evaluation and Control of Lead Based Paint Hazards in Housing (the HUD Guidelines). The guidelines for single-family dwellings were utilized. Dust wipe sampling as well as XRF Methodology was utilized for this Risk Assessment. The Risk Assessment was conducted by a USEPA Certified Risk Assessor who has been properly trained in accordance with 40 CFR Part 745.

1.0.1.1 Positive Components

JLC did identify components and/or surfaces as containing LBP. LBP is defined by any surface coating found to contain lead in concentrations above the current regulatory level of 0.5 milligram per square centimeter (mg/cm^2) or 0.25% by weight. Please refer to section 3.0 Results for details regarding the locations of the components that were found to contain LBP.

1.0.1.2 Lead-Based Paint Hazards

JLC did not identify LBP hazards (or paint in poor condition) during the course of this Risk Assessment. 40 CFR Part 745 identifies an LBP Hazard as any of the following:

1. Any lead-based paint on a friction surface that is subject to abrasion and where the lead dust levels on the nearest horizontal surface underneath the friction surface (such as a window sill or a floor) are equal or greater than the Lead Contaminated Dust Hazards as defined below;

2. Any damaged or otherwise deteriorated lead-based paint on an impact surface that is caused by impact from a related building component (such as a door knob that knocks against a wall or a door that knocks against its door frame);
3. Any chewable lead-based painted surface on which there are evidence of teeth marks;
4. Any other deteriorated lead-based paint in any residential building or child occupied apartment or on the exterior of any residential building or child-occupied facility.

Similarly, New York City Local Law 1 of 2004 defines LBP hazards (in Day Care Facilities) as:

> …any condition that causes exposure to lead from lead-contaminated dust, from lead-based paint that is peeling, or from lead-based paint that is present on chewable surfaces,
> deteriorated subsurfaces, friction surfaces, or impact surfaces that would result in adverse human health effects.

A chewable surface is defined by New York City Local Law 1 of 2004 as:

> …a protruding interior window sill in a day care apartment that is readily accessible to a child of applicable age. "Chewable surface" shall also mean any other type of interior edge or protrusion in a day care facility, such as a rail or stair, where there is evidence that such other edge or protrusion has been chewed or where the operator of such day care apartment has observed that a child under six years of age has mouthed or chewed such edge or protrusion.

Please refer to section 4.0 Conclusions for details regarding the locations of the identified LBP Hazards.

1.0.1.3 Lead Contaminated Dust Hazards

JLC did identify surfaces containing Lead Contaminated Dust Hazards. 40 CFR Part 745 defines Lead Contaminated Dust Hazards as surfaces found in a residential dwelling or child-occupied apartment that contain lead in dust equal to or greater than:

1. 5 micrograms of lead contaminated dust per square foot (ug/ft^2) on floors;
2. 40 ug/ft^2 of lead contaminated dust on interior window sills; and
3. 100 ug/ft^2 of lead contaminated dust on window wells.

Lead contaminated dust was identified on the floor of the facility.

Please refer to section 3.0 Results for details regarding the locations of the identified Lead Contaminated Dust Hazards.

1.0.2 Disclosure Statement

A copy of this summary must be provided to new lessees (tenants) and purchasers of this property under Federal Law (24 CFR part 35 and 40 CFR part 745) before they become obligated under a lease or sales contract. The complete report must also be provided to new purchasers and it must be made available to new tenants. Landlords (lessors) and sellers are also required to distribute an educational pamphlet and include standard warning language in their leases or sales contracts to ensure that parents have the information they need to protect their children from LBP hazards.

   P.O. Box 370, Manchester, CT 06040

1.0.3.3 Risk Assessor

Nissim Uriel
Certification Number: LBP-R-1139-2
Expiration Date: 03/9/2025

1.0.3.3.5 Lead Inspector

Tyreik Page
Certification Number: LBP-I-129087-3
Expiration Date: 6/16/2027

1.0.3.4 XRF Device Used

Manufacturer: Viken Instruments
Serial Number: 2226

2.0 Testing Methodology

2.0.1 X-Ray Fluorescence Analysis Methodology

Portable X-Ray Fluorescence (XRF) LBP analyzers are the most common primary analytical method for inspections in housing because of their demonstrated abilities to determine if LBP is present on many types of surfaces, their capability to measure lead content without destructive sampling or paint removal, and their high speed and relative low cost per sample. Portable XRF instruments expose a building component to gamma radiation, which causes lead to emit X-rays with a characteristic frequency or energy. The intensity of this radiation is measured by the instrument; the inspector must then compare this displayed value (reading) with the inconclusive range or threshold specified in the XRF Performance Characteristic Sheet for the specific XRF instrument being used, and the specific substrate beneath the painted surface. If the reading is less than the lower boundary of the inconclusive range, or less than the threshold, then the reading is considered negative. If the reading is greater than the upper boundary of the inconclusive range, or greater or equal to the threshold, then the reading is considered positive. Readings within the inconclusive range, including its boundary values, are considered inconclusive. Because the inconclusive ranges and/or thresholds shown in the Performance Characteristic Sheet are based on 0.5 mg/cm^2, positive and negative readings are consistent with the HUD definition of LBP for identification and disclosure purposes.

2.0.1.1 XRF Inspection Methodology

JLC conducts XRF Inspections in accordance with Chapter 7 of the HUD Guidelines. A typical LBP Inspection includes the following specific tasks:

1. The inspector enters the area to be inspected, identifies all room equivalents and creates a hand sketch of the area. Room 1 is to be the room which contains the entry door to the dwelling or facility. Each subsequent room equivalent is then numbered. Room 2 is designated as the room which is nearest to the left hand side of Room 1 (if facing the dwelling with back towards the dwelling's primary entrance). Room numbering is then continued in a clockwise fashion.

2. The inspector then identifies each testing combination in Room 1. A testing combination is defined as a unique combination of room equivalent, building component type, and substrate. The color, condition and location of the testing combination is also noted. Locations are designated as follows: Wall 1 is the wall directly to the back of the inspector when he or she enters the room equivalent. Subsequent walls are numbered in a clockwise

fashion. For example, if the inspector was noting the location of the entry door of a bedroom, that door would be located on wall 1. If he or she was noting the location of a window to his or her left, that window would be located on wall 2. Components such as light fixtures and ceilings are noted as located on the ceiling, and components that are not near a wall are noted as located in the room center.

3. Using the XRF device, the inspector tests all testing combinations in Room 1.

4. When all testing combinations are tested, the inspector then continues the inspection with the remaining room equivalents.

5. The inspection is finished when all testing combinations in the dwelling or apartment have been tested.

2.0.2 Risk Assessment Methodology

As part of the LBP risk assessment, an XRF inspection was conducted to determine if and where any damaged LBP is present in the dwelling or facility. The methodology outlined in section 2.0.1 was followed. In addition to the practices outlined in section 2.0.1.1, the condition of the components was noted, as well as their status as a friction/impact surface.

When the XRF Inspection is complete, the risk assessor then uses the results to determine where additional sampling is needed. Dust wipe sampling is conducted on the horizontal surfaces that are nearest to impact and friction surfaces coated with confirmed LBP**.** The risk assessor will also conduct dust wipe sampling in any other areas he or she decides could contain Lead Contaminated Dust. These areas include components that are coated with damaged paint, and other friction/impact surfaces throughout the dwelling, regardless of their status confirmed through XRF testing. If areas of bare soil are observed, then soil sampling will be conducted (not part of scope).

2.0.2.1 Categorization of Paint Film Quality

During this assessment, the conditions of the painted surfaces were classified as intact, fair, or poor as per the following table:

Table 2.0.2.1: Categorization of Paint Film Quality

	Total Area of Deteriorated Paint on Each Component		
Type of Building Component[1]	**Intact**	**Fair**[2]	**Poor**[3]
Exterior components	Entire surface is	Less than or equal	More than 10 square

with large surface areas	intact.	to 10 square feet.	feet.
Interior components with large surface areas (walls, ceilings, floors, doors).	Entire surface is intact.	Less than or equal to 2 square feet.	More than 2 square feet.
Interior and exterior components with small surface areas (window sills, baseboards, soffits, trim).	Entire surface is intact.	Less than or equal to 10 percent of the total surface area of the component.	More than 10 percent of the total surface area of the component.

[1] Building component in this table refers to each *individual* or side of building, *not* the combined surface area of all similar components in a room (e.g., a wall with 1 square foot of deteriorated paint is in "fair" condition, even if the other three walls in a room are intact.

[2] Surfaces in "fair" condition should be repaired and/or monitored, but are not considered to be "lead based paint hazards" as defined in Title X.

[3] Surfaces in "poor" condition are considered to be "lead-based paint hazards" as defined in Title X and should be addressed through abatement or interim controls.

2.0.3 Areas Not Accessible

JLC inspected and sampled all painted surfaces which were observable and accessible to the Risk Assessor. Any surfaces or components that have not been tested and/or found positive for lead must be assumed LBP.

Additional areas not accessed are in Appendix B & C on the chain of custody of the technician's paperwork.

Painted surfaces or components that may be present inside wall cavities, or which were otherwise inaccessible were not included in the scope of findings for this inspection.

3.0 Results

3.0.1 XRF Testing & Visual Results

On **October 4, 2024,** a total of **Sixteen (16)** surfaces were tested via XRF Methodology from our technician **Tyreik Page**. Of the 16 areas tested, **One (1)** surface was determined to contain lead above the current regulatory threshold of 0.5 mg/cm2 or 0.25% by weight. A full list of tested surfaces and results is available in Appendix B.

Table 1: Components and surfaces containing LBP:

Test Number	Room	Component Name	Color	Substrate	Location (Wall)	# Reps	[Pb] (mg/cm^2)
20	1/ 250-256 BROADWAY	DOOR FRAME SOUTH FAÇADE (250)	BLACK	STEEL/ METAL	1	2	0.9

Table 2: Components and surfaces containing LBP or that are in poor condition:

NONE

Sample Number	Sample Location	Sample Type	Condition
None	None	None	None

3.0.2 Dust Wipe Sampling Results

A total of **Three (3)** dust wipe samples were collected from the above location. Of the **Three (3)** collected, **Zero (0)** samples exhibited lead dust levels above the current regulatory threshold.

Table 3: Areas containing lead in dust above the current regulatory threshold:

NONE

Sample Number	Sample Location	Sample Type	Result (ug/ft^2)
None	None	None	None

3.0.3 Soil Sampling Results

A total of **Three (3)** soil sample was collected from the above location. Of the **Three (3)** collected, **Zero (0)** samples exhibited lead soil levels above the current regulatory threshold.

Table 4: Areas containing lead in soil above the current regulatory threshold:

NONE

Sample Number	Sample Location	Sample Type	Result (mg/kg)
None	None	None	None

Table 4.1: Areas containing trace amounts of lead in soil under the threshold:

Sample Number	Sample Location	Sample Type	Result (mg/kg)
01	Exterior/ East Façade/ Ground	Ground	58.5
02	Exterior/ East Façade/ Ground	Ground	63.3
03	Exterior/ South Façade/ Ground	Ground	80.7

Early in 2024, the U.S. Environmental Protection Agency lowered the screening level for lead in residential soils from 400 parts per million to 200 parts per million. **The new EPA standard is 200 parts per million.**

Lead is naturally present in all soils. It generally occurs in the range of 15 to 40 parts lead per million parts of soil (ppm), or 15 to 40 milligrams lead per kilogram of soil (mg/kg).

4.0 Conclusions and Recommendations

4.0.1 Lead-based paint Hazards

Definition

New York City Local Law 1 of 2004 defines an LBP hazard as any condition that causes exposure to lead from lead-contaminated dust, from lead-based paint that is peeling, or from LBP that is present on chewable surfaces, deteriorated sub-surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects.

Definition of a Chewable Surface

New York City Local Law 1 of 2004 defines a chewable surface as a protruding interior window sill in a dwelling unit in a multiple dwelling where a child of applicable age resides and which is readily accessible to such child; and as any other type of interior edge or protrusion in a dwelling unit in a multiple dwelling, such as a rail or stair, where there is evidence that such other edge or protrusion has been chewed or where an occupant has notified the owner that a child of applicable age who resides in that multiple dwelling has mouthed or chewed such edge or protrusion.

Recommendations for Remediating LBP Hazards

LBP hazards are the most immediate concern for this apartment and must be remediated as soon as possible by an EPA certified lead abatement firm. Please refer to 4.4.0 Qualified Persons for more information.

Table 1 lists all of the LBP hazards identified during the course of this inspection.

Where applicable, friction, impact and chewable surfaces should be removed and replaced. When performed properly, component removal and replacement represents the safest and usually the most cost effective method of LBP hazard abatement.

If a particular component is to be preserved, paint removal using chemical stripping agents is recommended.

Paint removal should never be performed using "dry scrape" methods.

4.1 Lead Dust Hazards

4.1.1 Definition

Lead contaminated dust is defined as dust existing in concentrations greater than or equal to:

5 micrograms of lead in dust per square foot (ug/ft^2) on floors;
40 ug/ft^2 of lead in dust on interior window sills; and
100 ug/ft^2 of lead in dust on window wells.

4.1.1 Recommendations for Remediating LBP Hazards

Table 2 lists all of the lead dust hazards identified during the course of this inspection.

Components exhibiting lead dust above the regulatory threshold must be cleaned to the point where lead levels are below the thresholds. This cleaning must be performed by an EPA certified abatement firm. The HEPA vacuum and wet wipe method is the optimal cleaning method for these components.

If a surface cannot be cleaned below the dust standards, it is acceptable to install a covering over that component, such as a carpet or tiles on a floor.

4.2.0 Lead-Based Paint Containing Components

Definition

LBP is defined by any surface coating found to contain lead in concentrations above the current regulatory level of 0.5 milligram per square centimeter (mg/cm^2) or 0.25% by weight.

Recommendations for LBP Components

Table 1 lists all of the components identified as containing LBP.

For those components that contain LBP but are not in fair or poor condition, or are not classified as friction, impact, or chewable surfaces, no remediation action is required at this time. However, these components should be monitored to ensure that film coatings remain intact, and to ensure that the friction, impact, and chewable statuses do not change. Please refer to 4.3.0 Annual Surveys for more information.

4.3.0 Annual Surveys

According to New York City Local Law 1 of 2004, the apartment must be surveyed annually by the apartment owner/rep/etc to ensure there is no peeling paint in the apartment that is lead-based or contains lead at an unknown content. Please refer to the following citation:

> §17-913 Annual Survey. The operator of a day care apartment shall conduct a survey of such apartment annually, and more often if necessary, to determine the physical condition of surface-coating material throughout each such apartment and shall provide a copy of the survey results to the department.

4.4.0 Qualified Individuals

There are two groups of individuals that are authorized to perform lead remediation activities: certified lead abatement contractors and persons who have been trained in lead-safe work practices.

The certified lead abatement contractors represent the more highly trained, qualified personnel. These firms and individuals have successfully completed courses given by the USEPA and as a result are certified to perform a wide breadth of lead remediation services. Typically, they possess the most experience and equipment to perform lead remediation services.

Persons who have been trained in lead-safe work practices are authorized to perform lead remediation activities, but can only perform them on a small scale. According to New York City Local Law 1 of 2004, this group can only perform activities if less than 100 square feet of LBP will be disturbed, or if only 1 window per room will be removed. Please refer to the following citation in the law:

§27-2056.11 Work Practices.

(i) Except as provided in subparagraph (ii) of this paragraph, such rules shall incorporate work practices that are no less protective of public health than those set forth in subdivisions d and e of section 173.14 of the health code and those parts of subdivision b of such section applicable thereto or a successor rule, and shall include a requirement that lead-contaminated dust clearance testing be performed at the completion of such work. Such rules shall require that such work be performed by a person who has, at a minimum, successfully completed a course on lead-safe work practices given by or on behalf of the department or, by the United States environmental protection agency or an entity authorized by it to give such course, or by the United States department of housing and urban development or an entity authorized by it to give such course. Such rules shall require temporary relocation provided by the owner of the occupants of a dwelling or dwelling unit to appropriate housing when work cannot be performed safely.

(ii) Where such work will disturb more than one hundred square feet of lead-based paint or paint of unknown lead content in a room in a multiple dwelling, or will involve the removal of two or more windows with lead-based paint or paint of unknown lead content, such rules shall incorporate work practices that are no less protective of public health than those set forth in subdivisions d and e of section 173.14 of the health code and those parts of subdivision b of such section applicable thereto, or a successor rule, and shall include a requirement that lead contaminated dust clearance testing be performed at the completion of such work.

Such rules shall also require temporary relocation provided by the owner of the occupants of a dwelling or dwelling unit to appropriate housing when work cannot be performed safely. Such rules shall require, in addition, that all such work be performed only by firms which have received certification to perform lead abatement under the regulations issued by the United States environmental protection agency at subpart L of part 745 of title 40 of the code of federal regulations for the abatement of lead hazards, or any successor regulations. Such rules shall also provide that not less than ten days prior to the commencement of such work the owner of the premises, or the firm, shall file with the department of health and mental hygiene a notice of commencement so that the department of health and mental hygiene may, at its discretion, perform sample audits of such notices to determine that the firms performing the work are properly certified. Such notice shall be signed by the owner or by a representative of the firm , and shall be in a form satisfactory to or prescribed by the department of health and mental hygiene, and shall set forth at a minimum the following information:

(a) The address of the multiple dwelling and the specific location of the work within the multiple dwelling.
(b) The name, address and telephone number of the owner of the multiple dwelling in which the work is to be performed.
(c) The name, address and telephone number of the firm which will be responsible for performing the work.
(d) The date and time of commencement of the work, working or shift hours, and the expected date of completion; and
(e) Identification of the surfaces and structures, and surface area, subject to the work. The rules shall also provide that any changes in the information contained in the notice shall be filed with the department of health and mental hygiene prior to commencement of work, or if work has already commenced, within twenty-four hours of any change. The rules shall provide that a copy of the notice of commencement shall be posted at the work site.

Given the benefits of utilizing certified contractors over persons trained in lead-safe work practices, it is recommended that certified firms be utilized to perform lead remediation work. However, if the maintenance budget does not accommodate for these individuals, lead-safe trained personnel may be utilized.

4.5.0 Clearance Dust Wipe Testing

Upon completion of any lead remediation activities (by any type of lead hazard remediator), a third party organization must be utilized to perform lead dust wipe clearance sampling. According to New York City Local

Law 1 of 2004, clearance dust sampling must be performed on floors, window sills and window wells throughout the work area. Actual sampling protocol is based on the methods utilized by the group that performed the remediation and is outlined in the HUD's Guidelines For the Evaluation and Control of Lead-Based Paint Hazards in Housing.

5.0 Record of Certification

This report, and the supporting data, findings, conclusions, opinions, it contains, represents the result of JLC's efforts on behalf of your firm. This report is not Lead-based Paint abatement specification and should not be used for specifying removal methods or techniques.

The results, assessments, conclusions and recommendations stated in this report are factually representative of the conditions and circumstances we observed at this location on the date of our inspection. We cannot assume responsibility for any change in conditions or circumstances that occurred after our inspection.

This report and its findings and recommendations, if implemented by your firm, should not be construed as an assurance or implied warranty for the continuing safety, performance, or cost-effectiveness of any equipment, product, system, facility, procedure, or policy discussed or recommended herein.

This report may contain sensitive information about your firm, your staff, equipment, operations, or policies. It may also contain confidential or proprietary information about specific equipment or products, which have been provided to JLC by the manufacturers or other sources. Therefore, we consider this report confidential and ask that you do the same. This report should not be transmitted to third parties without the written permission of JLC and an authorized agent of your firm.

Report Notes

General Notes and Disclaimers

- The samples analyzed in this report were not collected by this laboratory - they were received from the client, or an agent of the client, in good condition, unless otherwise noted.
- All results are calculated based on client-provided samples and / or measurements and fall within the acceptable Quality Control limits and the reported data included in this document has not been corrected based on blank values.
- This report shall not be reproduced, except in full, without the written approval of the laboratory.
- This report relates only to the samples tested. It may not be used by the client to claim project endorsement by NVLAP, NYS ELAP, or any other government agency.
- Quality Control data (including 95% confidence limits, laboratory / analysis accuracy and precision) is available upon request.

Lead Exposure Limits

Matrix	Concentration	Details
Air	0.15 µg/m^3	EPA National Ambient Air Quality Standard (Quality Time - Weight Average)
	30 µg/m^3	OSHA action level (8-hour time-weighted average)
	50 µg/m^3	OSHA permissible exposure limit (General Industry)
Dust	5 µg/ft²	NYC DOHMH Clearance Level for Floors (includes carpeted and uncarpeted interior floors)
	40 µg/ft²	NYC DOHMH Clearance Level for Interior Window Sills
	100 µg/ft²	NYC DOHMH Clearance Level for Window Wells / Window Troughs
	N/A	NYC DOHMH Clearance Level for Porch Floors
Paint	1.0 mg/cm^2	EPA Clearance Level of Lead Based Paint
	5000 µg/g (5,000 ppm, 0.5% by weight)	
Soil	400 µg/g	EPA Bare Residential Soil Hazard Levels (play areas used by young children)

NEW YORK STATE DEPARTMENT OF HEALTH

RADIOACTIVE MATERIALS LICENSE

Pursuant to the Public Health Law, Part 16 of the New York State Sanitary Code, Industrial Code Rule 38, and in reliance on statements and representations heretofore made by the licensee designated below, a license is hereby issued authorizing radioactive material(s) for the purpose(s), and at the place(s) designated below. The license is subject to all applicable rules, regulations, and orders now or hereafter in effect of all appropriate regulatory agencies and to any conditions specified below.

1. NAME OF LICENSEE	3. LICENSE NUMBER	
FEIN 11-2876656 JLC Environmental Consultants, Inc. Phone (212) 420-8119	C2944 4. EXPIRATION DATE **July 26, 2034**	
2. ADDRESS OF LICENSEE	5a. REFERENCE	b. AMENDMENT NO.
243 West 30th Street, Suite 701 New York, New York 10001	DH 17-192	14

This license is subject to the following conditions:

Conditions 6 through 9 – Authorized Materials, Form, Possession Limits and Uses
Condition 10 – Authorized Users and Radiation Safety Officer
Condition 11 – Documents Incorporated by Reference
Condition 12 and beyond – License Conditions

In accordance with the application dated April 19, 2017, signed by Adam Corven, New York State Department of Health Radioactive Materials License No. C2944 is hereby amended in its entirety to read as follows:

NEW YORK STATE DEPARTMENT OF HEALTH

RADIOACTIVE MATERIALS LICENSE

3. License Number C2944 **5a. Reference DH 17-192** **b. Amendment No. 14**

AUTHORIZED MATERIALS, FORM, POSSESSION LIMITS AND USES

6. Radioactive Materials (elements in mass number)	7. Chemical and/or physical form	8. Maximum quantity licensee may possess at any one time
A. Cobalt 57	A. Sealed source	A. 60 millicuries

9. Authorized use.
Condition 6.A.:

A. The licensee is authorized to use any sealed source or associated portable x-ray fluorescence device which has been manufactured and distributed in accordance with a specific license issued by an Agreement State or the United States Nuclear Regulatory Commission. Combinations of sources and devices must be compatible for use as stated in a Sealed Source and Device Registration Certificate (i.e., stated in the registration certificate for the source or device).

B. No single source may exceed the maximum activity specified for that nuclide in the Sealed Source and Device Registration Certificate for any device in which the source is to be used.

AUTHORIZED USERS AND RADIATION SAFETY OFFICER

10. A. Radioactive material listed in Item 6 shall be used by Jennifer Carey, as necessary to fulfill the responsibilities of the Radiation Safety Officer.

B. Licensed material shall be used by, or under the supervision of, the Radiation Safety Officer, by licensee personnel trained under a training process approved by the Department. The licensee shall have available a complete and accurate record of the qualifications of each person permitted to use radiation sources under this license.

DOCUMENTS INCORPORATED BY REFERENCE

11. Except as specifically provided otherwise in this License, the licensee shall conduct its program in accordance with the statements, representation and procedures contained in the documents, including any enclosures, listed below. The Department's Regulations shall govern, unless the statements, representation and procedures in the licensee's application and correspondence are more restrictive than the Regulations.

A. Application for New York State Radioactive Materials License dated April 19, 2017, signed by Adam Corven.

11. B. Correspondence received June 30, 2017.

C. Letter dated September 11, 2017, signed by Jennifer Carey

LICENSE CONDITIONS

12. A. Licensed material shall be stored at the location indicated in Condition 2 and may be used at temporary job sites of the licensee anywhere within the State of New York, where the Department of Health exercises jurisdiction.

B. Radioactive material shall be stored in a locked facility in the original shipping container, or a container providing equivalent radiation protection. Such a facility may be a cabinet, a safe, or a room, providing the facility is always locked when no activities are in progress relating to the use of the radioactive material.

C. Plans of facilities which the licensee intends to dedicate to operations involving the storage of radioactive material shall be submitted to the Department for review and approval prior to any such use.

D. Overnight storage at locations other than that indicated in Condition 2, including vehicular storage, is not authorized by this license.

13. A. Sealed sources containing radioactive materials shall not be opened or removed from devices.

B. The licensee is not authorized to dismantle, repair or affect any changes in the source holders/devices.

C. The licensee shall not alter labels attached to source holders or devices, and shall maintain labels in legible condition.

14. Under no circumstances shall radioactive material authorized by this license be transferred to the custody of any person or firm other than the licensee, or be used or stored by another person or firm or its employees; unless that person or firm possesses a valid license to possess and use such radioactive material.

15. Notwithstanding Section 16.10 (a) (4) of the New York State Sanitary Code (10 NYCRR 16), the licensee shall cause the device to be tested for leakage of radioactive material at intervals that do not exceed six months, or at such longer intervals, not to exceed three years, as specified by the appropriate licensing agency and indicated in the required label. Off-site analysis of leak test samples shall be performed by persons specifically authorized by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services. On-site analysis of leak test samples shall be in accordance with procedures approved by the Department.

16. The licensee shall conduct a physical inventory every six (6) months to account for all devices received and possessed under the License. The records of the inventories shall be maintained for three (3) years from the date of the inventory for inspection by the Department, and shall include the quantities and kinds of licensed material, manufacturer's name and model number, location of devices, the date of the inventory, and the name of the person who performed it.

17. A. The licensee shall maintain a utilization log containing the identification of devices used, dates removed and returned to storage, the location of use, and the identity of user.

B. The log shall be kept at the location of storage and shall contain sufficient detail to enable the licensee to inform the Department, at any time, of the exact location of each device.

18. Current copies of the following documents shall be maintained at temporary job sites for Department inspection:

A. The manufacturer's instruction manual and the licensee's operating and emergency procedures.

B. A copy of the results of the latest test for leakage and/or contamination performed on the sealed sources.

C. A copy of this license.

19. The licensee shall ensure that all persons authorized to use portable devices comply with safe use and maintenance procedures and that they do not leave a device unattended or unsecured at any time, even for a few minutes.

20. In the event that a theft, loss or other serious incident does occur, the Department shall be notified immediately by telephone and subsequent information acquired by the licensee shall be reported as it is received. All device users must carry the NYSDOH's current telephone number in their emergency procedures.

Appendix D	**Inspector, Laboratory and Firm Certifications**

1.0 Executive Summary

1.0.1 Introduction

JLC Environmental Consultants, Inc. (JLC) was retained by **Laura T. Liu** to conduct a risk assessment at **258 Broadway, Amityville, NY 11701**. The assessment was performed on **April 9, 2025,** by JLC Risk Assessor **Nissim Uriel (LBP-R-1139-2).** The risk assessment was specific to all painted surfaces and areas of concern located throughout the facility. Please refer to Appendix A Floor Plans for a sketch of the facility. The purpose of the risk assessment is to identify any LBP hazards or potential LBP hazards within the facility; and to provide recommendations based on existing conditions on how to correct any and all hazards identified during the course of the inspection.

A Lead XRF inspection was completed by our lead inspector **Tyreik Page (LBP-I-129087-3)** on **April 9, 2025**. A full inspection was conducted, and the data gathered will be included in this report.

This Risk Assessment was conducted in accordance with Chapter 5 of the HUD's Guidelines for the Evaluation and Control of Lead Based Paint Hazards in Housing (the HUD Guidelines). The guidelines for single-family dwellings were utilized. Dust wipe sampling as well as XRF Methodology was utilized for this Risk Assessment. The Risk Assessment was conducted by a USEPA Certified Risk Assessor who has been properly trained in accordance with 40 CFR Part 745.

1.0.1.1 Positive Components

JLC did not identify components and/or surfaces as containing LBP. LBP is defined by any surface coating found to contain lead in concentrations above the current regulatory level of 0.5 milligram per square centimeter (mg/cm^2) or 0.25% by weight. Please refer to section 3.0 Results for details regarding the locations of the components that were found to contain LBP.

1.0.1.2 Lead-Based Paint Hazards

JLC did not identify LBP hazards (or paint in poor condition) during the course of this Risk Assessment. 40 CFR Part 745 identifies an LBP Hazard as any of the following:

1. Any lead-based paint on a friction surface that is subject to abrasion and where the lead dust levels on the nearest horizontal surface underneath the friction surface (such as a window sill or a floor) are equal or greater than the Lead Contaminated Dust Hazards as defined below;

2. Any damaged or otherwise deteriorated lead-based paint on an impact surface that is caused by impact from a related building component (such as a door knob that knocks against a wall or a door that knocks against its door frame);
3. Any chewable lead-based painted surface on which there are evidence of teeth marks;
4. Any other deteriorated lead-based paint in any residential building or child occupied apartment or on the exterior of any residential building or child-occupied facility.

Similarly, New York City Local Law 1 of 2004 defines LBP hazards (in Day Care Facilities) as:

> …any condition that causes exposure to lead from lead-contaminated dust, from lead-based paint that is peeling, or from lead-based paint that is present on chewable surfaces,
> deteriorated subsurfaces, friction surfaces, or impact surfaces that would result in adverse human health effects.

A chewable surface is defined by New York City Local Law 1 of 2004 as:

> …a protruding interior window sill in a day care apartment that is readily accessible to a child of applicable age. "Chewable surface" shall also mean any other type of interior edge or protrusion in a day care facility, such as a rail or stair, where there is evidence that such other edge or protrusion has been chewed or where the operator of such day care apartment has observed that a child under six years of age has mouthed or chewed such edge or protrusion.

Please refer to section 4.0 Conclusions for details regarding the locations of the identified LBP Hazards.

1.0.1.3 Lead Contaminated Dust Hazards

JLC did identify surfaces containing Lead Contaminated Dust Hazards. 40 CFR Part 745 defines Lead Contaminated Dust Hazards as surfaces found in a residential dwelling or child-occupied apartment that contain lead in dust equal to or greater than:

1. 5 micrograms of lead contaminated dust per square foot (ug/ft^2) on floors;
2. 40 ug/ft^2 of lead contaminated dust on interior window sills; and
3. 100 ug/ft^2 of lead contaminated dust on window wells.

Lead contaminated dust was identified on the floor of the facility.

Please refer to section 3.0 Results for details regarding the locations of the identified Lead Contaminated Dust Hazards.

1.0.2 Disclosure Statement

A copy of this summary must be provided to new lessees (tenants) and purchasers of this property under Federal Law (24 CFR part 35 and 40 CFR part 745) before they become obligated under a lease or sales contract. The complete report must also be provided to new purchasers and it must be made available to new tenants. Landlords (lessors) and sellers are also required to distribute an educational pamphlet and include standard warning language in their leases or sales contracts to ensure that parents have the information they need to protect their children from LBP hazards.

1.0.3 Background

Certification Number: LBP-I-129087-3
Expiration Date: 6/16/2027

1.0.3.4 XRF Device Used

Manufacturer: Viken Instruments
Serial Number: 2226

2.0 Testing Methodology

2.0.1 X-Ray Fluorescence Analysis Methodology

Portable X-Ray Fluorescence (XRF) LBP analyzers are the most common primary analytical method for inspections in housing because of their demonstrated abilities to determine if LBP is present on many types of surfaces, their capability to measure lead content without destructive sampling or paint removal, and their high speed and relative low cost per sample. Portable XRF instruments expose a building component to gamma radiation, which causes lead to emit X-rays with a characteristic frequency or energy. The intensity of this radiation is measured by the instrument; the inspector must then compare this displayed value (reading) with the inconclusive range or threshold specified in the XRF Performance Characteristic Sheet for the specific XRF instrument being used, and the specific substrate beneath the painted surface. If the reading is less than the lower boundary of the inconclusive range, or less than the threshold, then the reading is considered negative. If the reading is greater than the upper boundary of the inconclusive range, or greater or equal to the threshold, then the reading is considered positive. Readings within the inconclusive range, including its boundary values, are considered inconclusive. Because the inconclusive ranges and/or thresholds shown in the Performance Characteristic Sheet are based on 0.5 mg/cm^2, positive and negative readings are consistent with the HUD definition of LBP for identification and disclosure purposes.

2.0.1.1 XRF Inspection Methodology

JLC conducts XRF Inspections in accordance with Chapter 7 of the HUD Guidelines. A typical LBP Inspection includes the following specific tasks:

1. The inspector enters the area to be inspected, identifies all room equivalents and creates a hand sketch of the area. Room 1 is to be the room which contains the entry door to the dwelling or facility. Each subsequent room equivalent is then numbered. Room 2 is designated as the room which is nearest to the left hand side of Room 1 (if facing the dwelling with back towards the dwelling's primary entrance). Room numbering is then continued in a clockwise fashion.

2. The inspector then identifies each testing combination in Room 1. A testing combination is defined as a unique combination of room equivalent, building component type, and substrate. The color, condition and location of the testing combination is also noted. Locations are designated as follows: Wall 1 is the wall directly to the back of the inspector when he or she enters the room equivalent. Subsequent walls are numbered in a clockwise

fashion. For example, if the inspector was noting the location of the entry door of a bedroom, that door would be located on wall 1. If he or she was noting the location of a window to his or her left, that window would be located on wall 2. Components such as light fixtures and ceilings are noted as located on the ceiling, and components that are not near a wall are noted as located in the room center.

3. Using the XRF device, the inspector tests all testing combinations in Room 1.

4. When all testing combinations are tested, the inspector then continues the inspection with the remaining room equivalents.

5. The inspection is finished when all testing combinations in the dwelling or apartment have been tested.

2.0.2 Risk Assessment Methodology

As part of the LBP risk assessment, an XRF inspection was conducted to determine if and where any damaged LBP is present in the dwelling or facility. The methodology outlined in section 2.0.1 was followed. In addition to the practices outlined in section 2.0.1.1, the condition of the components was noted, as well as their status as a friction/impact surface.

When the XRF Inspection is complete, the risk assessor then uses the results to determine where additional sampling is needed. Dust wipe sampling is conducted on the horizontal surfaces that are nearest to impact and friction surfaces coated with confirmed LBP**.** The risk assessor will also conduct dust wipe sampling in any other area he or she decides could contain Lead Contaminated Dust. These areas include components that are coated with damaged paint, and other friction/impact surfaces throughout the dwelling, regardless of their status confirmed through XRF testing. If areas of bare soil are observed, then soil sampling will be conducted (not part of scope).

2.0.2.1 Categorization of Paint Film Quality

During this assessment, the conditions of the painted surfaces were classified as intact, fair, or poor as per the following table:

Table 2.0.2.1: Categorization of Paint Film Quality

	Total Area of Deteriorated Paint on Each Component		
Type of Building Component[1]	**Intact**	**Fair**[2]	**Poor**[3]
Exterior components	Entire surface is	Less than or equal	More than 10 square

with large surface areas	intact.	to 10 square feet.	feet.
Interior components with large surface areas (walls, ceilings, floors, doors).	Entire surface is intact.	Less than or equal to 2 square feet.	More than 2 square feet.
Interior and exterior components with small surface areas (window sills, baseboards, soffits, trim).	Entire surface is intact.	Less than or equal to 10 percent of the total surface area of the component.	More than 10 percent of the total surface area of the component.

[1] Building component in this table refers to each *individual* or side of building, *not* the combined surface area of all similar components in a room (e.g., a wall with 1 square foot of deteriorated paint is in "fair" condition, even if the other three walls in a room are intact.

[2] Surfaces in "fair" condition should be repaired and/or monitored, but are not considered to be "lead based paint hazards" as defined in Title X.

[3] Surfaces in "poor" condition are considered to be "lead-based paint hazards" as defined in Title X and should be addressed through abatement or interim controls.

2.0.3 Areas Not Accessible

JLC inspected and sampled all painted surfaces which were observable and accessible to the Risk Assessor. Any surfaces or components that have not been tested and/or found positive for lead must be assumed LBP.

Additional areas not accessed are in Appendix B & C on the chain of custody of the technician's paperwork.

Painted surfaces or components that may be present inside wall cavities, or which were otherwise inaccessible, were not included in the scope of findings for this inspection.

3.0 Results

3.0.1 XRF Testing & Visual Results

On **April 9, 2025,** a total of **Six (6)** surfaces were tested via XRF Methodology from our technician **Tyreik Page**. Of the 6 areas tested, **zero (0)** surfaces were determined to contain lead above the current regulatory threshold of 0.5 mg/cm2 or 0.25% by weight. A full list of tested surfaces and results is available in Appendix B.

Table 1: Components and surfaces containing LBP:

NONE

Test Number	Room	Component Name	Color	Substrate	Location (Wall)	# Reps	[Pb] (mg/cm^2)
None	None	None	None	None	None	None	None

Table 2: Components and surfaces containing LBP or that are in poor condition:

NONE

Sample Number	Sample Location	Sample Type	Condition
None	None	None	None

3.0.2 Dust Wipe Sampling Results

A total of **Three (3)** dust wipe samples were collected from the above location. Of the **Three (3)** collected, **zero (0)** samples exhibited lead dust levels above the current regulatory threshold.

Table 3: Areas containing lead in dust above the current regulatory threshold:

NONE

Sample Number	Sample Location	Sample Type	Result (ug/ft^2)
None	None	None	None

3.0.3 Soil Sampling Results

A total of **Zero (0)** soil sample was collected from the above location.

Table 4: Areas containing lead in soil above the current regulatory threshold:

NONE

Sample Number	Sample Location	Sample Type	Result (mg/kg)
None	None	None	None

Table 4.1: Areas containing trace amounts of lead in soil under the threshold:

Sample Number	Sample Location	Sample Type	Result (mg/kg)
None	None	None	None

Early in 2024, the U.S. Environmental Protection Agency lowered the screening level for lead in residential soils from 400 parts per million to 200 parts per million. **The new EPA standard is 200 parts per million.**

Lead is naturally present in all soils. It generally occurs in the range of 15 to 40 parts lead per million parts of soil (ppm), or 15 to 40 milligrams lead per kilogram of soil (mg/kg).

4.0 Conclusions and Recommendations

4.0.1 Lead-based paint Hazards

Definition

New York City Local Law 1 of 2004 defines an LBP hazard as any condition that causes exposure to lead from lead-contaminated dust, from lead-based paint that is peeling, or from LBP that is present on chewable surfaces, deteriorated sub-surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects.

Definition of a Chewable Surface

New York City Local Law 1 of 2004 defines a chewable surface as a protruding interior window sill in a dwelling unit in a multiple dwelling where a child of applicable age resides and which is

readily accessible to such child; and as any other type of interior edge or protrusion in a dwelling unit in a multiple dwelling, such as a rail or stair, where there is evidence that such other edge or protrusion has been chewed or where an occupant has notified the owner that a child of applicable age who resides in that multiple dwelling has mouthed or chewed such edge or protrusion.

Recommendations for Remediating LBP Hazards

LBP hazards are the most immediate concern for this apartment and must be remediated as soon as possible by an EPA certified lead abatement firm. Please refer to 4.4.0 Qualified Persons for more information.

Table 1 lists all of the LBP hazards identified during the course of this inspection.

Where applicable, friction, impact and chewable surfaces should be removed and replaced. When performed properly, component removal and replacement represents the safest and usually the most cost effective method of LBP hazard abatement.

If a particular component is to be preserved, paint removal using chemical stripping agents is recommended.

Paint removal should never be performed using "dry scrape" methods.

4.1 Lead Dust Hazards

4.1.1 Definition

Lead contaminated dust is defined as dust existing in concentrations greater than or equal to:

5 micrograms of lead in dust per square foot (ug/ft^2) on floors;
40 ug/ft^2 of lead in dust on interior window sills; and
100 ug/ft^2 of lead in dust on window wells.

4.1.1 Recommendations for Remediating LBP Hazards

Table 2 lists all of the lead dust hazards identified during the course of this inspection.

Components exhibiting lead dust above the regulatory threshold must be cleaned to the point where lead levels are below the thresholds. This cleaning must be performed by an EPA certified abatement firm. The

HEPA vacuum and wet wipe method is the optimal cleaning method for these components.

If a surface cannot be cleaned below the dust standards, it is acceptable to install a covering over that component, such as a carpet or tiles on a floor.

4.2.0 Lead-Based Paint Containing Components

Definition

LBP is defined by any surface coating found to contain lead in concentrations above the current regulatory level of 0.5 milligram per square centimeter (mg/cm^2) or 0.25% by weight.

Recommendations for LBP Components

Table 1 lists all of the components identified as containing LBP.

For those components that contain LBP but are not in fair or poor condition, or are not classified as friction, impact, or chewable surfaces, no remediation action is required at this time. However, these components should be monitored to ensure that film coatings remain intact, and to ensure that the friction, impact, and chewable statuses do not change. Please refer to 4.3.0 Annual Surveys for more information.

4.3.0 Annual Surveys

According to New York City Local Law 1 of 2004, the apartment must be surveyed annually by the apartment owner/rep/etc to ensure there is no peeling paint in the apartment that is lead-based or contains lead at an unknown content. Please refer to the following citation:

> §17-913 Annual Survey. The operator of a day care apartment shall conduct a survey of such apartment annually, and more often if necessary, to determine the physical condition of surface-coating material throughout each such apartment and shall provide a copy of the survey results to the department.

4.4.0 Qualified Individuals

There are two groups of individuals that are authorized to perform lead remediation activities: certified lead abatement contractors and persons who have been trained in lead-safe work practices.

The certified lead abatement contractors represent the more highly trained, qualified personnel. These firms and individuals have successfully completed courses given by the USEPA and as a result are certified to perform a wide breadth of lead remediation services. Typically, they possess the most experience and equipment to perform lead remediation services.

Persons who have been trained in lead-safe work practices are authorized to perform lead remediation activities, but can only perform them on a small scale. According to New York City Local Law 1 of 2004, this group can only perform activities if less than 100 square feet of LBP will be disturbed, or if only 1 window per room will be removed. Please refer to the following citation in the law:

§27-2056.11 Work Practices.

(i) Except as provided in subparagraph (ii) of this paragraph, such rules shall incorporate work practices that are no less protective of public health than those set forth in subdivisions d and e of section 173.14 of the health code and those parts of subdivision b of such section applicable thereto or a successor rule, and shall include a requirement that lead-contaminated dust clearance testing be performed at the completion of such work. Such rules shall require that such work be performed by a person who has, at a minimum, successfully completed a course on lead-safe work practices given by or on behalf of the department or, by the United States environmental protection agency or an entity authorized by it to give such course, or by the United States department of housing and urban development or an entity authorized by it to give such course. Such rules shall require temporary relocation provided by the owner of the occupants of a dwelling or dwelling unit to appropriate housing when work cannot be performed safely.

(ii) Where such work will disturb more than one hundred square feet of lead-based paint or paint of unknown lead content in a room in a multiple dwelling, or will involve the removal of two or more windows with lead-based paint or paint of unknown lead content, such rules shall incorporate work practices that are no less protective of public health than those set forth in subdivisions d and e of section 173.14 of the health code and those parts of subdivision b of such section applicable thereto, or a successor rule, and shall include a requirement that lead contaminated dust clearance testing be performed at the completion of such work. Such rules shall also require temporary relocation provided by the owner of the occupants of a dwelling or dwelling unit to appropriate housing when work cannot be performed safely. Such rules shall require, in addition, that all such work be performed

only by firms which have received certification to perform lead abatement under the regulations issued by the United States environmental protection agency at subpart L of part 745 of title 40 of the code of federal regulations for the abatement of lead hazards, or any successor regulations. Such rules shall also provide that not less than ten days prior to the commencement of such work the owner of the premises, or the firm, shall file with the department of health and mental hygiene a notice of commencement so that the department of health and mental hygiene may, at its discretion, perform sample audits of such notices to determine that the firms performing the work are properly certified. Such notice shall be signed by the owner or by a representative of the firm, and shall be in a form satisfactory to or prescribed by the department of health and mental hygiene, and shall set forth at a minimum the following information:

(a) The address of the multiple dwelling and the specific location of the work within the multiple dwelling.
(b) The name, address and telephone number of the owner of the multiple dwelling in which the work is to be performed.
(c) The name, address and telephone number of the firm which will be responsible for performing the work.
(d) The date and time of commencement of the work, working or shift hours, and the expected date of completion; and
(e) Identification of the surfaces and structures, and surface area, subject to the work. The rules shall also provide that any changes in the information contained in the notice shall be filed with the department of health and mental hygiene prior to commencement of work, or if work has already commenced, within twenty-four hours of any change. The rules shall provide that a copy of the notice of commencement shall be posted at the work site.

Given the benefits of utilizing certified contractors over persons trained in lead-safe work practices, it is recommended that certified firms be utilized to perform lead remediation work. However, if the maintenance budget does not accommodate for these individuals, lead-safe trained personnel may be utilized.

4.5.0 Clearance Dust Wipe Testing

Upon completion of any lead remediation activities (by any type of lead hazard remediator), a third party organization must be utilized to perform lead dust wipe clearance sampling. According to New York City Local Law 1 of 2004, clearance dust sampling must be performed on floors, window sills and window wells throughout the work area. Actual sampling protocol is based on the methods utilized by the group that

performed the remediation and is outlined in the HUD's Guidelines For the Evaluation and Control of Lead-Based Paint Hazards in Housing.

5.0 Record of Certification

This report, and the supporting data, findings, conclusions, opinions, it contains, represents the result of JLC's efforts on behalf of your firm. This report is not Lead-based Paint abatement specification and should not be used for specifying removal methods or techniques.

The results, assessments, conclusions and recommendations stated in this report are factually representative of the conditions and circumstances we observed at this location on the date of our inspection. We cannot assume responsibility for any change in conditions or circumstances that occurred after our inspection.

This report and its findings and recommendations, if implemented by your firm, should not be construed as an assurance or implied warranty for the continuing safety, performance, or cost-effectiveness of any equipment, product, system, facility, procedure, or policy discussed or recommended herein.

This report may contain sensitive information about your firm, your staff, equipment, operations, or policies. It may also contain confidential or proprietary information about specific equipment or products, which have been provided to JLC by the manufacturers or other sources. Therefore, we consider this report confidential and ask that you do the same. This report should not be transmitted to third parties without the written permission of JLC and an authorized agent of your firm.

RADIOACTIVE MATERIALS LICENSE

Pursuant to the Public Health Law, Part 16 of the New York State Sanitary Code, Industrial Code Rule 38, and in reliance on statements and representations heretofore made by the licensee designated below, a license is hereby issued authorizing radioactive material(s) for the purpose(s), and at the place(s) designated below. The license is subject to all applicable rules, regulations, and orders now or hereafter in effect of all appropriate regulatory agencies and to any conditions specified below.

1. NAME OF LICENSEE	3. LICENSE NUMBER	
FEIN 11-2876656 JLC Environmental Consultants, Inc. Phone (212) 420-8119	C2944 4. EXPIRATION DATE **July 26, 2034**	
2. ADDRESS OF LICENSEE	5a. REFERENCE	b. AMENDMENT NO.
243 West 30th Street, Suite 701 New York, New York 10001	DH 17-192	14

This license is subject to the following conditions:

Conditions 6 through 9 – Authorized Materials, Form, Possession Limits and Uses
Condition 10 – Authorized Users and Radiation Safety Officer
Condition 11 – Documents Incorporated by Reference
Condition 12 and beyond – License Conditions

In accordance with the application dated April 19, 2017, signed by Adam Corven, New York State Department of Health Radioactive Materials License No. C2944 is hereby amended in its entirety to read as follows:

NEW YORK STATE DEPARTMENT OF HEALTH

RADIOACTIVE MATERIALS LICENSE

3. License Number C2944 **5a. Reference DH 17-192** **b. Amendment No. 14**

AUTHORIZED MATERIALS, FORM, POSSESSION LIMITS AND USES

6. Radioactive Materials (elements in mass number)	7. Chemical and/or physical form	8. Maximum quantity licensee may possess at any one time
A. Cobalt 57	A. Sealed source	A. 60 millicuries

9. Authorized use.
Condition 6.A.:

A. The licensee is authorized to use any sealed source or associated portable x-ray fluorescence device which has been manufactured and distributed in accordance with a specific license issued by an Agreement State or the United States Nuclear Regulatory Commission. Combinations of sources and devices must be compatible for use as stated in a Sealed Source and Device Registration Certificate (i.e., stated in the registration certificate for the source or device).

B. No single source may exceed the maximum activity specified for that nuclide in the Sealed Source and Device Registration Certificate for any device in which the source is to be used.

AUTHORIZED USERS AND RADIATION SAFETY OFFICER

10. A. Radioactive material listed in Item 6 shall be used by Jennifer Carey, as necessary to fulfill the responsibilities of the Radiation Safety Officer.

B. Licensed material shall be used by, or under the supervision of, the Radiation Safety Officer, by licensee personnel trained under a training process approved by the Department. The licensee shall have available a complete and accurate record of the qualifications of each person permitted to use radiation sources under this license.

DOCUMENTS INCORPORATED BY REFERENCE

11. Except as specifically provided otherwise in this License, the licensee shall conduct its program in accordance with the statements, representation and procedures contained in the documents, including any enclosures, listed below. The Department's Regulations shall govern, unless the statements, representation and procedures in the licensee's application and correspondence are more restrictive than the Regulations.

A. Application for New York State Radioactive Materials License dated April 19, 2017, signed by Adam Corven.

11. B. Correspondence received June 30, 2017.

C. Letter dated September 11, 2017, signed by Jennifer Carey

LICENSE CONDITIONS

12. A. Licensed material shall be stored at the location indicated in Condition 2 and may be used at temporary job sites of the licensee anywhere within the State of New York, where the Department of Health exercises jurisdiction.

B. Radioactive material shall be stored in a locked facility in the original shipping container, or a container providing equivalent radiation protection. Such a facility may be a cabinet, a safe, or a room, providing the facility is always locked when no activities are in progress relating to the use of the radioactive material.

C. Plans of facilities which the licensee intends to dedicate to operations involving the storage of radioactive material shall be submitted to the Department for review and approval prior to any such use.

D. Overnight storage at locations other than that indicated in Condition 2, including vehicular storage, is not authorized by this license.

13. A. Sealed sources containing radioactive materials shall not be opened or removed from devices.

B. The licensee is not authorized to dismantle, repair or affect any changes in the source holders/devices.

C. The licensee shall not alter labels attached to source holders or devices, and shall maintain labels in legible condition.

14. Under no circumstances shall radioactive material authorized by this license be transferred to the custody of any person or firm other than the licensee, or be used or stored by another person or firm or its employees; unless that person or firm possesses a valid license to possess and use such radioactive material.

15. Notwithstanding Section 16.10 (a) (4) of the New York State Sanitary Code (10 NYCRR 16), the licensee shall cause the device to be tested for leakage of radioactive material at intervals that do not exceed six months, or at such longer intervals, not to exceed three years, as specified by the appropriate licensing agency and indicated in the required label. Off-site analysis of leak test samples shall be performed by persons specifically authorized by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services. On-site analysis of leak test samples shall be in accordance with procedures approved by the Department.

16. The licensee shall conduct a physical inventory every six (6) months to account for all devices received and possessed under the License. The records of the inventories shall be maintained for three (3) years from the date of the inventory for inspection by the Department, and shall include the quantities and kinds of licensed material, manufacturer's name and model number, location of devices, the date of the inventory, and the name of the person who performed it.

17. A. The licensee shall maintain a utilization log containing the identification of devices used, dates removed and returned to storage, the location of use, and the identity of user.

B. The log shall be kept at the location of storage and shall contain sufficient detail to enable the licensee to inform the Department, at any time, of the exact location of each device.

18. Current copies of the following documents shall be maintained at temporary job sites for Department inspection:

A. The manufacturer's instruction manual and the licensee's operating and emergency procedures.

B. A copy of the results of the latest test for leakage and/or contamination performed on the sealed sources.

C. A copy of this license.

19. The licensee shall ensure that all persons authorized to use portable devices comply with safe use and maintenance procedures and that they do not leave a device unattended or unsecured at any time, even for a few minutes.

20. In the event that a theft, loss or other serious incident does occur, the Department shall be notified immediately by telephone and subsequent information acquired by the licensee shall be reported as it is received. All device users must carry the NYSDOH's current telephone number in their emergency procedures.

Re: Limited ACM Inspection Report for 250-256 Broadway, Amityville, NY 11701

Dear Ms. Liu:

JLC Environmental Consultants, Inc. (JLC) was authorized to proceed with an inspection of the façade located at 250-256 Broadway, Amityville, NY to determine the presence of Asbestos Containing Materials (ACM) at the above referenced location.

1.0 Introduction

An asbestos inspection of the selected area was conducted by NYS DOL Asbestos Inspector Jennifer Carey on October 4, 2024. The inspections included accessible areas and materials only. Bulk samples of these materials were collected from various locations and analyzed via Polarized Light Microscopy (**PLM**) and Transmission Electron Microscopy (**TEM**) (where applicable). The inspections were conducted in compliance with all applicable laws, rules, and regulations.

2.0 Sampling Procedures & Identification of Materials to Sample

JLC's Asbestos Investigator conducted asbestos inspections as per the scope of work. The asbestos inspection was conducted following NYSDOL Industrial Code Rule 56 (ICR 56-5.1) and Federal regulations. All areas that were included in the scope of work were inspected physically to determine the presence or absence of asbestos containing materials.

Suspect materials that may be present inside wall cavities, electrical wiring or which were otherwise inaccessible are not included in the scope of this inspection. Samples were collected by penetration of the suspect material to its substrate. A physical "Hand Pressure" test was conducted for determining friability and condition of suspect materials.

- Assessments of suspect friable and non-friable materials and locations.
- Quantifying the amount of suspect friable and non-friable materials in their respective locations.
- All suspect materials sampled are identified on the appropriate building floor plan diagram with the sample number.
- A Chain of Custody records are prepared and accompanied the samples to the laboratory.

The bulk samples collected were placed in sealed bags, labeled with an identifying code and with a sample log. Representative samples of each homogeneous area were then submitted to an accredited laboratory to be analyzed for asbestos content

3.0 Typical Sample Locations and Building Materials Collected

(list of suspect ACM observed to be present and sampled):

Inspections - October 4, 2024

Location	Building Materials Sampled
Ground Floor/ South, East & Southeast Façade	Brick Mortar, Stucco, Window Caulk

** Please see Appendix A – Laboratory Reports for detailed locations and building materials sampled*

4.0 Asbestos Containing Materials (ACMs) Summary

No asbestos was found in the samples taken on October 4, 2024.

5.0 Conclusions and Recommendations

JLC inspected and sampled materials as requested by the client. Any materials that have not been tested and/or found positive for asbestos must be assumed ACM.

6.0 Limitations

JLC conducted asbestos inspections and sampling as requested by the client within the scope of work provided. However, it is important to note the following limitations:

- Unforeseen Discoveries: If the scope of work changes or additional materials are encountered that were not included in the original inspection, these materials must be assumed to contain asbestos until proven otherwise.
- Inaccessible Areas: Materials located in inaccessible areas, such as behind walls or above ceilings, were not sampled and may contain asbestos.
- Sampling Limitations: Bulk sampling and visual inspections have limitations and may not detect all instances of asbestos.
- Material Changes: Building materials may have been altered or replaced since the initial construction, potentially affecting the presence of asbestos.

Recommendations:

- Asbestos Abatement: If any materials are discovered or disturbed that are not listed on this report, they should be assumed to contain asbestos, and asbestos abatement must be performed by a licensed contractor before proceeding with renovations or demolition.
- Additional Sampling: If new materials are encountered or the scope of work changes significantly, additional sampling and analysis may be necessary to determine the presence of asbestos.
- Ongoing Monitoring: Regular inspections and monitoring may be required to identify and address any potential asbestos hazards that may arise over time.
- By acknowledging these limitations and following the recommended actions, you can help ensure the safety of occupants and workers and comply with asbestos regulations.

The Client recognizes that all surveying and testing methods have reliability limitations. No method or number of sampling locations can guarantee that a condition will be discovered within the performance of the services as authorized by the Client. These recommendations and conclusions are based on JLC personnel sampling of the selected areas only.

Feel free to contact me with any questions at (212) 420-8119 or via email at kduer@jlcenvironmental.com.

Respectfully,
JLC Environmental Consultants, Inc.

Keith Duer
Senior Project Manager

**** A report shall not be produced except in full without the written approval of the laboratory.
Symbol Key: F = Friable, NF = Non-Friable

Sample Analysis by:
Polarized Light Microscopy-Dispersion Staining (PLM-DS)

Method of Sample Preparation and Analysis:
All friable samples were prepared and analyzed in accordance with ELAP 198.1
All non-friable samples were prepared and analyzed in accordance with ELAP 198.6

Instrumentation:
Olympus PLM, Model BH-2/VM stereomicroscope Model VMZ 1x-4x.
Analytical results reflect the make up of the materials only in the areas sampled. This "Summary of Analytical Results" shall not be reproduced except in full, without the written approval of JLC Laboratory, and it must not be used by client to claim product endorsement by NVLAP or any agency of the U.S. Government. This method is not applicable to samples containing large amounts of fine fibers below the resolution of the light microscope. The value of this method is limited to the quantitative identification of asbestos and the semi-quantitative determination of asbestos content of bulk samples, expressed as a percentage of the projected area. Quantitation of asbestos content was determined with a visual volume estimate, a calibrated visual area estimate, and/or point counting procedure. CAUTION: Other fibers with optical properties similar to asbestos may give positive interferences and will be considered asbestos under this methodology. Also, PLM is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials. Quantitative transmission electron microscopy is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos containing.

License Number: 28617
License Class: RESTRICTED
Date of Issue: 06/13/2024
Expiration Date: 07/31/2025
Duly Authorized Representative: Jennifer L Carey

This license has been issued in accordance with applicable provisions of Article 30 of the Labor Law of New York State and of the New York State Codes, Rules and Regulations (12 NYCRR Part 56). It is subject to suspension or revocation for a (1) serious violation of state, federal or local laws with regard to the conduct of an asbestos project, or (2) demonstrated lack of responsibility in the conduct of any job involving asbestos or asbestos material.

This license is valid only for the contractor named above and this license or a photocopy must be prominently displayed at the asbestos project worksite. This license verifies that all persons employed by the licensee on an asbestos project in New York State have been issued an Asbestos Certificate, appropriate for the type of work they perform, by the New York State Department of Labor.

Re: Limited ACM Inspection Report for 258 Broadway, Amityville, NY 11701

Dear Laura T. Liu

JLC Environmental Consultants, Inc. (JLC) was authorized to proceed with an inspection at 258 Broadway to determine the presence of Asbestos Containing Materials (ACM) at the above referenced location.

1.0 Introduction

An asbestos inspection of the selected area was conducted by NYS DOL Asbestos Inspector Jennifer Carey on April 9, 2025. The inspection included accessible areas and materials only. Bulk samples of these materials were collected from various locations throughout the building and analyzed via Polarized Light Microscopy (**PLM**) and Transmission Electron Microscopy (**TEM**) (where applicable). The inspections were conducted in compliance with all applicable laws, rules, and regulations.

The east facade was inspected and sampled for suspect ACM. This report will summarize the sampling results of materials where ACM was found to be present. Additional sampling information is available for further review should there be any questions regarding the full scope of the inspections undertaken for this work.

2.0 Sampling Procedures & Identification of Materials to Sample

JLC's Asbestos Investigator conducted asbestos inspections as per the scope of work. The asbestos inspection was conducted following NYSDOL ICR 56-5.1, Title 15, Chapter 1 of the Rules of the City of New York and EPA AHERA.

All areas that were included in the scope of work were inspected physically – by functional space and homogeneous area to determine the presence or absence of asbestos containing materials.

Suspect materials that may be present inside wall cavities, electrical wiring or which were otherwise inaccessible are not included in the scope of this inspection. Samples of friable and non-friable suspect materials were collected by penetration of the suspect material to its substrate.

The bulk samples collected were placed in sealed bags, labeled with an identifying code and with a sample log. Representative samples of each homogeneous area were then submitted to the accredited laboratory to be analyzed for asbestos content.

The inspection involved the following tasks:

- A visual determination as to the extent of visible and accessible suspect materials and conditions of the material.
- Take photographs of suspect asbestos containing materials.
- Collect and analyze for asbestos content, samples of suspect building materials.
- A physical "Hand Pressure" tests for determining friability and condition of suspect materials.
- Assessments of suspect friable and non-friable materials and locations.
- Quantifying the amount of suspect friable and non-friable materials in their respective locations.
- All suspect materials sampled are identified on the appropriate building floor plan diagram with the sample number.
- A Chain of Custody records are prepared and accompanied the samples to the laboratory.

3.0 Typical Sample Locations and Building Materials Collected

(list of suspect ACM observed to be present and sampled):

April 9, 2025 Inspection

Location	Building Materials Sampled
Ground Floor/ East Facade	Caulk, Brick Mortar, Exterior Window Glazing, Bay Door Window Exterior Glazing, Exterior Window Caulk

** Please see Appendix A – Laboratory Reports for detailed locations and building materials sampled*

4.0 Asbestos Containing Materials (ACMs) Summary

The following materials in the associated locations were found to contain ACM after laboratory analysis. If a material was inaccessible at the time of the inspection(s), the material(s) were assumed to contain ACM until follow-up confirmatory sampling and laboratory analysis can be performed:

April 9, 2025 Inspection

Sample #	Homogeneous Sampling Area	Material & Color	Location	# of Bulk Samples Collected	Quantity (Approximate*)
1	A	Caulk, White	Ground Floor/ East Façade/ Window Frame/ South	2	**12'X1"**
2			Ground Floor/ East Façade/ Window Frame/ North		

**** The quantities provided in this report are estimates based on observations during an ACM inspection and is not meant to be utilized for bidding purposes.***

5.0 Conclusions and Recommendations

All ACM that will be impacted by any proposed renovation should be removed prior to the start of work. Section 56-5, Subpart 1(h) of the New York State Department of Labor Industrial Code Rule 56 Asbestos Regulations states that:

> "If the building/structure asbestos survey finds that the portion of the building/structure to be demolished, renovated, remodeled, or have repair work contains ACM, PACM, suspect miscellaneous ACM assumed to be ACM, or asbestos material, which is impacted by the work, the owner or the owner's agent shall conduct, or cause to have conducted, asbestos removal performed by a licensed asbestos abatement contractor in conformance with all standards set forth in this Part. All ACM, PACM, suspect miscellaneous ACM assumed to be ACM, or asbestos material impacted by the demolition, renovation, remodeling or repair project shall be removed as per this Part, prior to access or disturbance by other uncertified trades or personnel. No demolition, renovation, remodeling or repair work shall be commenced by any owner or the owner's agent prior to the completion of the asbestos abatement in accordance with the notification requirements of this Part."

Abatement activities must be conducted in compliance with all applicable regulations, standards and generally accepted environmental and safety practices including Federal OSHA (29 CFR 1926.58), EPA NESHAPS (40 CFR Part 61), and TSCA Title II AHERA/ASHARA (40 CFR Part 763) Asbestos Regulations, the New York State Department of Labor Industrial Code Rule 56.

JLC inspected and sampled materials as requested by the client. Any materials that have not been tested and/or found positive for asbestos must be assumed ACM.

6.0 Limitations

JLC conducted asbestos inspections and sampling as requested by the client within the scope of work provided. However, it is important to note the following limitations:

- Unforeseen Discoveries: If the scope of work changes or additional materials are encountered that were not included in the original inspection, these materials must be assumed to contain asbestos until proven otherwise.
- Inaccessible Areas: Materials located in inaccessible areas, such as behind walls or above ceilings, were not sampled and may contain asbestos.
- Sampling Limitations: Bulk sampling and visual inspections have limitations and may not detect all instances of asbestos.
- Material Changes: Building materials may have been altered or replaced since the initial construction, potentially affecting the presence of asbestos.

Recommendations:

- Asbestos Abatement: If any materials are discovered or disturbed that are not listed on this report, they should be assumed to contain asbestos, and asbestos abatement must be performed by a licensed contractor before proceeding with renovations or demolition.
- Additional Sampling: If new materials are encountered or the scope of work changes significantly, additional sampling and analysis may be necessary to determine the presence of asbestos.
- Ongoing Monitoring: Regular inspections and monitoring may be required to identify and address any potential asbestos hazards that may arise over time.
- By acknowledging these limitations and following the recommended actions, you can help ensure the safety of occupants and workers and comply with asbestos regulations.

The Client recognizes that all surveying and testing methods have reliability limitations. No method or number of sampling locations can guarantee that a condition will be discovered within the performance of the services as authorized by the Client. These recommendations and conclusions are based on JLC personnel sampling of the selected areas only.

Feel free to contact me with any questions at (212) 420-8119 or via email at kduer@jlcenvironmental.com.

Respectfully,
JLC Environmental Consultants, Inc.

Keith Duer
Senior Project Manager

SUMMARY OF ANALYTICAL RESULTS- PLM

Site: 258 Broadway, Amityville, NY 11701

SAMPLE# COLLECTED LAB#	DESCRIPTION/ LOCATION	Friable/ NOB	Color	Asbestos Detected?	Total Asbestos Constituents (%)	Non-Asbestos Constituents (%)

*Insufficient material submitted **Recommend TEM *** Not Analyzed Positive Stop

**** A report shall not be produced except in full without the written approval of the laboratory.

Symbol Key: F = Friable, NF = NOB (Non-Friable)

Sample Analysis by:
Polarized Light Microscopy-Dispersion Staining (PLM-DS)

Method of Sample Preparation and Analysis:
All friable samples were prepared and analyzed in accordance with ELAP 198.1
All non-friable samples were prepared and analyzed in accordance with ELAP 198.6

Instrumentation:
Olympus PLM, Model BH-2/VM stereomicroscope Model VMZ 1-4.

Analytical results reflect the make up of the materials only in the areas sampled. This "Summary of Analytical Results" shall not be reproduced except in full, without the written approval of JLC Laboratory, and it must not be used by client to claim product endorsement by NVLAP or any agency of the U.S. Government. This method is not applicable to samples containing large amounts of fine fibers below the resolution of the light microscope. The value of this method is limited to the quantitative identification of asbestos and the semi-quantitative determination of asbestos content of bulk samples, expressed as a percentage of the projected area. Quantitation of asbestos content was determined with a visual volume estimate, a calibrated visual area estimate, and/or point counting procedure.

CAUTION: Other fibers with optical properties similar to asbestos may give positive interferences and will be considered asbestos under this methodology. Also, PLM is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials. Quantitative transmission electron microscopy (TEM) is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos containing.

Approved Signatory

WE ARE YOUR DOL

NEW YORK STATE | Department of Labor

DIVISION OF SAFETY & HEALTH LICENSE AND CERTIFICATE UNIT, STATE OFFICE CAMPUS, BLDG. 12, ALBANY, NY 12226

ASBESTOS HANDLING LICENSE

JLC Environmental Consultants, Inc.
243 West 30th Street, Suite 701, New York, NY, 10001

License Number: 28617
License Class: RESTRICTED
Date of Issue: 06/13/2024
Expiration Date: 07/31/2025
Duly Authorized Representative: Jennifer L Carey

This license has been issued in accordance with applicable provisions of Article 30 of the Labor Law of New York State and of the New York State Codes, Rules and Regulations (12 NYCRR Part 56). It is subject to suspension or revocation for a (1) serious violation of state, federal or local laws with regard to the conduct of an asbestos project, or (2) demonstrated lack of responsibility in the conduct of any job involving asbestos or asbestos material.

This license is valid only for the contractor named above and this license or a photocopy must be prominently displayed at the asbestos project worksite. This license verifies that all persons employed by the licensee on an asbestos project in New York State have been issued an Asbestos Certificate, appropriate for the type of work they perform, by the New York State Department of Labor.

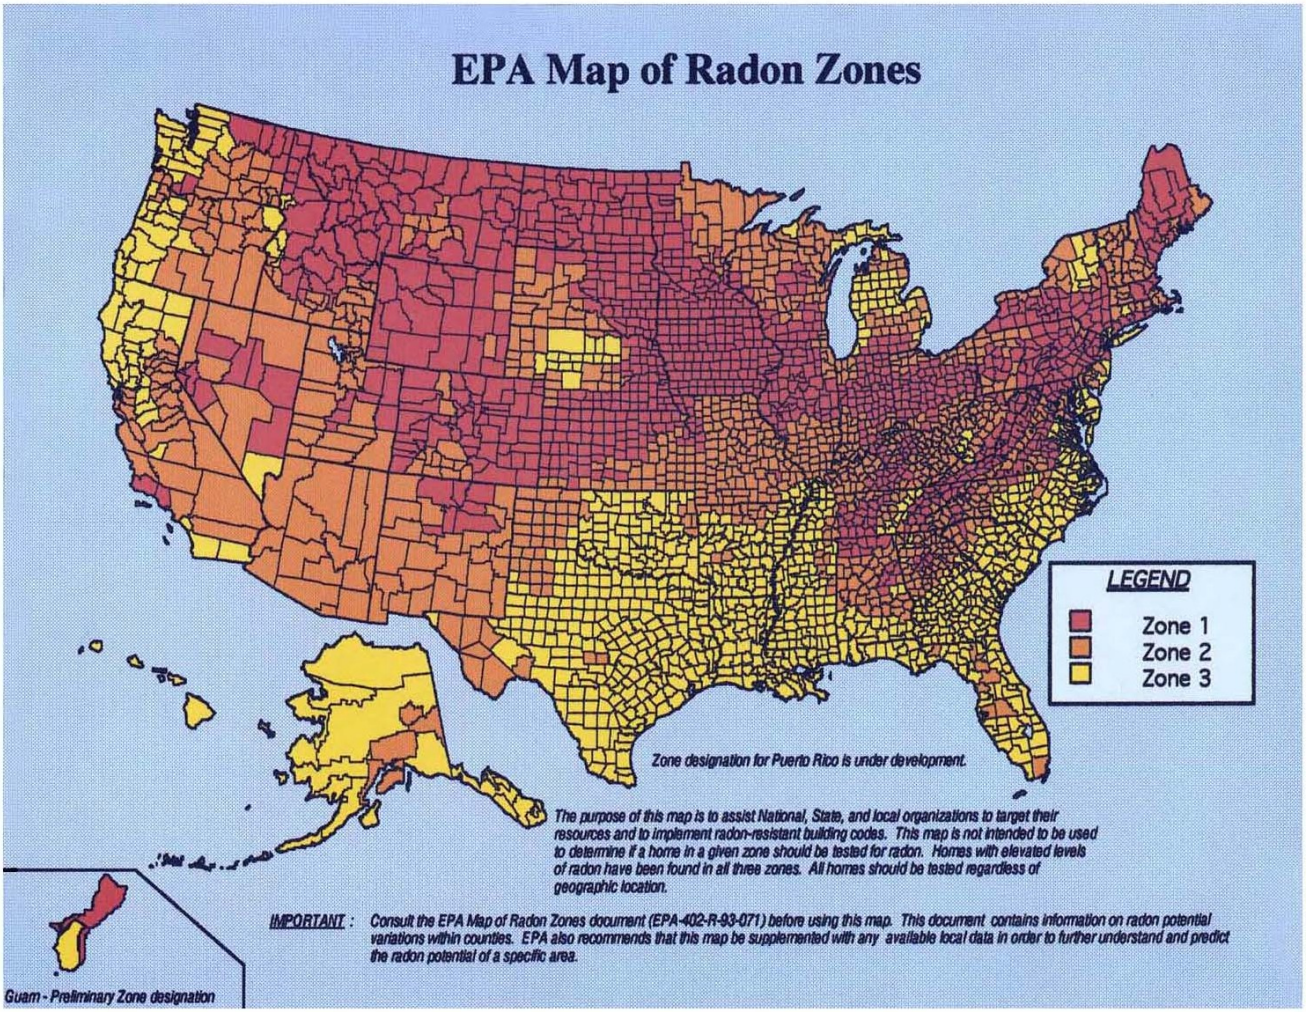
Attachment H

Radon Zones Map

The U.S. Environmental Protection Agency (EPA) created this map to identify areas with the potential for elevated indoor radon levels. The EPA Map of Radon Zones helps national, state, and local organizations implement radon-resistant building codes. The map should not be used to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones. All homes should be tested for radon.

Visit EPA Map of Radon Zones for additional information. A text version also is available.



What do the colors mean?

	Zone 1 (red zones)	Highest potential; average indoor radon levels may be greater than 4 pCi/L (picocuries per liter)
	Zone 2 (orange zones)	Moderate potential; average indoor radon levels may be between 2 and 4 pCi/L
	Zone 3 (yellow zones)	Low potential; average indoor radon levels may be less than 2 pCi/L
