

## Dan Burden Visits Sunrise Highway

AARP, Tri-State Transportation Campaign and Vision Long Island would like you to join us in a unique community opportunity on June 19th. We have arranged for Dan Burden from the Walkable and Livable Communities Institute (WALC\*\*) to come to Long Island. Dan has more than 35 years of experience with transforming roadways that are considered unsafe into more walkable and livable communities. We will be having Dan and his team looking at stretches of Sunrise Highway from Valley Stream to Freeport.

### Walkability Assessment:

**9:00am- Valley Stream at Central Ave & Sunrise Hwy**

**11:00am- Baldwin at Grand Ave & Sunrise Hwy**

**1:00pm- Freeport at Main St. & Sunrise Hwy**

### Debrief:

**7:00pm- Freeport Public Library**

We hope that you can join us in your community to add your input and experiences into the process. Soon after this initial process the WALC Institute will provide more detailed information on how to transform Sunrise Highway into a safer, and more community oriented environment for all users including cars, bicycles, pedestrians and business owners.

*\*\*The WALC Institute helps communities envision built environments that are more walkable and livable. Institute team members work with municipalities, state governments, national advocacy groups, non-profit organizations, neighborhood associations, resident advocates, consulting firms and developers to retrofit existing streets or design new places that support active living and create a sense of community.*
