

THE 2021 LONG ISLAND SMART GROWTH SUMMIT

**SAVE
THE
DATE**

**WED - FRI
NOVEMBER
17 - 19
2021**

As we continue to work our way back from the economic loss suffered from the COVID-19 pandemic, the 20th Annual Long Island Smart Growth Summit is an event that takes on even more importance. Please join us both online and in person as we seek to assist our local communities through economic recovery guided by placemaking principles.

This year we will be holding a hybrid virtual / physical program that will feature workshops, technical worksessions, and plenary sessions on regional and local issues facing downtown redevelopment, complete streets projects, infrastructure investment, regulatory relief and economic recovery through the Coronavirus.

For years we have brought together thousands of civic members, chambers, civics, community-minded developers, environmentalists, design professionals, labor, academics, seniors, young people, minority owned businesses along with federal, state, county, town and village officials from Long Island and the region.

We need your continued energy and participation to help shape recovery efforts so the many years of progress made in our local communities is not lost.

Please contact us at 631-261-0242 or events@visionlongisland.org for more information or to be alerted when registration opens for this event.
